

What Some Nova Scotia Bakers Say about the success they have had with Royal Household Flour

The largest bakers in Eastern Canada, Moirs, Limited, Halifax, say:

In answer to your inquiry as to whether we could suggest any change that would be an improvement to "Royal Household" we emphatically answer "no." The great satisfaction we have had with your "Royal Household" this last nine months, using over 5,000 barrels in that time, has been an extreme pleasure to us. We are using this flour mostly for Bread, also using nothing else for our pastry, for which we have a very large sale.

(Signed) **MOIRS, LIMITED,**
Halifax, Sept. 2.

The oldest bakers in Dartmouth, say:

"Royal Household" flour is as near to perfection in the results obtained as it is possible for any flour to be. In the history of our baking business, now established for half a century, we have never had anything to equal it.

(Signed) **JOSEPH H. GENTLES,**
Dartmouth, N. S., Sept. 15th, 1904.

The leading Baker in Annapolis says:

This is to certify that I have used considerable quantities of "Royal Household" flour during the present year, and find it to be a good article, indeed, suitable for family purpose in all the requirements of bread, biscuit and pastry. I regard it as equal to any flour on the market. It is the best hard wheat flour for pastry that I have ever used.

(Signed) **R. P. SAUNDERS,**
Annapolis, N. S., Sept 12, 1904.

Eastern Steamship Co.

(INTERNATIONAL DIVISION)

AUTUMN EXCURSIONS.
Effective until October 14th, 1904.
71 days good to return 30 days from date of issue.
St. John to Portland and return \$5.50
St. John to Boston and return \$6.00
Steamers leave St. John at 8 a. m. Mondays, Wednesdays and Fridays for Lubec, Eastport, Portland and Return.
RETURNING
From Boston at 9 a. m. Mondays, Wednesdays and Fridays via Portland, Eastport, Lubec, and St. John arriving at St. John on evenings previous to sailing on direct to St. John and take this berth at station for the trip. All cargo, excellent stock, via steamers of this company. Insured against fire and war risks.
W. G. LEE, Agent, St. John, N. B.
G. L. BULLOCK, V. F. and Gen'l. Manager, Foster's Wharf, Boston, Mass.

NEW CAB SERVICE

I have decided to begin in the city and suburbs an up-to-date cab service. Passengers, baggage etc. will be conveyed to boats, trains or anywhere else desired. Orders left at McDonald & McKinnon's Drug Store or at the stables, Sydney Street, near Brownson's Corner will receive prompt attention.

THE HEAVENS IN OCTOBER

BY PROF. ERIC DOOLITTLE
ASTRONOMER UNIVERSITY OF PENNSYLVANIA.

The Southern Constellations, the Pleiades, Variable Stars, Temperature of the Sun and all about the Sun Spots.

MAP OF THE OCTOBER HEAVENS.
(Hold Back of Map to the Sky.)

The slow, onward march of the constellations is gradually changing the appearance of the evening sky. The summer constellation of the Orion which was so striking to us a month ago, has now approached so near the sun that it is no longer visible, while the bright group of stars known as Sagittarius, or the Archer, is low down, almost setting in the west.

Immeasurably old 'immeasurably' far, surging forth its silver flame through eternity. Al yone." Half a century ago the sun was advanced that this star is at the center of gravity of the whole universe; that it is an immense central sun about which all the other stars, including our own, are slowly turning. This theory was never widely adopted, and it is not held now.

THE PLEIADES.
Exactly in the east, a short distance up from the ground, will be seen a little group of seven stars, which is one of the most noted objects in the poetry and mythology of the heavens. This is the Pleiades, or seven sisters, a little group whose outline is not unlike that of the great dipper, and which is therefore sometimes incorrectly mistaken for the little dipper.

FIG. 1.
GENERAL TELESCOPIC APPEARANCE OF THE SUN.

Each star of the little dipper is named: the one at the end of the handle is Alpha, the next Alcyone, etc. Alcyone is the brightest star of the group. "The great and burning star," first appear above the horizon in the east, as they are doing now, and continuing until when, in the spring, the group becomes lost in the rays of the sun. The cluster is mentioned in Chinese annals of 237 B. C., and the query in Job, chapter 38, verse 31 (Revised version), "Canst thou bind the cluster of the Pleiades or loose the bands of Orion?" is familiar to nearly every one.

Variable Stars.
Stretching out along the ground in the southeast is the long, faint constellation of Cetus, or the whale, within which will be found a remarkable variable star as Mira or the wonderful star which is so closely watched its brightness is seen to vary in a striking manner. Through usually too faint to be seen without a telescope at definite intervals, it begins to grow very rapidly brighter and brighter until, after about seven weeks, it becomes one of the brightest stars of the sky. It remains brilliant for a week or ten days, and then for about three months fades gradually away until it is again as faint as at first. Ever since its discovery in 1596, this regular fluctuation of its light has been repeated at intervals of about 332 days.

An even more remarkable variable is Algol, the Demon Star, of the constellation Perseus. This star, instead of growing brighter, suddenly grows fainter losing about five-sixths of its light in four and one-half hours. It remains thus very faint for about twenty minutes, and then gradually regains its light, the recovery to its original brightness occupying about three and one-half hours. The interval between the successive observations of the star is two days, twenty hours and forty minutes. On about twenty such stars are known.

The Sun.
Our sun is simply a star which appears so large and bright to us only because it is almost incomparably nearer than any of the other stars. It is also a slightly extent variable star. The spots which appear on its surface are in the great numbers at a quite regular interval of

FIG. 2.
SOLAR SPOT BY FANGLEY.

about eleven years; when the spots are most numerous the light and heat emitted by the sun are slightly less than when the spots are fewer.

ceivably violent agitation; the intensely heated matter of the interior is continually forcing its way outward to the surface from where, a bit becomes cooler, it falls toward the centre again.

Fig. 1 shows the sun as it appears in the telescope when the spots are most numerous. They appear black only because they are surrounded by the intensely brilliant solar surface; it has been shown that even the blackest part of a spot is brighter than the surface of white hot steel as it is poured from a Bessemer converter.

Fig. 2 shows a single spot enlarged. The immense size of these objects can be realized when it is stated that from five to ten of our earths could be placed side by side in the larger ones. The number of spots now visible is increasing, and the maximum will probably occur during the coming year.

THE PLANETS.
Jupiter, the brilliant evening star, is excellently placed for observation during this month. On October 2 it was at A. and on November 1, at B. The positions of Saturn and Uranus are also shown on the map. The other planets are not yet in a favorable position for observation in the early evening.

New Vigor For the Nerves.
NEW POWER AND STRENGTH FOR EVERY ORGAN OF THE BODY IN THE USE OF
Dr. Chase's Nerve Food.

Good digestion, ruddy complexion, splendid circulation, clear brain, steady nerves, sound, restful sleep, better health and greater strength of mind and body is what you may expect from the use of Dr. Chase's Nerve Food.
Not in any mysterious way but from the hard fact that Dr. Chase's Nerve Food is composed of the elements of nature which go to form new, red corpuscles in the blood, or, in other words, make the blood rich in the nutritive principle which creates nerve force—the power which runs the machinery of the body.
WITH THE VITALITY OF THE BODY THUS BROUGHT TO HIGH WATER MARK WEAKNESS AND DISEASE GIVE PLACE TO HEALTH AND HAPPINESS.
Impaired digestion, irregular action of the feminine organism, weakness of heart, lungs or other bodily organs, pains and aches and all the annoying consequences of weak nerves and blood disappear because the cause of their existence is removed.
By noting your increase in weight you can prove that new, firm flesh and tissue are being added by this great restorative.
Mrs. H. A. LOYNE, Nurse, Philadelphia, Pa., writes:—"I was all run-down and could not do my own work. Everything I ate made me sick. In nursing others I had seen the good results of Dr. Chase's Nerve Food and resolved to try it. As a result of this treatment I have gained ten pounds, do my own work alone and feel like an entirely different person. I have received so much benefit from this medicine that I am glad to recommend it to others. I have a copy of Dr. Chase's Receipt Book and would not part with it for \$50 if I could not get another."
That the extraordinary upbuilding power of Dr. Chase's Nerve Food, is sent in a box, at all dealers, or Edmanson, Bates & Co., Toronto. The portrait and signature of Dr. A. W. Chase, the author of the receipt book, are on every box.
