SHE FAINTED WITH THE AGONY

"Fruit-a-lives" Cured Her Kidneys

Miss MAGGIE JANNACK

MOUNTAIN, ONT., DEC. 14th 1910 "I desire to let the world know the great debt I owe 'Fruit-a-lives' which saved my life when I had given up hope of ever being well again. For six years, I suffered from dreadful Kidney Disease. My legs and lower part of my body were fearfully swollen. The pain in my side and legs would be so bad that I would faint with the agony. Five different doctors attended me and all said it was Kidney Disease and gave me no hope of getting well. A kind neighbor visited me and mentioned the case of Mrs. Fenwick who had been cured of a sickness like mine. I took 'Fruit-a-lives' and in a short time I began to feel better—the swelling went down—the pains were easier—and soon I was well. I have gained over 30 pounds since taking 'Fruit-a-lives'—and my friends look upon my recovery as a miracle." (Miss) MAGGIE JANNACK.

The Toronto Globe of Thursday has the following account of the death by drowning there of Andrew McGee, formerly of Charlottetown: Andrew McGee, a workman employed by Haney & McGee, in the dredging of the new cut at Centre Island, fell into the lagoon yesterday afternoon, and after swimming laughingly about for a moment or two suddenly sank and was drowned before the eyes of several men standing on the scow' not ten feet away. According to the stories of eyewitnesses McGee was a good swimmer and made light of his accident. He seemed in no hurry to get out, and swam around for almost a minute before he sank. Several ropes were thrown to him, but it was then too late to do anything. After several minutes his body was recovered with the aid of a boat hook, and Dr. Clarke of the Children's Hospital worked over him for some time without success.

A meeting of stock breeders was held last week in Prince of Wales College, Charlottetown. On account of the season being a busy one and several of the breeders going over to St. John's the meeting was not as largely attended as it would otherwise have been. The chief business that came up for discussion was the holding of a Fat Cattle Show and Short Course in Agriculture. The Commission of Agriculture, who was present, announced that he had been able to secure the Hillsboro Skating Rink for such purposes and suggested that after the meeting had adjourned, he would like all who could spare the time to go over and see the building and make suggestions for fitting it up. Nearly everyone went over and after considerable discussion the amount of sitting up that would be required was agreed upon. All went away feeling that a more suitable building for the purpose could not have been secured and that a new era was being inaugurated in the Live Stock Industry of the Province. The next meeting of the Stock Breeders will be held in Prince of Wales College on Wednesday evening the second day of the Exhibition at 7.00 p. m.

Range Talks By The Housekeeper No. 3 - Subject - "Fire Box and Grates" "We women folks will always consider the Oven all-important, but, my husband—he knows how a range should be made—attaches a great deal of importance to both Fire-box and Grates—they are just as important, in his opinion, as the Oven. "And the semi-steel GRATES—made in two styles for wood and coal—are remarkable for endurance. The Coal Grate is made in two pieces, and is easily shaken. The wood Grate is very simple and strong. You can take out back end lining when using it. there's a special pocket behind this lining which allows one to burn long pieces of wood. "It's easy to change the Grates—just slip the steel buttons aside and out they come. My little boy can change them in a few minutes. "Ashes cannot miss the ash pan—Flanges sloped inward, below the Grate, guide all ashes into the big rooky pan. "The 'KOOTENAY' burns any sort of fuel and makes cooking and baking easy! Yes! It's the best range I know anything about." "John likes our 'Kootenay' Range, because it has a real Fire-box—a big, long deep, Fire-box with plenty of heating capacity. — Yet he says, it is not too big but nicely proportioned to size of oven. And of course, it is very plain that he is right. "The 'KOOTENAY' Fire-box makes cooking easy all over the top—it heats the Oven so evenly that one can cook and roast a large joint perfectly at the same time. No waste of time with this dependable Fire-box, so—it is quite evident that it saves fuel—reduces coal bills because one can do so much at once with it. "The linings of the 'KOOTENAY' Fire-box are made in nine separate pieces—3 in front, 4 in back, and 1 on each end. This allows for contraction and expansion, and—these linings are made of extra heavy, durable semi-steel—they resist the strongest heat for a very long time."
