Canadian Troops To March in London

LONDON, April 10.—Canadians are now erecting new quarters. The giant flagstaff, weighs eighteen tons and it is 215 feet long. It was presented by British Columbia. Its first flag will probably be flown at the Peace Celebration. The Canadian authorities here have decided that it will be possible for the Canadian contingent to take part in the proposed march of the overseas troops throughout London without delaying any troops awaiting demobilization. According to Sir Edward Kemp, Overseas Minister, has consented and details will be given later. The march will take place a month hence.

The Fur Market

NEW YORK, April 11.—For the third time in five days, the sales of the fur auction sales at the Masonic Temple here reached \$1,000,000 today, bringing the grand total to \$4,250,000. The sale will conclude tomorrow, and if the price levels reached so far are maintained the final figures will be close to \$50,000,000. This will be the largest amount ever realized at a spring trade sale of raw furs in this city.

Mink and skunk shared the honors of the day, bidding for the former was especially active and the best skins bid at \$15.30. The principal buyers were dealers who are believed to be preparing for a resumption of business with European countries after the signing of the peace treaty. The best skins brought \$8 each. Compared with the February sale here the percentage advances shown by the average prices paid for the furs sold today, Northern Mink, 35; Southwestern Mink, 30; Kolinsky, 20; Badger, 30; Marmot, 0; Civet Cat, 10; Flying Squirrel, 10; Japanese Marten, 35; Japanese Fox, 10; and Skunk, 0.

ST. LOUIS, April 10.—Receipts here the past week have declined considerably and the close of the season is almost at hand. This year, as in the past at this time, the season for the South has really ended. In former years during the month of April good sized quantities of Northern furs have come to market, but this year receipts from that section are quite limited; and the season for all districts is expected to come to a final close much sooner than expected.

The market continues firm on practically everything, with an upward tendency on Northern furs. Staples are selling very well. Ringtails are in excellent demand and are selling at record prices. Good quality Wolves are very much wanted. Red Fox, Marten, Fisher, Sable, good quality Mink and all fancy goods are even in stronger demand than last week. In fact all furs suitable for summer wear (holdings of which are smaller than in previous years at this time) are being taken at unusually good prices. As the scarcity of this class of merchandise becomes more evident each day, the future is very promising for advances over the present basis of values.

Because of high prices and shortage of some American furs, the trade has turned its attention in a good degree to foreign goods, and this has accordingly stimulated prices for them. In fact it looks as though the whole trade expects to continue to pay high prices for furs in general, realizing that the demand and conditions fully warrant the present high level of values with the probability of advances in some lines.

NEW YORK, April 10.—The New York Fur Sales Corporation announces the following changes in prices at its sale held this day as compared with the January 1919 sale.
Beaver 10 per cent Higher
Fisher 60 per cent Higher
Russian Sable 30 per cent Higher
Blue Fox 25 per cent Higher
Wolverine No change
The sale will be continued Tuesday April 8 at 10 o'clock a.m. with the balance of the offering of Silver Fox beginning with lot number 7107.

Lloyd George's Election Pledges

(Special to The Guardian.)
LONDON, April 10.—Premier Lloyd George has addressed a message to the members of parliament saying, "My colleagues and I mean to stand faithfully by all the pledges which we gave our constituents. We are prepared at any moment to submit to the judgment of parliament and if necessary of the country our efforts loyally to redeem our promises."

The Premier's message was in reply to a telegram sent to Mr. Lloyd George yesterday signed by 200 members of the House of Commons holding the Premier to his election pledges to exact the utmost indemnity from Germany. The movement was initiated by a group of Conservative members under the belief that it would strengthen the Premier's hand at the Conference.

Diplomas And Medals For First Aid

An interesting event took place yesterday afternoon at the Railway Station Hall at Charlottetown, when Messrs. E. E. Stevens and P. P. Beglin, Chief Instructors on First Aid, presented the employees in First Aid Classes with their diplomas and medals.

Five of the class had the honor of receiving gold medals, namely:—Messrs. S. F. Hodgson, Herbert Vandierstine, Bert Newsome, R. Meikle and Clever McLean, for having passed their third year course on First Aid. These medals are the first to be presented in the Province, and the above men are to be congratulated on their success. The following received diplomas:—Messrs. O. N. Baird, Eli McLean, F. Hale, J. P. Martin, James Lappin, W. Carmody, H. Strickland, R. McDonald, Frank Duffy, Louis Carleton, George Chandler, Eugene Kelly, Geo Douglas, John Parkman, Gus Gallant, D. Gillis, Peter Craig, E. Foster, Charles Hines, W. Power, John Currie, Frank Nicholson.

FOUGHT AS BOER WITH GERMANY.

LONDON, April 7.—According to the newspapers, General Ironside, now commanding in North Russian, passed as a Boer during the German Herrer campaign, and was in charge of native convoys, which attacked German forces. His object was to study German methods of fighting in Africa. He was never suspected as he speaks Dutch fluently.

When General Ironside was leaving at the end of the campaign he had a dispute concerning certain payments due him. After one Prussian officer had blustered loudly, another struck General Ironside across the face with his whip. The general controlled himself with a supreme effort because he had complete maps and notes about the whole campaign stitched inside his tunic.

GROWING OATS IN P. E. ISLAND

Prince Edward Island is well adapted for the production of oats of high quality. The moist climatic conditions, the fertile soil, and the freedom from summer and early fall frosts form a combination that produces big yields of large plump oats which are strong in vitality. When along with these qualities, there is purity of variety and freedom from weed seeds, we have oats that for seed purposes cannot be surpassed anywhere in Canada. The seed market recognizes this fact and is willing to pay a substantial premium for all oats suitable for seed purposes that we produce. In fact this province has never yet been able to meet the demand for high class seed oats.

In spite of the fact that nearly six millions bushels of oats are grown every year, only a very small proportion of this measures up to the standard required in pure seed grain. Mixtures of other varieties and other kinds of grain and the presence of weed seeds—such as wild vetches—spoil large quantities of oats for seed. The final purchaser insists on purity of variety and freedom from weed seeds and is willing to pay a good price for it if it can be secured. The farmer who caters to this special seed market will be well repaid for his efforts. In fact the progressive farmer in this province today cannot afford to grow feed oats for market in competition with western Canada. The seed trade is open to us, it offers us larger prices, we can produce the quality it requires, why should we not make a determined effort to supply it.

Purity of variety and freedom from weed seeds can best be secured and guaranteed by the system of selection and inspection followed in the Canadian Seed Growers' Association. An operating member of the Association each year selects by hand a sufficient number of heads to sow at least a quarter of an acre the following season; the product of this hand selected seed

NOBBY TREAD

The King of the Road
A DOMINION TIRE

"NOBBY TREAD" is a universal favorite. It is equally popular with owners of limousines and big touring cars and those who drive the less expensive cars.

"NOBBY TREAD" TIRES are practically puncture-proof. But the big nobs do not account for all of this popularity.

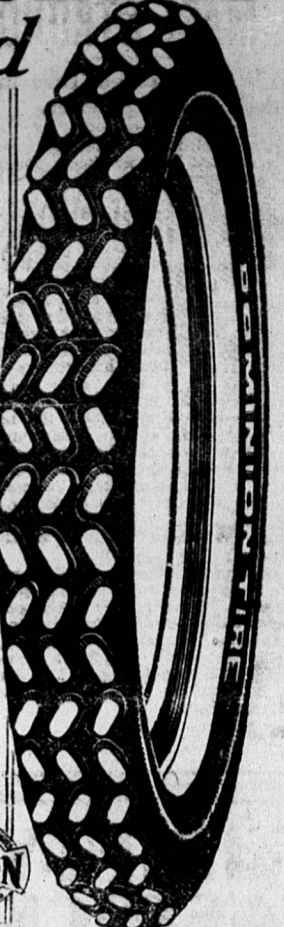

It is the marvellous workmanship—the superb materials—the creative genius of construction—that make "NOBBY TREADS" almost immune from blow-outs and road-cutting.

When you consider their greater mileage, their wonderful durability and their freedom from ordinary tire troubles, their greater ease and comfort in driving, "NOBBY TREADS" are the most economical tires you can put on your car.

DOMINION TIRES
ARE GOOD TIRES

DOMINION TIRES AND ACCESSORIES are distributed through **DOMINION RUBBER SYSTEM BRANCHES** and sold by the Best Dealers throughout Canada.

DOMINION INNER TUBES

They cost no more than ordinary tubes.

plot is called Elite Stock seed. This Elite Stock seed is then multiplied and may be registered for three generations, the product in the first, second and third year being termed first generation, second generation and third generation seed respectively. The grain is inspected in the field before cutting and in the stack after it is cleaned and graded. A high standard is set and if the grain comes up to this standard, the sacks containing it are sealed by the inspector. By this method a variety is kept pure, true to type and up to the standard, and the quality of the seed is guaranteed to the purchaser by the seal of the Association.

In order to meet the demand for registered seed, a change in the regulations was made at the last annual meeting which permits the Association to register the immediate progeny of first or second generation registered

seed, no matter by whom grown, providing the growing crop has been inspected properly, and seed harvested is up to the standards of purity, generation and quality set by the Association. Under similar conditions the immediate progeny of registered seed produced by recognized experts located at Experimental Stations or elsewhere may also be registered.

This change that has been made makes it possible for any farmer to undertake the production of registered seed by securing a supply of first or second generation seed from an operating member. Those men who are favorably situated as regards shipping and other facilities would be well advised to make it a rule to sow registered seed as often as practical, at least on fields that are likely to produce seed that will come up to the standard. By so doing they will place themselves in a position to realize

larger yields and to secure higher prices for any surplus seed they may have to sell. Information regarding supplies of first or second generation seed can be secured from the Department of agriculture at Charlottetown or Summerside, or from the secretary of the association.—L. H. Newman, Ottawa.

An Irishman presented himself before a magistrate to seek advice. "Sor," he said, "I kapes hens in my cellar, but th' wather pipes is bust an' me hens is all drowned."
"Sorry I can't do anything for you," said the magistrate; "you had better apply to the water company."
A few days later Pat again appeared.
"Well, what now? What did the water company tell you?" queried the magistrate.
"They told me, yer honor," was the reply, "to keep ducks."
