RESOLINE ANTISEPTIC TABLETS

SORE THROATS AND COUGHS They combine the germicidal value of Cresoline with the soothing properties of slippery elm and licorice. Your druggist or from us, 20¢ per stamp. CASSELL'S MEDICAL CO. LIMITED, Agents, Montreal.

Sunlight at Night

You can have sunlight 24 hours in the day if you want it.

Because Acetylene gives the same kind of light as the sun.

Kerosene light, Gasoline light, Candle light, and Electric light burn either red or yellow.

Acetylene gas light is white—soft, brilliant, steady white.

Plants grow under the rays of Acetylene gas light at night, just as they do under the sun's rays by day.

Colors—even delicate shades of pink and blue—can be matched as accurately under Acetylene light as in broad daylight.

You can have "sunlight at night" for less than candles or coal-oil lamps are costing.

It costs nothing to find out about Acetylene and Calcium Carbide.

Write us for full particulars.

Deacons of neighboring churches of the same order are expected to be present. Divine worship will also take place at seven p. m. The subject of the sermon will be Jesus in the Midst. There will also be worship in the Beque Baptist Church at three p. m. At the close of both these services there will be the Communion.

Henry Mills of Kensington says the Patriot, last week shipped one car of frozen smelts from Vernon Station to New York. They were put up under Mr. Mills' own inspection, and is the first car ever shipped over the Southern Branch. They were all caught in Vernon River and valued at twelve hundred dollars. Mr. Mills has also made several other shipments from here of smaller proportions.

THE SECRET OF CRISP PASTRY. Keep three things in view, if you want unvarying success with your pastry—cold water, good shortening, and Blended Flour.

Ice water and butter are preferable, but it may be more convenient to use cold water and some other good shortening. But stick to the Blended Flour. It will never fail to give a light, flaky crust so tender it will break with a breath, and as easy to digest as the lightest pie crust.

The wholesomeness of pie crust depends on the lightness of the flour—that is the crispy flakiness that you look for in pie crust must be made of flour having a large percentage of starch. Ontario flour contains all the requisites for light pastry, cake and biscuits, while Manitoba wheat has the heavier properties required in a strictly bread flour.

Combine the two, and you will get perfect flour, that has the full rich flavor and elasticity of Ontario flour, and the strength of Manitoba spring wheat—an ideal combination.

With ordinary care in mixing and rolling the dough, Blended flour will give you the most delicious pastry you ever ate. Many millers are now blending these two grades of flour scientifically, so do not attempt to do the blending yourself—it is no easy thing to get just the right proportions.
