BRITAIN'S NOTICE TO GERMANY

LONDON, July 22—The Liberal papers which refer to the fact that Chancellor Lloyd George, in his address last night, read the important passages slowly and carefully from manuscript, regard his utterance as the embodiment of the cabinet's views, and it is not doubted that it was a hint to Germany with regard to Morocco.

The Times, in an editorial this morning, says that the whole country will endorse Chancellor Lloyd George's decisive and statesmanlike reference to the European situation created by the German demands, which are "nothing less than a claim for absolute European predominance."

Telephone Securities Are a most satisfactory form of investment. The Express Company, the freight carrier, the post office, the telegraph and the telephone all have their part to perform in the economy of transmission. All are necessary every day utilities.

The telephone in carrying human speech is one of the greatest factors in every day business life and is also making noticeable headway in the home. These points are evident to everybody who has looked into the subject at all. Depressions in trade have very little effect upon the business of the telephone companies and for this reason their earnings are of a stable nature and are therefore not subject to large fluctuations as are those of industrial and other concerns.

In recent years there has arisen a very active inquiry from investors for the securities of Telephone Companies having favorable franchises, good prospects and capable management. We offer for sale in lots to suit purchasers a block of Trinidad Consolidated Telephone's 6 p. c. Bonds. This Company has an exclusive franchise and its net earnings show a steady increase. Price of bonds and full particulars upon application. F. B. McCURDY & CO. MEMBERS MONTREAL STOCK EXCHANGE Halifax, Montreal, Sydney, CHARLOTTETOWN St. John's, Nfld.
