

Your Cold How will your cold be tonight? Worse, probably. How about tomorrow? The trouble is, colds always tend downward. Stop this downward tendency with Ayer's Cherry Pectoral. Your doctor will tell you why it can do this. Ask him all about it. Ask him if he has anything better for coughs and colds. Then follow his advice, whatever it is.

THE Eastern King's County correspondent of the Guardian writes: Recent bluster and stormy weather has interfered to some extent with the fishing on the south side where a considerable body of hake is giving remunerative employment to industrious fishermen.—Bait has been scarce, but there are now some signs of squid. The visits of the squid to local waters are irregular and uncertain. Some years they come in immense quantities in August and stay until winter; some years they come later, and some years they do not come at all. Though by no means prepossessing in appearance or refined in manners they are ideal bait for cod and hake. Dog fish the terror of our fishermen the past few seasons, are not so plentiful, though making some visits. This summer their stay was short.—Haying is generally completed and there has been a good average yield.—Misses Vesta and Ruby Stewart are home from Boston.—Mrs John a Ford, of Houlton Maine, is visiting friends at Red Point and North Lake.
