Dorothy Dix Says—

JEALOUSY OFTEN BOOMERANG THAT FLIES BACK AT WIVES Be Sure Your Suspicions Are Fully Justified Before You Accuse Your Husband Of Double-Crossing

Dear Miss Dix—What should a wife do who has a husband whom she trusts implicitly, yet who is jealous of him although she has no ground to go on except a queer look she saw pass between him and a woman at a party? That is my case. He, dear blind bat, doesn't suspect anything, but my woman's intuition tells me that woman is trying to start something that bores me no good. I am at a loss to know how to handle this situation. It is so embryonic. What I would like to do, being frightfully frank and rabid on the subject of peace of mind, is to talk to him and see whether there is anything up or not. I feel sure he would tell me about it if he knew that I had any inkling that there was something going on because I know that the accusation maybe it will all one-sided. But what shall I do? Talk to him? Talk to the woman? Or keep my mouth shut and pretend to be blind?

ANSWER—It seems to me that you are getting a fine case of jitters over nothing, and that if your suspicions that your husband is philandering are based upon nothing but a "queer look" that you think you saw pass between him and a woman, it is so intangible, so fleeting that no one can possibly analyze it and swear to what it indicates.

Eyes Tell Nothing

And when wives start to read things in their husband's eyes, they certainly do go haywire. I have heard wives say that they knew that the husbands who beat them all loved them because they saw it in their eyes. And I have known other wives whose husbands had sheep's eyes, who saw devilry in them. So my advice to you is to go slow in starting anything until you have some better evidence to go on than a passing glance.

Whether you should tell your husband about your suspicions of the predatory lady depends upon your knowledge of how he would be likely to react to the accusation. Maybe if you tell him, she will be thankful that he had a wife who took such good care of him and protected him from dangerous females.

But, on the other hand, he might be deeply wounded at your lack of trust in him and insulted by your thinking that he did not have sense enough to take care of himself, and that he would fall into the trap of the first man-hunter who came along.

After all, you know, it isn't much of a compliment that a wife pays her husband when she lets him find out that she believes him to be either a dot or a double-crosser.

My own opinion is that the jealousy of wives is often a boomerang that flies back and annihilates them than not.

"Let sleeping dogs lie" is a good motto for wives. Nothing does more to keep a man in the straight and narrow path than his belief that his wife trusts him implicitly and believes him to be a gentleman who could not do a mean and underhanded thing, or betray her faith in him.

Dear Miss Dix—I am a law student, 22 years old, very much in love with a girl and we plan to marry next winter. However, I am sure that I will be drafted in the army before that time, and we do not know what to do about getting married. We marry now, she would have to live with another. So she would have to live with my parents who do not like her. She would have no other means of support. We have already postponed our marriage for three years so I could finish law school and we do not wish to wait any longer. Please advise us what to do.

ANSWER—There is an old adage which says: "Needs be when the devil drives," and that is your case now. Hard as it is for you to put off your marriage again when you have looked forward to it for so long, you must see yourself that it is the only thing you can do in the case.

For your wife to go to live with your parents when they dislike her and resent your marrying her would create an intolerable situation for marriage as long as you live.

Don't make such a disastrous mistake. Don't befool yourself into thinking that because all of them love you they will love each other. Just the contrary will be the case because they will be jealous of each other, and you will be kept on a strain trying to hold the scales even and to show no favors to either side.

As for your thinking that if you do not marry before you go to service in the army one or the other will be unfaithful, forget it. If your love is not strong enough to stand a little separation, it is so poor a thing it is not worth having.

SPINACH UNLUCKY

Don't serve spinach at a wedding, because "greens are food for pickles and forest sprites make mischief at the weddings." This is one of many bridal superstitions and stories gathered by Claudia de Lys who is compiling an encyclopedia of folklore.

LEAF IS MANUFACTURER OF MOST OF OUR FOOD

Leaves aren't merely decorations that come out just to make Spring seem like Spring. They perform very important functions for our plant life, and manufacture all of our food—even meat if you wish to trace the process far enough.

As sunlight strikes the leaf membrane, small quantities of air enter through thousands of tiny mouths, called stomata. At once the color-

ing matter of the leaf, called chlorophyll, takes carbon dioxide from the air and mixes it with the water brought up by the plant's roots. Then, helped by the sunlight, the leaf manufacturers the sugars and starches upon which the plant lives. At the same time it breathes for the plant, returning to the air surplus oxygen. The leaves also act as pores. They perspire away excess water sent up from the roots, and keep the plant cool and healthy. Sugars and starches made by the leaves pass through its veins and unite with the plant's sap. This nourishes the plant and the hard woody material of the stem and branches, called cellulose, is built.
