

Let the Thermometer Look After It

There would be far less colds if houses were not kept too warm. It is merely a matter of habit. 66 to 68 degrees is warm enough— we often have it 80 degrees. Get a thermometer and go by that. It will save in fuel the cost of a dozen thermometers every year, and may save you some colds and doctor bills. Better have a thermometer inside and outside the house. Cost but little, we have them from

DEATHS

McCABE. - At Stanhope, Jan. 26, 1916, John McCabe aged 102 years. Funeral on Friday morning from his late residence at 8.30 o'clock.

THE AEROPLANE ATTACK ON DUNKIRK.

NEW YORK, January 25.—A news agency dispatch from London today says:

"Two German aeroplanes bombarded the French seaport town of Dunkirk at six o'clock this morning, the admiral's flagship was shot down by a British bomber at Neuport, several miles from Dunkirk on the sea coast.

"Three air raids by Germans on the Kent coast in two days has stimulated the feeling of uneasiness regarding German aeroplanes for London. The occasional dash of bomb-throwing aeroplanes over Dover is believed to presage a more ambitious attack soon as the weather permits."

PEACE CONFERENCE SOON TO BEGIN WORK.

STOCKHOLM, Jan. 25.—Preparatory to the arrival here to-day of the Ford peace expedition, thirty-four rooms at the Grand Hotel have been reserved. The peace conference is expected to begin work in a fortnight. According to Mayor Lindhagen, five nations will be represented in the conference—Holland, Denmark, Norway, Sweden, U.S., Switzerland, Spain and Portugal have not replied to invitations to send delegates. Mayor Lindhagen gave no intimation of the manner in which the conference will proceed, or the manner in which it will try to reach its object of bringing about peace. The newspapers here give very little space to the movements of the peace advocates.

P. E. Island Pharmaceutical Association Examinations

The Board of examiners of the P. E. Island Pharmaceutical Association, will meet for the purpose of examining candidates offering for registration on Jan. 31st, nineteen hundred and sixteen. Every candidate for examination shall satisfy the council that he had served as assistant in a drug store, for not less than four years and at least two of these years has been employed in the dispensing of prescriptions. Candidates must give notice to the Secretary-Registrar in writing of their intention to present themselves for examination, on or before Jan. 28th, 1916 for the examination. Such notice must be accompanied by certificates to the satisfaction of the council that the candidate possesses the qualifications above prescribed. Any person entering his name and not presenting himself at the time and place fixed for the examination, shall forfeit his fee to the Association, (Sgd.) W. J. BROWN, Sec'y. Registrar. 7046-1-27M21.

Farm For Sale

Dominion of Canada, Province of Prince Edward Island

IN THE SURROGATE COURT

6th George V. A. D. 1916 IN RE ESTATE OF MARGARET HENRY late of Haverhill, Massachusetts, United States but formerly of Mount Herbert in Queens County in the said Province, Widow, deceased. Intestate BY THE HONOURABLE RICHARD REDDIN, SURROGATE JUDGE OF PROBATE, & C. & C. TO THE SHERIFF OF THE COUNTY OF QUEENS COUNTY or any Constable or literate person within said County

WHEREAS upon reading the petition on file of Job Weatherbie of Pownal in said Province, Carpenter, one of the administrators of the said estate praying that a citation may be issued for the purpose hereinafter set forth: You are therefore hereby required to cite all persons interested in the said estate to be and appear before me at a Surrogate Court to be held in the Court House in Charlottetown, in Queen's County, in the said Province, on Tuesday the twenty second day of February next, coming, at the hour of twelve o'clock noon of the same day to show cause if any they can why the accounts of the said estate should not be passed and the estate closed as prayed for in said petition and on motion of Donald McKinnon, Esquire, Proctor for said Petitioner, AND I DO HEREBY ORDER that a true copy hereof be forthwith published in some newspaper published in Charlottetown in said Province once in each week for at least four consecutive weeks from the date hereof and that a true copy hereof be forthwith posted in the following public places respectively, namely, in the hall of the Court House in Charlottetown aforesaid and in front of the Schoolhouses at Pownal aforesaid and at Mount Herbert in said Province and also let a true copy hereof be served on Jonathan Weatherbie of Boston United States the other administrator of the said estate and such service on him shall be made by registering a copy of this citation to his address at the place of residence at Boston and his Postmaster's receipt of the delivery to him shall be sufficient proof of such delivery to the addressee so that all persons interested in the said estate as aforesaid may have due notice thereof.

GIVEN UNDER MY HAND and the Seal of the said (L. S.) Court this sixth day of January A. D. 1916 and in the sixth year of His Majesty's reign. R. REDDIN, Sur. J. & C. 6547-1-13Mth 3 wks.

YES—IT IS POSSIBLE TO STOP RHEUMATISM

Rheumatism is a tormenting and stubborn malady. In some cases it yields to treatment which is without avail in other cases.

The darting pains, lame muscles or stiffened joints only disappear by gradually expelling the uric acid, and so many thousands have been relieved by the blood-enriching oil-food in Scott's Emulsion that you should give it a faithful trial. Scott's Emulsion acts as a powerful blood-purifier by increasing the red corpuscles and it strengthens the organs to carry off the acids which cause the trouble.

Try Scott's Emulsion. It cannot harm. It has helped thousands and may exactly what you need. No drugs. Scott & Bowne, Toronto, Ont. 15-29

serve your country at the front, that you will follow duty bravely.

We think of you as our representative and join with your parents, who have made this so great a sacrifice in wishing you true success and personal safety from every threatening danger.

Accept this brief word of our appreciation and the gift that accompanies it in token of our esteem for our soldier boy.

On behalf of the assembled company, signed by: Birchfield Yeo, Robert Yeo, P. H. Lyle, Frank Yeo, Judson Simpson, Alfred Simpson, L. E. Ackland.

WITH CANADIANS AT THE FRONT

LONDON, Jan. 25.—These things happen often and it must be remembered we do twice as much such straining as the Huns now. We have artillery, quantity and quality. Two battalions coming into the trenches to relieve the division troops suddenly got caught in a terrific shell fire from German battle-towers which had the roads well marked—too well marked. In fact, but we got out of it in fine style with only thirty casualties. The Brigadier saved the battalion by ordering them to remain just where they were, and the German shells, beautifully timed slaughtered the enemy macadam roads at points where the battalion would have been hit by the enemy's machine guns. How the Germans knew the time the battalions would be relieving is another story.

Another incident which rarely happens in Dominion troops was the "cabinets" which in England means carrying, one of our listening posts. The day previous to this one of our privates who seemingly was listening to the mad, made a sudden dash out into the open and with bayonets at the charge, scrambled through the enemy's barbed wire, and though shot at many times, entered the enemy trench. One of his particular chums was among those captured in the listening patrol. We took full toll next evening and grabbed eight Germans.

Lieut. Neil MacDonald, "foghorn," has returned to London with a cross between a private and an officer's uniform, from France on leave. He "had been too busy to get an officer's uniform," he told the provost marshal who questioned him. He had been blowing up the Huns instead of the tailors. The military authorities had been doing really splendid work, just turned in his military uniform, and exploits are to his credit. He has become a fatalist and tells his friends, "this is my last leave, boys, I'm going to get blown up myself when I get back." He has a great grievance against the military authorities because as a private he has had to wear a rifle and full equipment.

The German front line trenches are thinly held just now, and frequently our listening patrols enter the enemy works without encountering a single Hun. There is plenty of barbed wire and steel entrenchments behind these lines, though, our artillery is gradually crumbling it.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rumbling sound or imperfect hearing, and when it is entirely closed, you have complete deafness. The inflammation can be reduced and the tube restored to its normal condition, hearing will be destroyed forever. In any case of deafness caused by catarrhal deafness, Hall's Catarrh Cure acts through the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All drug lists, 75c. F. J. CHENEY & CO., Toledo, O.

GUARDIAN CLASSIFIED ADS.

One cent per word first insertion in this column, half-cent per word each continuation. Cash must accompany order. Minimum charge Twenty-five cents.

LATEST FROM THEATRES

MARIE TEMPEST AT B. F. KEITH'S BOSTON THEATRE

Marie Tempest, the celebrated comedy star and prima donna, who last appeared in Boston in "The Duke of Killarney," will be the headliner at B. F. Keith's Theatre the week of January 31st, 1916, in a repertoire of songs. Assisting Miss Tempest at the piano will be—Melville Ellis, direct from his long run with the Ziegfeld Midnight Frolic atop the New Amsterdam roof in New York. Miss Tempest is one of the most brilliant stars booked for B. F. Keith's Circuit this season, and this is her maiden appearance in vaudeville. Her engagement is positively limited to one week only. Mr. and Mrs. Jimmie Barry, the comedy sketch, "The Rubie," will be a big comedy feature of the bill. Mr. Barry's interpretation of the role of a rube on his first visit to the city, who makes love and incidentally fools an actress in the big town, is one of the best character creations in vaudeville. Other big features of the bill for that week, supplementing Miss Tempest, will be Max Gruber's Animals, with a huge elephant, a beautiful horse, and a clever little pony; Moon and Morris, the great eccentric dancers from the New York Winter Garden; Charlie Olcott, with his one-man vaudeville production of a comic opera show; Morrissey and Hackett, the moving picture favorites; Julia Blanc and company in a new comedy sketch; the Six American dancers, in a sycere of dance decades; and the Gladiators wonderful strong men de luxe.

Headaches, sleeplessness and tired, draggy feelings soon disappear when you restore vigor to the exhausted nerves by using Dr. Chase's Nerve Food. 50 cents a box, all dealers or Edmondson, Bates & Co., Limited, Toronto.

monia unless he is infected with the microbe of pneumonia; but that, unfortunately, is always at hand, ready to perform its part. Perfectly well people are able to resist it, and the best weapon against pneumonia is a good physical condition. All disease germs are cowards, and hesitate to attack a system that is prepared to offer stout resistance, but at the least weakening of our defences, they are up and at us in one form or another. The pneumonia germ is a very formidable enemy; it may be called the big siege gun of infectious disease.

We must be careful to avoid exposure to cold and wet. Cold, wet feet and damp skirts or trousers are the eager allies of pneumonia, and so are long, cold rides in a sharp, driving wind. That does not mean that we must shrink from going outdoors in the cold season, for winter air is an excellent tonic if we are properly dressed to face it. But wet feet are never unavoidable as long as rubbers are cheap, and young women who go about in rain and snow in thin silk stockings and pumps must blame themselves for any illness they may contract by such carelessness. Other things that predispose to pneumonia are excessive or improper food, stuffy bedrooms, fatigue, whether from work or from pleasure, and, in short, everything that tends to lower the body's power of resistance.

BASIC SLAG

(Sometimes known as Thomas Phosphate Powder)

The two sources of Phosphoric Acid, the element of fertility lacking to the greatest extent in the cultivated soils of the Maritime Provinces, are Basic Slag and Acid Phosphate, or Superphosphate. These two Fertilizers both contain from 250 to 300 lbs. of available Phosphoric Acid to the ton.

BASIC SLAG

Contains in addition to the Phosphoric Acid from 800 to 1000 lbs. of Lime. In the form in which this Lime exists it does not burn up the humus in the soil like burnt Lime. It is calculated that 95 p.c. of the soils of the Maritime Provinces are sour and the effect of an application of Basic Slag is to correct this acidity.

BASIC SLAG

In addition to the Phosphoric Acid and Lime contained in Basic Slag there is also present a quantity of iron, the effect of which is to aid bacterial growth in the soil, a matter of the highest importance.

BASIC SLAG

Also supplies magnesia and manganese, which in conjunction with the other elements present, especially Lime, will prove a great aid to the farmer in rendering available the crude potash contained in the soil and making him independent of potash which in former times was supplied at enormous cost from Germany.

BASIC SLAG

Is the only phosphatic fertilizer in which all these valuable elements are combined. Do not overlook the fact that when you buy a ton of Basic Slag you get as much available Phosphoric Acid to the ton as in any other fertilizer and in addition you have the benefits of the other elements referred to herein.

Prof. Cumming of the Agricultural College, Truro

In the annual report of the Dept. of Agriculture for Nova Scotia, for year 1914, writes, referring to their experiments in connection with commercial fertilizers as follows: "In our experience with roots the best results were obtained from Phosphoric Acid, either in the form of Acid Phosphate, or Sydney Basic Slag. The addition of Muriate of Potash did not materially increase the yield. The heaviest yields of mangels were in the plots treated with Slag instead of Acid Phosphate. In the turnip fields Basic Slag gave better results than Acid Phosphate. Where potash was used on this land there was no advantage"
