They rushed to the scene and found that the only occupants of the house at the time were two little children. They also found the fire confined to some clothing hanging on the walls which had evidently caught from a lamp nearby. They quickly got a supply of water and extinguished the blaze. But for their timely arrival on the scene and their prompt action the house might have been destroyed and the children have lost their lives.

# Don't Use Haphazard Blends

**H**OW can anyone depend upon getting, always, good bread or pastry if one's flour varies from time to time in strength and composition? The composition of wheat changes from time to time. Your blended flour may be all right one time and all wrong next time, due to the changes in the wheat. Most millers have no means of correcting these changes. The result is a haphazard blend. Our completely equipped testing laboratory finds out first what is IN the wheat. Then it is easy to maintain the absolute uniformity of our famous

## QUEEN CITY FLOUR

(Milled according to Government Standard)

Use our flour. Then you can always be sure of happy results. It always contains just the correct amount of Ontario winter wheat for flavor and flaky texture—always exactly the right proportion of Manitoba spring wheat for fine big loaves of nourishing, delicious, flaky bread. No occasions occur when extra quantities of expensive shortening are needed to counteract over-strength in the flour when making pastry—and bread always rises properly. Try Queen City Flour for uniformly good baking results.

**Splendid Pastry and Bread**

Queen City Flour makes pastry of rare delicacy and flaky texture and it makes, equally well, bread of high nourishing quality due to the richness of gluten in the Western hard wheat it contains.
