NOTRE DAME HONOR ROLL

The following pupils have secured an average of 75% and over for the month of April: Commercial Standing: Marjorie Kelly, Madeleine Arsenault, Aileen Burns, Ghislaine Payer, Emily Kelly, Jean Stewart, Kathleen Kelly, Peggy Palmer, Jean Ledwell. Grade Ten: Helen Malone, Claire Griffith, Marion Mitchell, Zeta Schlayer. Grade Nine: Joan Gillis, Frances Coyle. Grade Eight: Eileen Landrigan, Claire Macdonald, Barbara Coyle. Grade Seven: Norman Noonan, Francis Johnson, Joan Weir, Mary Sigsworth. Grade Six: Mary Gillis, Mona Thom, Gwen Collins. Grade Five: Mary McWade, Kathleen Noonan, Mary Carroll, Betty Ann Siroit, Elaine MacDonald, Shirley Williams. Grade Four: Leonie Macdonald, Florence Peters, Anna Garvin, Ruth Cogan, Ruby Pouton, Patricia Soper, Yessie McAulay, Margaret Donoite. Grade Three: Mary O'Reghan, Janet McCallum, Doris Walsh, Lorna Noonan, Marjorie Ene Murphy, Anita Dillon, Maureen Blake, Janet MacDonald, Sheila Praught. Grade Two: Mary F. McNeill, Mary T. Lafferty, Joan Cronin, Myra Murphy, Florence Callaghan, Marion Hayes and Janet Soper (equal), Catherine Smith. Grade One: Betty Smith, Nancy Mullin, Donald Steele, Darlene Gurney, Wilma Doyle, Mary Leah Doyle, Damien Leitch, Patricia Cumiskey, Joan Beaton, Mary Farmer, Shirley Dillon and Bertina McGregor (equal), Joan Hennessey, Myra Praught and Ian Gillis (equal), Adele Kaye, Norbert Callaghan, Ian MacDonald, Jackie Gavin, Joyce Whitlock, Billie Farmer.

TREATMENT FOR INJURED TREES

Fruit Trees, unless protected, are frequently girdled by mice and rabbits during the winter, and should be examined from time to time in the winter and spring for rodent injury. Shade and fruit trees are occasionally injured by trucks, teams or implements that knock the bark off or break the branches. When a tree is barked a protective covering should be applied at once. Grafting wax, if available, is best but any paste or mud if wrapped on with cloth and soaked with water to exclude the air, will prevent the wood from drying out and is well worth applying. Paint that is free from turpentine may be used. The sap in our trees goes up from the roots to the branches and leaves through the wood and returns through the inner bark. When a tree is girdled the wood starts healing from above, and if the girdle is small one (less than half an inch wide) and protected, it may heal. Trees badly girdled will leaf out and continue to grow through at least part of the season, but once the wood is allowed to dry out, they will die. Should the injury be noticed immediately after it has occurred and the wood protected from drying out, bridge grafting, using three or four strong, vigorous

scions of the previous year's growth may save the tree. Inset in a slanting cut the ends of each scion one end in the bark above the injured wood and the other end in the bark below the injury, thus bridging the gap and allowing the sap to flow. In this way, some trees may be saved. To be successful, the scion should be slightly longer than the distance between the cuts made for it in the bark. When sprung in place, the pressure will hold it in place. The inside bark of the scion at each end must come in contact with the inside bark of the tree trunk. It is in this inner bark or cambium layer that the union takes place. The ends of the scions and the whole wound is then protected with grafting wax and banded with sacking to exclude air. When possible, soil should be banked up past the injury. Young trees badly girdled should be replaced or cut off close to the ground and grafted to desired varieties. Such grafts grow rapidly and only require proper shaping to make good trees. Clark, Superintendent, Dominion Experimental Station, Charlottetown, P. E. I.

CAVENDISH SCHOOL

Report for April: Grade X-1. Helen Green; 2. Margaret Moore; 3. Clemmie Simpson. Grade IX-1. Ethel Moore; 2. Jennie Moore; 3. Billie Andrew. Grade VIII-1. Doris Graham; 2. Nellie Simpson. Grade VII-1. Lloyd McNeill; 2. Gordon Gillis; 3. Elva Graham. Grade VI-1. Chesley Clark; 2. John MacNeill; 3. Alley Graham. Grade III-Sr. 1. Donald Simpson. Grade III-Jr. Herbert Moore. Grade I (a). 1. Charlie Gallant; 2. Harold Simpson. Grade I (b) Vivian Simpson; 2. Preston Simpson. Highest average, Helen Green. Prize for spelling, Chesley Clark. Perfect Attendance, Margaret Moore Lloyd MacNeill, Chesley Clark. (Patrol Please Copy)

REV. THOMAS MARSHALL

The funeral service for the late Rev. Thomas Marshall, who died in Montreal last Thursday at the age of 90 was held at the Sackville cemetery on Saturday afternoon immediately following the arrival of the body on the Ocean Limited. The funeral was attended by a large number of friends from the surrounding country. The service was conducted by Dr. G. J. Trueman, President of Mount Allison University, assisted by Rev. D. M. Matheson, pastor of the Sackville United Church. The pallbearers were: Messrs. A. J. Colpitts, P. T. Tingley, C. W. Cahill, and Edward Sears of Sackville, and Arthur Trenholm and William A. Trueman, of Point de Bute. Interment was in the family lot at the Sackville cemetery where the late Mrs. Marshall (the former Anne E. Baird of Woodstock) was laid to rest a year ago last January and a daughter some years earlier. The late Rev. Mr. Marshall was one of the oldest members in the ministry of the Methodist and United Churches and had served 51 years in the ministry when he retired in 1922. During his ministry

Bristol and Vicinity

Mr. Cephus Davy, No. 1 fisherman landed a nine pound salmon along the bank of Morell river last week. Mr. Davy, who has spent years with the hook and line, wondered for sometime what he had hooked as the mighty fish tugged at the line before being landed.

Mr. Lenius Rossiter, and P. F. Alward, S. D. U. students motored to Morell last week with several of the teaching staff. The boys made the trip in a nineteen twenty-two car, this old model of yesterday is in perfect running order and the boys say it made all the hills in high reaching the Village one hour and twenty-eight miles in one hour and thirty one minutes. Some of the boys claim this to be the oldest car on the island but your writer is informed that Mr. Harry McEwen, of this vicinity has one 1918 model in good condition that he would like to enter in the race for ancient cars.

The Misses Margaret and Beta Cullen motored to their home in Morell, last week and are glad to report their grandfather Michael Cullen is much improved in health.

Lobster fishing got underway here on the stroke of five May 1st, but owing to stormy weather much of the gear, especially traps, are still ashore at time of writing. Bait is being trucked from western part of the Island.

Mr. Lester McVarish, arrived from Halifax last week where he was employed during the winter months as long shoreman.

Mr. James F. MacDonald, left last week for Halifax, where he expects to be employed as a carpenter.

Patrick Henneberry of the R.C.A. F. arrived home last week but only for the night as he left again next morning for his training center.

Quite a number of merry dancers danced to the music of St. Avard's Orchestra in the village hall on Friday night.

The sporting club intend running their dances weekly this season.

Friends here will learn with regret of the illness of Mrs. J. A. McDonald at Scotchfort.

Mr. Roy Cairns, has entered the City Hospital for an operation and when released from the Hospital, will enter the airforce.

Hundreds of customers of Mr. Art Malone, the popular Radio-phonist, will miss him from the route this summer as he has joined the airforce. Mr. and Mrs. Malone, moved here from the western part of the Island three years ago and since then have made scores of trips to the east coast. Mr. Malone, popular man on the road, Mr. D. O. who holds a B. A. from S.D.U. will study Radio at one of the Universities, on the mainland before going overseas.

Miss Mabel O'Brien who is at present teaching at St. Andrew's school received a wire last week to report for work with the Royal Canadian Mounted Police Headquarters at Ottawa this week. She expects to leave on Tuesday for the Capital.

Some of the byroads here are still impassable for cars and a stalled car on the Morell road is proving a hindrance to traffic.

Friends of Mrs. Walter Ackley, will regret to hear she has entered the Charlottetown hospital for treatment.

Mrs. Lem Keny and son Reggie were visitors to the City on Friday, making the trip by motor.

Mrs. Herb Hawbolt, has returned home from the City, where she was confined to her room for some time.

Mrs. Gus McDonald, spent a few days in bed in the City last week on business.

Mr. and Mrs. Gordon McEwen were visitors to the city over the weekend.

Mrs. Charles Mosher spent a few days in the city last week on business.

Motorist driving to the city last week report the road near the Cemetery at the outskirts of the city in a deplorable state, the pavement ripped up and great holes on the road.

Despite the cold weather some of the early planters have set out their gardens here.

One man was seen ploughing last Thursday but the ground looked very wet.

The Lot 40, C.N.R. depot is in a terrible state this spring, the walls are cut up and penciled over, the window in the caretaker's room broken and the door badly split. In general the station is not fit to be called a waiting room. Some seem to pride in destroying C.N.R. property.

Mr. John G. McDonald, who was employed at the Baltic, since last fall arrived home and has joined the Lobster fishers.

Mr. John Road, has also arrived from the eastern section and is employed at the factory at the village, B.

AUSSIES GROW MORE COTTON

CANBERRA—(CP)—In view of serious shipping difficulties, the Australian government now is planning for increased domestic production of cotton. Australia previously imported four million pounds of cotton and although cotton-growing acreage has doubled this year, production still is far below domestic requirements.

he served the Methodist congregation of the Chignecto Circuit at Point de Bute and many of his former parishioners paid their last respects at the graveside. Miss Helen M. Marshall, only surviving member of the family, and her nephew, R. B. Seaman, both of Montreal, accompanied the remains to Sackville. Miss Marshall taught school in Sackville a number of years ago and later trained as a nurse in the Royal Victoria Hospital, Montreal.—Sackville Tribune.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES OF CANADA

IN THE ODOUR OF SANCTITY

Scientist Twort and Baker of the Portladies Laboratories in Sussex, England, last week came out with an old fashioned way of doing which infect air—radiation; the proposed remedy is more than a small destroyer; it helps to get rid of germs.

Ordinary pungent, incense smoke, said they, kills many kinds of bacteria in three terms. To this the Lancet old-time London Medical Journal said, "It is a strange turn of the wheel which has revealed antiseptic properties in the odour of sanctity." The next best disinfectant is smouldering cardboard, damped with a two-per cent solution of potassium nitrate (saltpetre) and dried.

PHOSPHORUS FOR CANCER

Deep-seated cancers can sometimes be treated by X-ray, but the treatment may be dangerous, and a third X-ray may injure normal tissue. Recently Dr. John Meredith Kenney of the New York Memorial Hospital told assembled doctors in Cleveland that the remedy, radio-active phosphorus, is put up in liquid form and can be swallowed, in minute dose without danger. In experiments at the Memorial hospital, the doctor gave small quantities of the remedy to patients who were to be operated on—and to a few about to die. When the tumours were removed, or the patients died, the phosphorus was calculated the amount of phosphorus absorbed by the cancerous tissue. They found that the chemical settled in the tumours, barely affected normal cells. Once in the tumour, the phosphorus acts like radium, burning out the rebel cells. For bone cancers, especially, said Dr. Kenney, radio-active phosphorus "offers a real hope."

A BOLD EXCHANGE

Two sisters ran the bell of a Philadelphia doctor on a wintry day six years ago. One, 25 years old, weighed 200 pounds. The younger, 14, was slender. Both had ovarian trouble. The thin girl menstruated excessively; the fat one hardly at all. No amount of glandular therapy had helped them. The doctor decided on a bold experiment, one which had successfully been tried on animals; it consisted of an exchange of ovary tissue between the two sisters.

First he made sure that both were of the same blood grouping, so that the transplants would be well-nourished. In adjoining operating rooms of the same hospital, the doctor operated on the sister while a colleague in another room operated on the other. Snipping out 3-4ths of one ovary from each girl, the doctors placed the transplants in warm salt solution. Then they stitched the tiny grafts snug and tight to the ovary stems.

Within ten weeks the both girls were up and about. Soon their glands began to function properly for the first time. The fat girl lost almost 100 pounds; the thin girl gained on sight, 70-day they are healthy, happy and married. Two other Philadelphia surgeons have done similar operations on no less than 50 patients, with no deaths and only one partial failure. Canadian grafts, say these surgeons, should be made only when all other treatment has failed. A difficult part of the proceeding is to find the proper partners wherewith to swap ovaries. This search may take years of effort.

MARITIME MEN AND THEIR SHIPS

THE STORY OF THE "JAMES B. DUFFUS"

The barque "James B. Duffus", 672 tons, was built in Yarmouth, N.S. in 1864. On her first voyage, she lost the mate and ever after she had the reputation of being haunted.

Crews were hard to keep since, they said, a strange man walked the decks. Dishes would rattle and lights go out for no reason.

One story, typical of many, was that one stormy night in mid-Atlantic, the mate woke to find himself unaccountably in the middle of his cabin floor. Through the open door he could see the owner quietly reading his Bible. Mate and owner together searched the ship. As they reached the far side of an empty cabin, something struck the wall a terrific blow and loud laughter mocked them. The mystery of the ship was never explained and her end is not recorded.

Rosebud PIPE TOBACCO the Maritime Smoke for over two Generations

Carry-on-Canada Eastern King's

The Carry On Canada Corps, Eastern King's, has been successfully functioning during the winter months and the enthusiasm of its members is as keen and alive as ever. A great deal has been accomplished by the officers and their committees, and many generous donations have been made to most worthy causes. The Red Cross, the London Lord Mayor's Fund, Save the Children Fund, The War Services Campaign, have received contributions and from time to time these organizations may expect further assistance.

The Entertainment Committee, under the skillful management of John R. McLean, Gordon Roper and L. Wadman, has arranged a series of card games during the past winter and they have been splendidly patronized. The complete proceeds of these games and entertainments will be donated to the Canadian War Services. A feature of these card games is the drawing for a War Saving Certificate each evening at the close of the entertainment. The generosity of Mr. A. F. McQuaid in supplying a most suitable room for these pastimes, is much appreciated by the officers and members of the organization.

The members of the Corps voluntarily entered their services towards the collecting for the Canadian War Services Fund and a thorough canvass was made with most gratifying results. Mr. R. C. McLean, Chairman for Kings County, expressed his appreciation at a recent meeting of the Corps, for the splendid co-operation among the workers and for the generous response by the people in general. Another very important drive which the Corps conducted, was the selling of War Savings Certificates and the report of collections was submitted at a general meeting. This report showed that

the cash donations and pledges were most encouraging. It also showed that our people, as a whole, are determined to sacrifice in every possible way to encourage the organization and assist it in all its objectives.

This spirit is indeed gratifying to us and it must be a source of discomfort to our enemies, when they realize that the British Empire stands, voluntarily, each man, woman and child, between them and their unobtainable ambitions of domination over free peoples. A complete and detailed account of collections, receipts and expenditures will be published shortly covering the activities of the organization since its inception. We are sure that the President Mr. Holland, his officers, committees, and all the members will have reason to be proud of the accomplishments, and can have real satisfaction in the knowledge that each has done his bit to keep the home fires burning and, above all, to keep the boys "Over There" happy.

Stella Maris Altar Society Meeting

Following is the annual report of the A Star Society of Stella Maris Parish:— Madame President, Rev. Father, Officers and Members of the Altar Society. As your recording Secretary for the past year, I beg to report as follows: During the year ten meetings and four executive meetings were held. These meetings which were well attended were made very interesting by the splendid talks given us by our Pastor to whom we are deeply grateful. In September we had the privilege of witnessing the official opening of our new school. After Pontifical Mass, his excellency, the Bishop proceeded to the school, which he blessed, the afternoon being marked by the number of distinguished speakers present. May God continue to shower his blessings on us and our children.

Sometime later, the Acadian teacher, who was very well attended and some discussions took place. A special feature was a banquet given to the teachers by the ladies of the parish.

During the Summer courses in domestic science and home economics were given by the Sisters of the Congregation of Notre Dame. Since then we've had the happiness through the untiring efforts of our beloved pastor, of having our own convent and resident Sisters who continued the courses and also teach in the school.

Our convener of Social Service, Mrs. Gilbert Blaquiere, reports work carried on as usual. Twenty-one quilts were made during the winter some of these, along with other articles of clothing were given to the needy. Beside, this Christmas boxes were sent out, school children were treated with candy and prizes and other gifts were given.

Our convener of membership, Mrs. Lawrence Gauthier reports eight new members. We wish to welcome them and trust that they will fall in and help to carry on the work which would be a much greater work if all our women were enrolled.

Our finances during the year were kept up, festivals, bingo, card parties, bean suppers, lotteries, etc. The total receipts of the year amounted to \$233.05. Our treasurer, Mrs. Bertram Blaquiere, will show in her report how this was expended. To those who suffered bereavement during the year, our heartfelt sympathy is extended and we trust that God will comfort them. The thanks of the Society is extended to our Pastor, Rev. Father, McNeill for his help and encouragement at all times. Our thanks to our own resident Sisters and also the visiting Sisters for their many kindnesses also thanks to the kind Sisters of the Monastery of the Precious Blood for the courtesies extended to us during the year. Our thanks to those of our women who came very week to keep our Lord's dwelling spotless.

I think you will agree with me that this has been a successful year and with God's blessing on our work we hope to continue for His greater honour and glory. All of which is respectfully submitted (Mrs.) J. Emile Gauthier (Secretary).

The quilt donated to Stella Maris Altar Society by Mrs. M. J. Doyle and made by Mrs. Thomas Doyle who is eighty-eight years of age was lotteried on April 24th. The lucky winner was Mrs. Lea Rossald Gallant.

DeSABLE SCHOOL Report for the month of April: Grade IX-1. David H. 2. Burton. Grade VIII-1. Robert MacNeil. Grade VII-1. Carl Peterson, 2. Helen Holm. Grade IV-1. Shirley Holm. Grade III-1. Kathleen Campbell. 2. Annie Campbell, 3. Leroy Duran. Grade I-1. Victor Campbell, 2. Allison Holm. Perfect Attendance: Burton, Helen and Shirley Holm, Karen and Carl Peterson. Percentage of Attendance - 90 per cent. —Teacher: L. I. MacDonnell (Patrol Please Copy)
