

The NEW BRUNSWICK GUARDIAN

AND PRINCE COUNTY CHRONICLE

THE WESTERNGUARDIAN

AGENT: Mrs. John Pond, 21 Church Street—Phone 289
SUMMERSIDE and PRINCE COUNTY

New Subscriptions. Advertising, should be left with Mrs. Pond.

The Guardian may be bought daily at any of the following stores in Summerside:
Gourles Drugstore, Water Street.
Mark Gaudet, 67 Granville Street.
The Guardian will be delivered to any home in Summerside by carrier boy at 20 per day, or 10 per week. Phone 289 for this service, or give your order to the boy responsible for deliveries on your route.

This column is reserved for news of local interest, but advertising of a new nature may be inserted at 1 cent a word, strictly payable in advance.

COOPER'S DRI-KIL at Taylor Co., Kensington. L-201.

BEDEQUE UNITED CHURCH. The services for Sunday, March 11, are as follows: Benediction 11 A.M., Holy Communion 11:30 A.M., Bible Study 7 P.M., March 9th in Central Hall. L-431-3-4-11.

CENTRAL BEDEQUE UNITED CHURCH. The services for Sunday, March 11, are as follows: Benediction 11 A.M., Holy Communion 11:30 A.M., Bible Study 7 P.M., March 9th in Central Hall. L-421-3-8-11.

COME TO Bedeque Carnival. Try and pick the winning numbers. First and second ladies, first and second girls, first and second boys, and most comical, all receive prizes. Skaters in costume. Admission 20 cents. L-396-3-6-41.

ENTERTAIN I.O.E. MEMBERS. Mrs. Alex. Horne was in charge of the I.O.E. at her new home on Summer Street. A Book Tea, each member presented to the air port for the library.

SUMMERSIDE C.W.L. MEETING. The regular monthly meeting of the Summerside Division of the Catholic Women's League was held this week in the C. of C. and was presided over by the president, Mrs. Joseph Callaghan.

Traverse Mrs. John MacWilliams, Cape Traverse, Mrs. Melville Bell, and charming daughter Diana, DeSable, spent the week end in Albany, guests of Mr. and Mrs. Frank MacKay, Albany.

Graded Chick Sales Show Big Increase. Last year 18,878,000 graded chicks were produced in Canada by Record of Performance breeders and approved hatcheries. This was an increase of more than one million chicks over the figure for 1939.

Three grades of chicks are produced under the National Poultry Improvement Program which coordinates the work of many breeders, hatcherymen, Dominion and Provincial Departments of Agriculture and others interested in the Canadian poultry industry. Under the National Plan, poultry raisers can purchase chicks which have been produced under careful government supervision of both breeding flocks and hatcheries.

Only Record of Performance breeders and approved hatcheries can produce graded chicks. There are three grades of chicks under the National Program—R.O.P., R.O.P.-sired, and Approved. All breeding flocks are government inspected, culled and blood-tested for disease either by Dominion or provincial inspectors.

R.O.P. chicks are produced according to Record of Performance standards. Bred male and female breeding stock in pens producing R.O.P. chicks are of at least two generations of 200 egg breeding or purchased mainly by breeders who want the best foundation stock or cockerels of known breeding. About 50,000 R.O.P. chicks were sold in Canada in 1940.

R.O.P.-sired are the highest commercial grade. They come from flocks of approved females mated to R.O.P. sires. In 1941 a total of 3,400,000 R.O.P.-sired were produced. This year more hatcheries are planning to hatch this grade of chicks.

Approved grade were sold in 1940. These chicks are from flocks of approved hens, mated to approved males. In flock approval selection is made on the basis of such important points as early feathering, rapid development, egg size and body conformation. The objective is to produce pullets which will give high egg production and cockerels of the best type for meat production.

When steel fittings on the stove become brown through heat, a rag dipped in vinegar before cleaning in the usual way will help remove the stains.

Mr. John A. Rogers was a business visitor to Summerside Wednesday.

Mr. John Walker has returned from Halifax, N.S. While there she was the guest of her son, Mrs. Howe and her son, Mrs. Rose Walker of the P. E. I. Highlanders.

NAZI REPORT

(Continued from page 1)

spread throughout Europe, continued:—
"Mr. Foltich went to the rendezvous and was informed that it was time to tell the Prince Regent and the Yugoslav Government that in President Roosevelt's opinion it was time to put an end to the successes of the Axis powers even if they were only diplomatic successes.

"Mr. Roosevelt also was said to have made known that the lease-lend bill would certainly be accepted by Congress and the American Government there would have the means to curb efforts designed to create a new order.

"The United States would then be able to furnish efficient aid to all European states which had not already submitted to this new order.

"Mr. Sumner Welles is said to have called the tripartite pact 'very bad work but a most dangerous diplomatic instrument for England.'

"Before bidding Mr. Foltich goodbye Mr. Sumner Welles is said to have extracted a promise that Foltich would immediately transmit Mr. Roosevelt's message to Belgrade... assuring him that telegraphic rates would be reduced.

On Feb. 10, that is several days before this proposition, the American Minister to Belgrade, acting under the urgent orders of Mr. Roosevelt, is said to have gone to the Yugoslav Premier's office to convince the British of the ultimate victory and that he would do everything to contribute to it.

"At the same time American diplomats accredited to Balkan capitals are said to have told Washington that Greek resistance was weakening, that war material delivered to Greece by England was without value.

"The Greek Government is said to have informed the United States Minister to Athens of the real situation. Thereupon, the American diplomat is said to have advised the Greek cabinet to appeal directly to the American people to obtain shipments of war materials.

Conferences which were then held in Washington broke down and the only result was the recognition that the American machines delivered to the Greeks by Americans are of no value.

"In Washington Roosevelt's proposition was explained by the fact that the American people must see the American influence to here, the prestige greatly diminished following the closing of the British Legation in Bucharest."

BERLIN, March 7.—(AP)—An alleged effort by President Roosevelt to keep Yugoslavia from approaching the Axis has brought about a new accent on European-American relations. The German commentary Dienst aus Deutschland claimed tonight.

"A new report in central Europe of any such alleged effort by the United States President was a story today in the Budapest paper Magyar Nemzet, and this story was picked up at length by the German radio and D.N.P., the German news and propaganda agency.

"The Essen National Zeitung asked if Germany would appreciate it if the American effort to here, with all certainty the consolidation of the 'new order' will continue in Europe.

"The 'Roosevelt demerch' to Yugoslavia, the commentary claimed, is directly opposed to the principles of the Monroe Doctrine as well as Roosevelt's own promise to the voters to keep America away from war."

Centralized Traffic control

MONCTON, N.B., March 7.—A dream of every model railway fan, centralized traffic control, a system which permits of direct control of train movements over a given section of track from a centralized point is about to be installed on the Atlantic Region of the Canadian National Railways between Moncton and Pacific Junction to the west, a distance of 1082 miles, and between Moncton and Turro to the east, a distance of 124-72 miles, according to an announcement by W. U. Appleton, regional vice-president and general manager.

Under this system, the despatcher has complete control of all train movements, turning the switches and operating track signals by remote control. Meets between trains on single track are arranged by the despatcher without having to issue train orders and trains can pass each other irrespective of direction rights, a train in one direction being superior to a train in the opposite direction also there are classes as between trains under the present system of despatching.

At each end of passing tracks tracks telephone connection is provided to enable the train crew to communicate with the despatcher if necessary.

The Despatcher sits in front of a board on which all sections of the track are indicated. The location of trains as well as the positions of passing track switches and indications of signals are shown by miniature red, green and yellow lights as a train moves over the track. By an interlocking system it is impossible for a despatcher to operate a switch or signal incorrectly.

The system is a development of what has previously been known as the absolute permissive block signalling on single track and the advantages over the existing system of despatching by train orders and signals are that delays of trains which that system entails will be avoided and traffic capacity of the track will be greatly increased without sacrifice of safety of operation.

Centralized traffic control has already been tried out on some of the United States lines and this is the first installation of its kind in Canada.

Sixteen of the raiders were downed, some damage was done to buildings and one British fighter lost.

The captured Italian ships were named as the Adria, 3,809 tons; Savio, 5,490 tons; Erminia Mazzeola, 5,742 tons; Manon, 5,597 tons, and Leonardo da Vinci, 5,815 tons.

One of the four scuttled Italian ships was identified as the Marghera, 4,511 tons.

As to the Mediterranean theatre, British authorities said that a mass raid by 100 or more German dive bombers, bombers and fighters was carried out against Malta on Wednesday.

British find Mock invasion Was success. Observers Believe it Was Better Than Any by Hitler.

LONDON, March 7.—(CP)—Britons reckoned today the results of a mock invasion exercise decided their imitation was better than anything Hitler could offer.

Summing up the score, War Secretary David Margesson told the Commons:—
"There were many landings by sea and by air and the effect of the mock invasion and defence exercises was estimated to have caused a breakdown of many of our means of communication. Notwithstanding this, the defence organization came through the ordeal with great credit.

The sham invasion featured landings by air and sea and one informant said it "probably was more successful than anything Hitler could think up."

Some concern was expressed over civilian reaction. In one locality conditions of France and Belgium were generally raised havoc with defence plans. The "invaders" took advantage of this to put over some important coups, including the shattering of the vital communication lines.

That the sham attackers included "some of the most brilliant British staff officers" might have had much to do with the civilian confusion it was explained.

Any material weakness exposed was declared to have given important lessons in resisting a real invader.

The exercises covered all Britain from Land's End to John O'Groats and from west Wales to the Wash. The navy, army, civil defence guard, air raid precautions organization and other war auxiliaries collaborated in the vast manoeuvre.

The final summing up of the umpires showed that in all the "invaders" were checked.

NORTH WILTSHIRE W. I. The February meeting of the W. I. of North Wiltshire was held at the home of Mrs. Geo. E. MacLean and was in the form of a social evening. The meeting opened in the usual way and roll call was answered by fifteen members, with an exchange of valentines. There were about fifty visitors present. The correspondence was read and reports of committees were received. The new school committee is Mrs. Berrigan and Mrs. Bruce MacDonald. Lunch committee is Mrs. Bruce MacDonald, Mrs. Younker and Mrs. Easter. Program committee is Mrs. Lane and Mrs. Younker. Red Cross committee gave yarn to the members and sent knitted goods to headquarters in Charlottetown. Mrs. Cecil Campbell invited the members for next meeting, roll call to be answered by naming a book which I have read from Carnegie Library. A program of contests and readings will be given. The meeting closed by singing the National Anthem. The remainder of the evening was spent in dancing and a delicious lunch was served by the members.

BLANKETS FROM SOCKS. Quilt warm blankets can be made from men's discarded w-olen socks. Cut off the foot just above the heel, cut the leg part up the seam and lay flat. Then over-sew the sock edges until the blanket is the desired size. Finish the blanket by covering with utility cloth, binding the edges firmly and catching together here and there to keep the w-ollen lining in place.

Personnel of Committee on war Expenditures

OTTAWA, March 7.—(CP)—Steps towards organization of the War Expenditures Committee, Parliament's new agency for reviewing and checking the vast sums of money being spent by the defence and other war services are under way.

The House of Commons after a two-day debate passed the resolution to set up the 24-man committee on which all parties are represented.

It was the first time in history that a parliamentary body was clothed with power to investigate governmental expenditures while they are being made.

The normal way in which Parliament checks up on government expenditures is through the Public Accounts Committee, but that committee only acts on expenditures after they have been made.

The committee's instructions are "to examine the expenditure defrayed out of moneys provided by Parliament for the defence services and for other services directly connected with the war and to report, what, if any, economies consistent with the execution of the policy decided by the Government may be effected thereon."

Members nominated to the committee:—
Liberals—D. C. Abbott, Montreal; St. Antoine-Westmount; Peter Bouché, Montreal-Cartier; J. A. Bradette, Cochrane; Lionel Chever, Stomont; Hughes Cleaver, Halifax; A. Fournier, Hull; R. Gladstone, Wellington Street; William Golding, Huron-Perth; R. T. Graham, Swift Current; Ross Gray, Leiston West; W. C. Macdonald, Halifax; R. Mayhew, Victoria; G. C. McGeer, Vancouver-Burrard; C. F. Plourde, Bellefleur; Vincent Pottier, Shelburne-Yamouth-Claire; Gordon Ross, Moose Jaw; J. H. Sissons, Peace River and J. T. Thorson, Selkirk.

Conservatives—Percy Black, Cumberland; John Diefenbaker, Lake Centre; Howard Green, Vancouver South; Joseph Harris, Toronto-Danforth.

C.P.F.—Angus MacInnis, Vancouver East.

New Democracy—J. A. Marshall, Camrose.

An early meeting of the committee for organization purposes is expected. At this meeting the chairman will be chosen. Speaking in the House yesterday Mr. Harris suggested that Mr. Thomson might be chosen for this duty.

Although opposition members contended the committee should sit in public as much as possible they agreed it should sit in camera rather than disclose information of value to the enemy. Mr. Harris hoped the Government would give the committee a free hand to decide whether public or private sessions should be held.

Common Policy? If the Greek and British have reached some common policy—and there have been many indications of that—the way is clear for British support for the Greeks, not only in the air but by troops. Britain has men available in Egypt that could be transported across the Mediterranean without great difficulty. It is significant that only fragmentary accounts of the Army of the Nile have been received since the fall of Bengasi, indicating a general halt has been in progress since that time and, perhaps, redistribution of forces.

CANADA'S FLOUR MILLS. There were 368 flour mills and 925 feed mills in Canada in 1940. The flour mills had a total 24-hour capacity of 98,553 barrels. Thirty-five of the flour mills, 60 per cent of the feed mills, and 46 per cent of the flour milling capacity in Canada are located in Ontario. Quebec ranks second as far as the number of flour and feed mills is concerned, but in flour milling capacity Saskatchewan is second to Ontario, followed by Alberta, Quebec and Manitoba. The Maritime Provinces and British Columbia have a small milling capacity.

Final Conquest

(Continued from page 1)

Jijiga in Northern Ethiopia, and another retreat is proceeding from Jajja Ferrandu, in the Northern Juba River valley area of Somali-land, toward the Southern Ethiopian lake. This was one of the main routes used by Mussolini's men in the conquest of Ethiopia in 1936.

The pursuing British troops have struck well into Ethiopia proper, where they expect to be joined by Ethiopian insurgents in a drive to wrest the colony from Italy and restore it to Emperor Haile Selassie.

British suspicions that Chi Ingi and Mogadiscio were used as re-raid stations by German surface raiders were confirmed. The Admiralty said by the discovery and capture of 200 British and allied seamen held prisoners near Mogadiscio after their ship had been sunk.

The captured Italian ships were named as the Adria, 3,809 tons; Savio, 5,490 tons; Erminia Mazzeola, 5,742 tons; Manon, 5,597 tons, and Leonardo da Vinci, 5,815 tons.

One of the four scuttled Italian ships was identified as the Marghera, 4,511 tons.

As to the Mediterranean theatre, British authorities said that a mass raid by 100 or more German dive bombers, bombers and fighters was carried out against Malta on Wednesday.

Sixteen of the raiders were downed, some damage was done to buildings and one British fighter lost.

TREATED BANTING PILOT

Flight-Lieut. C. S. Wilson R.C.A.F. was the doctor who flew from Newfoundland airport to Musgrave Harbor to treat Capt. Joseph Mackie, pilot of the plane in which Sir Frederick Banting was killed. Mackie's injuries were reported to be more serious than at first believed; as he is suffering from infection of a scalp wound.

Flight-Lieut. Wilson presided in Kitchener before joining the R.C.A.F. and was a medical officer at the St. Thomas R.C.A.F. station before being sent to Newfoundland.

The best remedies available for foxes for round worms consist of oil of chenopodium in combination with Oil of turpentine and Santonin, and for hookworm, tetrachloroethylene in combination with Oil of chenopodium. These, of course, must be carefully prepared for use as they are powerful drugs and cannot be used indiscriminately. Use of a laxative following the giving of the purgative would seem imperative to remove the waste matter caused by the action of the vermicide.
