

for MOUTH THROAT and GUMS
 Kills germs Prevents Pyorrhoea Gargle with
Absorbine Jr.
 THE ANTI-SEPTIC LINIMENT

AS a preventive against pyorrhoea, sore throat, tonsillitis and unpleasant breath, gargle with diluted Absorbine, Jr., morning and night. This reliable antiseptic and germicide will kill the disease germs that are the cause of mouth and throat infection. It will also tend to keep the mouth in a wholesome condition and the gums firm. Always keep a bottle of Absorbine, Jr., handy—use it freely. \$1.25—at your druggist's.

For Tonsillitis rub and gargle with Absorbine Jr. THE ANTI-SEPTIC LINIMENT

What is thy duty? The demand of the present hour.—Goethe.

Ideal Time For P. E. I. Exhibition

The Prince Edward Island Exhibition will be held for the second time at a season of the year most suitable to every farmer and livestock breeder, who for the past number of years have found it impossible to spare the time from harvesting their potato crop, which matured the latter part of September immediately following the grain harvest, to attend this feature.

The experience of 1928 has proven that the earlier dates are more convenient for exhibitors and more attractive to visitors. The days are longer, the weather is more inviting and the large number attending showed that the public appreciated the efforts put forth by the Managing Committee, to do everything possible for the convenience and comfort of all those who are participating.

Our Inter-provincial Exhibition is doing an inestimable good in the promotion and improvement of livestock, livestock products and field crops. This is the annual examination and review of the many phases of agricultural assistance and encouragement carried on by the Department of Agriculture, the results of which are found in the splendid increase in value of all animals and their products, shown in the increasing percentage of exports of these commodities during recent years. A correct type of breeding animals is the very foundation of improvement in the high quality products sold over the retail counter to the discriminating consumer. Grading of all such commodities is the necessary method of control but it is imperative that the breeding stock from which the commercial animals

are used in the production of their products be of the proper type and conformation, before the proper quality can be secured, from the benefits of grading.

The Inter-provincial Exhibition is exercising a splendid influence in fixing the proper type of beef, dairy cattle, hogs, sheep and lambs, wool, poultry and other products. All of these come before expert judges and the work of the breeders in this manner, is checked up and graded. The value of this grading has been many times proven. The most valuable breeding stock in the world is found in the British Isles and its superiority is largely due to the competition created at the Exhibition and Livestock Shows, where their breeders endeavouring to win and establish a reputation, are compelled to continually improve the quality of their breeding stock.

By holding Exhibitions of this kind, where the Breeding Associations supplement the prizes of money offered by the Exhibition Associations, the combined amount constitutes a sum sufficient to encourage and compel the ambitious farmer to breed the best animals available and develop them properly, so that their off-spring re-sold throughout the Province, creates a most beneficial effect on the quality of the commercial stock bred by the ordinary farmer.

It has been proven beyond the shadow of a doubt, that especially select and well-bred animals are the most economical for the commercial breeder to use. We frequently hear nondescript or mongrel animals referred to as the poor man's stock, suggesting that this class may be more profitable to the man of limited means. This is a most costly error, for those foolish enough to be influenced by such an erroneous belief. The livestock that has made the well-to-do man prosperous is the very class that the poor man should use. There is no class of livestock that will improve the poor man's financial condition quicker, or provide for larger profits and more economical returns, than the class of stock recommended by the leaders in agricultural instruction, and the farmer, who through their use, has made his condition prosperous.

Grading of food products is only adopted after the most careful experiments in learning which is most profitable for the producer and the consumer, and foolish is the man who selects to oppose such advice. It will always prove profitable for a man to learn and adopt improved regulations as soon as possible. Agricultural Exhibitions are always most interesting to all lovers of good livestock, and that includes almost every wholesome normal person. It is always a time of special enjoyment to the young people born and raised on the farm and every farmer in this Province owes a duty to himself and his family to see that they are given the privilege of visiting the Exhibition at least for one day.

The admission to the Exhibition Grounds and Grand Stand has been reduced to the lowest possible point and compares favourably with similar Exhibitions held elsewhere in Canada, and that these changes

were appreciated was shown by the fact that last year, the attendance was the largest in the history of the Exhibition.

Another criticism heard is that the Prince Edward Island Exhibition is developing into a race meet. This is altogether erroneous, as the entries for livestock have more than doubled during the past five years, and while a number of people do attend the horse races, they are self-sustaining and not one dollar of the moneys contributed by the Agricultural Departments, goes to their support. Less than 50% of the 14,000 entering the turnstiles on one day of the Exhibition, saw the races, but spent the day viewing the livestock exhibits, the judging, the industrial display in the main building, while at least 90% of those who did pay their entrance fee to the races, first spent considerable time in viewing the agricultural display. The Directors of the Exhibition Association who had a vision of improved livestock in this Province and conceived the idea of purchasing the extensive grounds and constructing the commodious buildings, entirely with their own funds, deserve a great deal of credit and their efforts should be appreciated by every resident in our Province. These men have given unlimited and valuable time to the work of this organization "without money and without price" and whereas every other Province of Canada has contributed to the building and upkeep of their Exhibition grounds, the Directors of the Charlottetown Exhibition Association have made it possible for the Province to put on the splendid Exhibitions that are now annually held.

To induce farmers living in Prince and King's counties to exhibit at the Inter-provincial Show, the Directors this year have made the magnificent offer of paying freight on such livestock, placing the farmers in Tignish and Wellington, almost on an equal footing—so far as costs of transportation are concerned, with those adjacent to the City of Charlottetown.

As the Exhibition will be held at the slack season of the year, we trust that all farmers and their families will give themselves a pleasant vacation, from which they can secure the dual benefit of inspecting the best agricultural exhibits to be found in Canada and meeting with their many friends from other parts of the Province. There is no class of people who deserve a vacation more than the hard-working farmer and his family, and we hope to see a large majority of these at the coming Exhibition.

You cannot match these BIG CAR FEATURES

A PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

In fact, you can't think of the Pontiac Big Six in terms of other cars of its price. . . Simply because Pontiac presents big car value at small car cost. Here are big car luxury of appointments . . . the soft ease of the roomy interior . . . such comfort as only a big car can give you . . . the grace and elegance of a big car revealed in every line of the Body by Fisher. Test Pontiac's real big car performance. Experience the power of the big six engine with GMR High-compression. Cylinder

Head. Learn about the Lovejoy Hydraulic Shock Absorbers that add immeasurably to your riding comfort; the Internal-expanding Four-wheel Brakes . . . and all the other great advancements in engineering and design now embodied in Pontiac for the first time in the low-priced field. Check appearance for performance . . . performance for performance. You cannot match these big car features at or near Pontiac price. A trial ride will prove a revelation to you!

IT'S BETTER BECAUSE IT'S CANADIAN

LOOKING' Em OVER

DOINGS AT THE RACE TRACK
 The pacers went in 2:10 1/4 and the trotters in 2:11 1/4.

THE RACING
 Tuesday the race opens. At 2 o'clock the 2:23 trot, with a nice bunch of good trotters will start the fireworks, followed by the 2:15 trot, which will be a dandy contest, with Great Scott, Longest, Little Bondsman, Peter Will Tell and others. The 2:30 pace, first division, will be the third class.

VAUDEVILLE
 Three troupes of vaudeville costing fifty percent more than any previous contract, will give some star performances between the heats, Ralph Maddison will sing and the Legion Band will render the musical program. Don't fail to see Tuesday's program.

Look, yes!—Mr. Coolidge said there is no longer the great advantage in wealth there used to be. The installment plan makes it look that way.—Treharne Times.

But I Smoke—It must be awful to be famous and have to sneak out behind the barn to use a brand you haven't endorsed in a testimonial.—Kamloops Sentinel.

The Church began its working life on the day on which one young man said to another, "Come and see."—Charles E. Jefferson.

THE TRACK
 Is being put in A-1 condition yesterday and today hundreds of loads of sand will be hauled off, then a grading machine will be used on the turns. After that it will be harrowed and the leveller put over it. Caretaker Arbing expects it to be equally as fast as last year, when

Philip Carson, of London, is now disinclined to believe 13 being the unlucky number. Having been in gaol 13 times, his age being doubled, 13, and having 13 letters in his name, he entered a South Coast Exhibition recently with the intention of picking pockets.

After "lif ing" a wallet at the stile, he was pounced upon by a man who rushed him into a resident office.

"I'll go quietly," he muttered. "er seem to have no luck!"

He was amazed to receive \$28,100,001 person to pay admittance.
