

Every Doubt

has been dispelled as to the durability of **White Bronze** for monumental work; scientists and assayers of metals say that they see no reason why it should not remain in perfect condition as long as the Pyramids of Egypt.

Marble or granite, after a few years' exposure to the elements, begins to change color, grow moss and becomes unsightly.

Inscriptions on **White Bronze** are in raised letters, no paint being required to keep them legible.

White Bronze is pure zinc metal and is manufactured into hundreds of different designs in the most artistic manner for grave markers and monumental work of all kinds.

Insurance Companies Purchase Municipal Debentures

"In recent years interest yields of municipals have not been attractive, and consequently funds have directed in other channels. A very marked change, however, has taken place within the last year. Good municipals have been and are still available at excellent interest yield rates and most of the life companies are taking full advantage of the favorable prices and making heavy purchases."

We have carefully selected municipals to yield from 5-1/2 to 6 per cent, in denominations of \$100 up. Ask for particulars.
