## Dental Clinics For Children

### Will Be Sought By Women's Institutes—Mrs. Wm. Mutch New President—Convention Came To Close Yesterday.

The 16th annual convention of the Women's Institutes of Prince Edward Island which opened on Wednesday, held its closing sessions yesterday morning and afternoon with large attendances. Following the close of the afternoon meeting, the delegates were entertained at a delightful reception at Old Government House, by His Honour the Lieutenant-Governor and Mrs. Hearz.

At the morning's session after the Island Hymn had been sung, the convention considered a 6-months programme for the conduct of institute meetings. The Institute paper was also discussed. With regard to the Institute booth at the Exhibition, it was decided to leave the task of deciding whether or not to exhibit, to the local institutes.

### ANNOUNCEMENTS, COMING EVENTS, MEETINGS, ETC.

- Drink Maccs Hop Ale. 7-9-till August 8.
- Kelly's Cross—Kelly's Cross Tea July 17th. If not fine July 18th.

### This Year's Objective.

The Convention then launched into a discussion of what this year's objective should be. It was at first proposed to aid in the work of vaccinating the school children of the province and to make it possible that every one should be treated. The meeting was very dubious as to whether this work should be taken up and after a division a large minority showed itself opposed. It was felt that a matter of this nature should not be recommended too strongly as the Government would probably accede to the wishes of the institutes without question. It was determined to send out literature on the question to educate the people.

Mrs. Allen Wyand then introduced the project of promoting dental clinics for school children unable to obtain access to dentists on account of distance from the various centres or of lack of funds. Last year, she said, she had been personally pressing this on members of the Legislature but the question had been overlooked in deference to the Sanatorium proposal. The dentists, she claimed, had agreed to put a man on the road if the Government would put up \$1,000. She cited an experiment had performed in Cavendish and vicinity and which had been attended with complete success. A government grant would be required as a creative fund to put a travelling dental corps on the road. The children would be required to pay a medium fee which could be adjusted in accordance with those in the other provinces where the scheme has worked out remarkably well.

By a standing vote, the Convention empowered Mrs. Wyand to work on this project with its support. A report on "National Events" was then delivered by Miss Emmeline Marchbank, who ably reviewed the events which have taken place throughout the Empire during the past year and made a strong appeal for the use of British and Canadian reading matter.

The report on "Immigration" read by the Conventor, Mrs. Wm. Mutch, stressed the necessity of keeping our

(Continued on page 3)

- Reserve Wednesday 17th for Ice-cream Festival, Bredalbane. If not fine Thursday. 6519-7-12-15-21.
- Come to hear Rev. Mr. Somers discuss Prohibition Vs. Government Control at Hamilton Hall, July 12th at 8 o'clock. 6599-7-12-11.
- The East Royalty Women's Institute will hold an ice-cream festival on Tuesday evening, July 16 in Arthur Robertson's field. 6618.

- Montague and Cardigan Shipping Club loading live stock Wednesday, July 17th until noon. Stock must be previously listed otherwise may not be accepted for lack of space. Mont Anear and E. J. Redmond, Secretary. 6600-7-12-21.

## LIKELY TO BE DELAYED

(Canadian Press)  
OTTAWA, Ont., July 11.—The "Untin" Bowler is likely to be delayed at Port Burwell for some days, according to a wireless message received by the federal department of Marine and Fisheries from its radio station on the Hudson Straits. While there is sufficient open water at Port Burwell to enable the plane to take off on its journey to Berlin via Greenland, the main bay is full of ice; it may be several days before a favoring wind springs up to carry ice off shore.

## Sir Henry Drayton In France

(Canadian Press)  
PARIS, July 11 — Public opinion in Ontario holds that the general habit of drinking light wines would almost suppress alcoholic abuses, Sir Henry Drayton, chairman of the Ontario Liquor Control commission, indicated when interviewed today. He has been traversing eight of the famous wine districts of France in the course of a busy tour, and has visited 17 towns. He is getting in contact with the vintners to insure proper supplies and prices, with the aid of securing good wines with light alcoholic content at prices that would appeal to Ontario. He met members of the trade in Paris yesterday.

### NO MANOEUVRES THIS YEAR

(Special to the Guardian)  
LONDON, July 11.—Tom Shaw, Secretary of War, announced in the House of Commons today that no manoeuvres would be carried out by the army on the Rhine this year. "The government will not willingly cause either inconvenience or annoyance to the civilian population," he said.

## Meeting In Zion Church Last Evening

An audience of about 100, largely composed of visiting delegates, assembled in Zion Church last evening at a public meeting held under the auspices of the Sons of Temperance who are now in annual convention at Charlottetown. Presiding was Rev. W. S. Loring, Grand Worthy Patriarch of the Prince Edward Island Division, who introduced the speakers. Rev. Mr. Manuel of Harcourt, New Brunswick, Grand Worthy Patriarch of the N. B. Division, led in devotional exercises.

Mr. H. P. Newcombe of Halifax, Grand Worthy Patriarch of the Nova Scotia Division, the first speaker, asked that if every individual in this province were offered a proposition to go into the liquor business to earn his living, would he accept. That is what we are facing as a people on July 18th. It is a moral issue.

Mr. Newcombe declared that he was treating the question as an economic issue entirely. He dealt with the argument that under Government Control revenue is diverted into the National Treasury rather than into the hands of the boot-legger, and declared that notwithstanding, the United States is saving billions annually because she is nationally dry. He had the authority of leading American economists for that. "A combination of brewers, distillers and wet politicians—because they knew that they couldn't go back to the saloon, because they knew it was legally damned, invented the remedy of Government Control," said Mr. Newcombe.

Mr. R. M. Evenson of Philadelphia, the second speaker, discussed the particular effects of Prohibition on the moral and economic life of the American people. "Prohibition is the greatest thing that ever happened to the United States," he said.

## HONORED BY FOXMEN

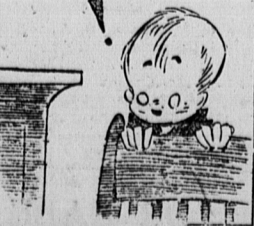

Sir Charles Dalton, founder of the fox farming industry, who was tendered a banquet at Summerside last evening by the Canadian National Silver Fox Breeders Association.

## Admiralty To Abandon Salvage Operations

(Canadian Press)  
LONDON, July 11 — The Admiralty has decided to abandon all further operations for salvaging the sunken submarine H-47. The announcement of this was supplemented by the statement that this decision had been reached after full consideration of the location of the lost war craft and the difficulties in attempts to salvage it.

## WILL SAIL JULY 20TH

(Canadian Press)  
OTTAWA, Ont., July 11 — Members of the Arctic expedition will sail from North Sydney, N. S., on July 20 aboard the "Beothic" for the patrol into Baffin Bay and the eastern archipelago. They will convey supplies to the handful of Royal Mounted Policemen, stationed along the Arctic coast and who in addition to maintaining law and order among the Eskimos, act as customs and immigration officers.

For the fifth consecutive time George P. MacKenzie will be the officer in charge. Mr. MacKenzie was formerly gold commissioner of the Yukon. Captain E. Falk is the "Beothic" navigator and Captain L. D. Morin will assist him as ice pilot.

On board the Beothic will be carried a group of trained men who will collect ornithological, zoological and botanical specimens, study the ocean currents, and carry on ethnological work. P. A. Taverner, Canadian ornithologist and author of several standard text books of the subject is to be included.

## Increase In Price Of Meat

(Special to the Guardian)  
TORONTO, Ont., July 11.—That there has been an increase, as much in some cases as 50 percent, in the price of fresh meat in Toronto, is admitted by both wholesalers and retailers, who agree in the reasons for the advance.  
"The short run in the U. S. A. has caused the export of a great deal of Canadian beef," stated the assistant general manager of Arnold Bros. the answer to this was provided by W. H. Cameron of the export department of the Harris & Attor Co. in the following statement to the star: "The real cause is the decrease in the cattle population of North America, which seems

## EIGHT MEN BURIED ALIVE

(Special to the Guardian)  
LONDON, July 11.—Coal mines claimed their toll again today when at Milfraen Colliery, Blaenavonwald, eight men were buried alive. Their bodies were recovered. Five others were injured. Sixty five were working in the pit when an explosion occurred from unknown causes as the miners were ascending the shaft. Fire broke out, and fumes made rescue work difficult.  
A pony was saved from the flames as it stood awaiting its master, who was lying dead under the debris.

## IS SURPRISED

(Canadian Press)  
VICTORIA, B. C., July 11.—Reiterating his statement in Vancouver that Canada had always been favorably disposed toward a joint discussion of problems of mutual interest to the nations of the British Empire and would consider with favor any suggestion from the Labor Government of Great Britain leading to an empire economic conference, Hon. James A. Robb, Minister of Finance, again expressed his surprise today concerning the reported declaration of Right Hon. Philip Snowden, British chancellor of the exchequer, against empire preferential politics.  
"I believe in British preference and I believe the British people that Mr. Snowden represents welcome the preference given them by the dominions," Mr. Robb said.

## May Eliminate Submarines From Naval Program

(Special to the Guardian)  
LONDON, July 11.—There were persistent reports today in the lobbies of the House of Commons that the new Labor government had decided to eliminate from the current naval building program six submarines and their necessary parent craft.  
The decision was said to have been taken at yesterday's cabinet meeting; the minister being influenced partly by the disaster to the H-47 and partly by a desire to make a gesture of disarmament to the United States. It was said also to express a ministerial desire for abolition of all submarine warfare.

## First Steps Taken

(Canadian Press)  
LONDON, July 11.—First steps toward resumption of normal diplomatic relations between Russia and Great Britain it is stated in well informed quarters, are to be taken sometime this week by way of a communication from the British to the Soviet government. The form of the communication is under consideration. It is hoped that the communication would be in such shape that Russian representatives will come to London by the end of the present month to discuss matters outstanding between the two governments.

WASHINGTON, July 11.—Production forecasts of this year's crops in the United States, issued today by the Department of Agriculture, on July 1 placed corn at 2,662,050,000 bushels; winter wheat at 582,492,000; durum wheat 58,278,000; other spring wheat 193,999,000, and all wheat, 833,869,000 bushels.

to work in cycles. There has been a shortage of cattle receipts in both Canada and U. S. A. but the market has been on a parity.  
As to whether this condition in the meat industry threatens to become chronic Mr. Cameron would not say. "It is impossible to predict such cycles," was his candid statement.

## Presentation To Sir Chas. Dalton

### Founder Of Silver Fox Industry, Signally Honored By Canadian National Fox Breeders Association.

Sir Charles Dalton, pioneer in the breeding of silver black foxes and founder of the industry which has made the name of Prince Edward Island famous throughout the world, was signally honored at Summerside last night by the Canadian National Silver Fox Breeders Association with a complimentary banquet and presentation of a magnificent sterling silver fox half life size in characteristic life-like pose. The presentation was made to Sir Charles by Peter Clark, past president of the Association, "as a token of recognition of his invaluable services to Canada in connection with the foundation and development of the silver fox industry."

Upwards of three hundred guests and members of the Association were present at the banquet which was held in the spacious building formerly used as a skating rink and which was brilliantly decorated for the occasion.

Mr. Justice Arseneau, president of the Publicly Association, very generally and capably presided, addresses being delivered by Mayor Lidstone of Summerside, Hon. W. M. Lea, Minister of Agriculture, Hon. J. D. Stewart, K. C., Hon. J. E. Sinclair, M. P., J. D. Gardhouse of Weston, Ont., B. I. Rayner, Matthew Snow, of Winnipeg, A. F. Arseneau, M. L. A., J. D. Erlen, and Dr. Cyrus MacMillan of McGill University, the latter in an eloquent address proposing the toast to which Sir Charles responded feelingly.

The arrangements for catering etc. were very satisfactorily carried out and reflects much credit upon the entertainment committee and especially the ladies whose services were indispensable. A large number of ladies were present as guests and their presence made the function a delightful as well as memorable one.

An excellent musical program was provided by the Roseland Orchestra of Moncton, N. B. and by Mrs. Robert MacKay, Mrs. D. W. Fraser, Mr. Fraser and Mr. George Shiers of Amherst, N. S. in vocal and instrumental numbers which were enthusiastically encored.

The superb silver fox presented to Sir Charles measures 19 inches in length and 9 inches in height, standing on an ebony base 21 1/2 by 4 inches attached to which is a silver plate bearing an appropriate inscription.

### Address

To SIR CHARLES DALTON, Tignish, Prince Edward Island  
Honoured Sir—The silver fox breeders of Canada are singularly honoured today. It is our great privilege to bid you welcome and show our appreciation on this auspicious occasion, and we cannot refrain from feeling a just and laudable pride that it is our happy lot to be the first to extend to you any tangible public mark of the sincere gratitude of the Canadian fox breeders for the incalculable service you have rendered your country.

We are met today under these happy circumstances and in the presence of the flower of the fox breeding industry to do belated honour to "you, Sir Charles Dalton" for the initiation and great part you have taken in the development of this unique, valuable and wonderful industry which the Canadian National Silver Fox Breeder's Association represents. We appreciate the fact that the inestimable privilege of being the founder of a great industry is in itself the greatest reward that

man can wish for and that doubtless is he who is so signally acknowledged in such great measure to wealth of the world, in a manner speaking causing two blades of grass to grow where but one grew before.

What the world admires—and rightly so—is first, vision; then an ideal; then faithfulness to that ideal; and finally, the realization that wealth gained through the persistent following of that ideal is a public trust, to be used wisely for the advancement of social conditions. You, Sir, have seen the vision; followed the ideal with a zeal and concentration that must serve as an example to other men no more favoured than you were; and the harvest in which its full fruition that ideal so bountifully culminated has been and will be of untold benefit to the community in which you have spent your life.

To go back to the beginning; great as was the vision, one can hardly believe that your presence was sufficiently clear to conceive that the industry, for which the world so justly gives you credit, would in this year of Grace 1929 have assumed such proportions. Had you, Sir, in those early days of struggle and disappointment—had any of your coteries, the pioneers in this industry—vision so clear as to see the aristocrat of the forest bred in every Province of the American Union where climatic conditions are sufficiently favourable, in Britain, in at least nine countries of continental Europe, and even in far off Japan?

The business which you initiated has brought fame and fortune to the Province which claims you one of its worthy sons. It has widened the outlook of thousands who at its inception were in the main extracting a meagre living from the soil, but who are today enjoying the broadening contacts and the comforts and luxuries which in this age are so necessary to the proper enjoyment of life. It has provided many of the world's fair daughters with an adornment which, before the full fruition of your efforts, belonged exclusively to the very rich, thus adding to the expression of beauty in its various forms so necessary to a fuller life, and aiding in the development of a culture consciousness among the people which otherwise would have been longer delayed. It has paved the way for an extension of fur farming industry to other lines of fur bearing animals, some of which have already reached large proportions. It has been mainly useful to humanity, however in conserving for future generations valuable forms of wild life that were otherwise doomed to extinction, its value to the world in many ways beyond estimation.

In all your varied activities in developing this wonderful enterprise, it is, Sir Charles, well known to us that you were consistently loyal and
