AUGUST CROP AND LIVE STOCK BULLETIN

The following is the report on the state of the crops and the conditions of the live stock in Prince Edward Island, as of the date of August 10, 1915.

CROP CONDITIONS.

Hay.—The hay crop is about average in King's County, it is particularly good, being much larger than for some years, while in Prince County it is not as good as usual.

Wheat.—The prospect for a better than average wheat crop is good.

Oats.—The oat crop will be considerably below average. In Prince County particularly it was damaged by the excessive rainfall and in many cases seeding was very late.

Barley.—Barley is making its way slowly as a popular field crop. It is generally sown with oats for mixed feed or on lower lying lands where seeding is delayed through excess of moisture.

er last autumn led many to go out of them altogether, and the wet spring was very unfavorable to Turkey Raising. The number this year will be considerably short of previous years.

Peas.—Peas are grown almost altogether with oats, either for summer feed, or to be made up like hay for winter feed for cattle.

Corn.—The season was altogether too cold for corn and less than usual was planted. Several correspondents report it being pulled up by crows.

Potatoes.—The majority of correspondents report misses in the potato crop. Nearly all attribute it to the cold, wet weather, but a few state that it was caused by heated seed.

Roots.—The root crop is a little backward, but there is every prospect of it being much above the average.

Apples.—The apple crop will be about half an average. The blossoms were injured by late frosts and the cold rainy weather interfered with pollination.

Plums.—The prospect for the plum is not even as good as for the apple crop. There was an abundance of blossoms, but they failed to set.

Strawberries.—The crop of strawberries has been below average. In many sections the plants were killed out and although there was plenty of moisture the weather was too cold to secure the largest returns from those that survived.

Bush Fruits.—Gooseberries and currants are both as good as for the usual crop. Raspberries are, however, quite plentiful and of excellent quality.

Weeds.—The cold, damp season has favored the growth of weeds, which are becoming very plentiful in many parts of the province.

Live Stock Conditions.—Live Stock conditions throughout the province are improving very rapidly. During the past two years the Live Stock Branch of the Federal Department of Agriculture have distributed to Live Stock Associations the following pure-bred males: 4 Clydesdale stallions, 11 Ayrshire bulls, 85 rams, 21 Short-horn bulls, 2 Friesian bulls, 7 boars.

Horses.—There is an abundance of horses in the province at the present time, but the demand is limited. Prices are lower than last year, ranging from \$125 to \$200.

Milk Cows.—The demand for good milk cows exceeds the supply and inquiries are already being made for cows to freshen in the autumn.

Other Cattle.—The demand for beef cattle is increasing. Pure-bred Short-horns are particularly high in price and any offered for sale are quickly picked up at prices ranging from \$100 to \$150.

Sheep.—Reports indicate that the usual number of sheep is about being maintained. The price of wool is very high, as is also the price of lambs.

Pigs.—Correspondents report a decrease of about 4 per cent in the number of pigs. The number of litters seems to be about the same as last year, but in some cases the litters are small, and in others the number of piglets is large.

Hens.—Almost every district reports an increase in the number of hens kept. The Egg Circle Movement has drawn definite attention to the value of the hen on the farm, and, as a result, more hens are being kept and attention is being given to breeding, feeding and general care.

Geese and Turkeys.—Only a few farmers pay any attention to geese and turkeys, the low price of the former last autumn led many to go out of them altogether, and the wet spring was very unfavorable to Turkey Raising.

siderable increase, which will about make up for the decrease in King's. This does not mean a decrease in the total milk production, but, rather a decrease in the number of patrons to factories and creameries, due to some factories being closed.

Egg Supply.—Egg production continues to increase, although prices are not quite as good as last year. The Co-operative Egg and Poultry Association has handled at its candling station in Charlottetown upwards of \$25,000 dozens since April 20th, 1915.

Milk Supply.—On the whole, the milk supply received at the factories and creameries this year up to the present time, is about equal to that of last. In Prince County there is a considerable increase, which will about make up for the decrease in King's.

Montague Horse Races Wednesday, September 1st, 1915.

There will be a liberal purse given to 3 year old race, providing there is sufficient entries to fill class. Special train will run from Charlottetown at reduced low rates.

By Order of Committee, ALFRED WELSLIE, Secy.

WHY do you WANT BEAVER FLOUR

Because you consider it the best on the market. Because you know it is always reliable and uniform in quality. Because quality considered it as cheap or cheaper than less well known brands.

Because it is a universal flour suitable for either bread or pastry. Then why not specify

Beaver Flour in your next order and insist on getting it HERE where it is always in stock.

Poole & Thompson Ltd.
