NEWSY FARM NOTES

By Agricola

BIRDS THE FARMER'S FRIENDS

The family of the Woodpeckers, of which seven species are known in this province, are all beneficial birds, highly specialized for their particular work. Some of them obtain their food by laboriously digging out grubs from the solid wood of our orchard and other trees, while others pry into every crack and crevice of the bark, seeking out the eggs and adults of various insect pests. All the stomachs of woodpeckers (except the Flicker) which have been examined show only two preferences for food of vegetable origin, namely the seeds of the hemlock and the berries of the sumach. The Hairy, the Downy, and the Golden-winged Woodpeckers, are the birds commonly noticed; the two former are much alike except in the matter of size, and the latter is known here as the "Flicker." The little Downy is a great destroyer of larvae of the apple codling moth, and should be encouraged by "haling" the orchard trees with pieces of fat in the winter. The Flicker sometimes helps himself to the cherries if the opportunity occurs, but apart from this unlucky habit he has many good qualities. The Flicker is (unlike his congeners) really a ground feeder and devours great numbers of grasshoppers, beetles, moths, and ants and are particularly searched for.

The Arctic Three-Toed Woodpecker, the American Three-Toed Woodpecker, and the Pileated Woodpecker are less known as they seldom show themselves in the neighborhood of cultivation; keeping to the forests, where their services are of great value against the wood-boring insects. The Yellow-bellied Sapsucker, the last of our Woodpeckers, is accused of "tapping" the trees to drink the sap, but allowing this to be true, its chief employment is the destruction of insects that live on the trees or hide in the loose-bark.

FARM SEEDS

According to the current Market Service of the Dominion Seed Branch the clover and grass seed market is quiet for the time of year. The seed

POTATOES AND TURNIPS

We will be buying every day at our warehouse Hogan's Wharf. Highest prices for good stock.

REVIEW—(TAKE IN) ...

dealers in the Maritime Provinces are now placing orders with Ontario and Quebec seed houses but are not expecting local business before March. Quebec growers of red clover are not satisfied with the price offered by buyers, viz \$18.50 per hundred pounds of seed that will clean to grade No. 1, and some are inclined to hold over for another year as they anticipate that the red clover crop in 1930 may be light. Dealers are offering \$8 per 100 lbs. for timothy seed of good quality. In Western Ontario growers are being offered \$13.30 per 100 lbs for red clover suitable to make Canadian No. 1 export grade and \$11.60 for No. 2, No. 1 export grade alsike \$9.75; No. 2, \$8.30, and No. 3, \$7 per 100 lbs.

The Charlottetown cleaning plant of the Grass Seed Growers' Association is busy with the cleaning of Isl and grown "Brown Top" grass seed and the growers are expecting about 90 cents per pound for grade No. 1.

SUCROSE

Looking over a report on Sugar Beet the other day I came across the word sucrose and thereupon fell into a train of reflection upon the different materials which nature provides to minister to man's need for sweetening. The dictionary tells me that sugar is a well-known sweet crystalline substance obtained from the sugar-cane, and also the beet, maple and other plants. The chemist, on the other hand, does not think of sweetness as any criterion for sugar; he employs the term to designate a group of carbo-hydrates having certain likenesses in molecular structure. But the sugar of the dictionary is essentially sucrose, the pure commercial product of the sugar-cane or the sugar-beet. Another sucrose is maple-sugar which differs only in the contained "impurities" which give the distinguishing flavor. In contrast to these naturally produced sugars, the chemist prepares other carbo-hydrates by chemical reactions. The hydrolysis of starch gives grape or corn sugar, also known as dextrose, and chemically as glucose. Not so well known is levulose, variously called fructose, or fruit sugar, which is produced by the hydrolysis of inulin, a substance occurring in some tubers like the artichoke. It is rather surprising to find that levulose is nearly twice as sweet as sucrose (173:100) and that glucose approaches the latter fairly closely (74:100). Glucose is par excellence the physiologic sugar, derived in the alimentary tract, and representing the form in which the carbohydrate circulates in the blood.

Other sugars are milk-sugar, malt-sugar, and mannite, which is made from the juice of a species of Arabian ash. Another sugar is an exudation from a species of conifer which grows in British Columbia, and is used by the natives.

OUR CHEESE GRADES HIGH

The cheesemakers of this province still maintain their high reputation in their art (or is it a science?) according to the official figures for 1929 just to hand. The total number of boxes of cheese grades was 15,378; of these 97.07 per cent. graded Special and First, 2.89 per cent. Second, and 0.04 per cent. Third and No Grade. Compare the figures for all Canada: Total Boxes 1,273,874 of which the percentages are: Special and First 92.76, Second 6.64, and Third and No Grades 0.90. Our cheesemakers are to be congratulated on their remarkable showing. Since grading was first instituted by the Department of Agriculture at Ottawa some seven years ago, Prince Edward Island cheese has made an improvement of 35 per cent. in the First Grade.

Some praise is due to the patrons also, for as has been pointed out, the best maker in the country cannot produce a No. 1 article unless his patrons co-operate (especially in their care of the milk) and the extent of this co-operation frequently measures the success or failure of the maker.

TRYON AND VICINITY

There's no thrill in easy sailing,
When the skies are clear and blue,
There's no joy in merely doing things.

That anyone can do,
But there is some satisfaction,
Which is mighty sweet to take,
When you reach a destination,
That you thought you'd never make.

Mrs. John Thomas of Tryon has returned after spending a few days in Summerside.

Mr. and Mrs. Harold Howatt of Augustine Cove were recent visitors to Summerside.

Mr. Walter H. Bell of Tryon was a visitor to Summerside on Tuesday, returning on Wednesday.

Messrs Frank Large and Sidney Dawson of Tryon were visitors to Albany on Wednesday evening.

Mr. and Mrs. Elmer Dawson of Augustine Cove made a business trip to Tryon on Tuesday, Jan 21st.

North Tryon School is now closed down due to a few slight cases of Scarlet Fever, which we have no doubt will soon be stamped out.

Miss Lizzie Parley and her friend, Miss Way of Port Elgin have returned after spending a short, but pleasant visit in Tryon.

We are very sorry to report the serious illness, from pneumonia of little Miss Georgina and Master Roy children of Mr. and Mrs. Russel Mabey of North Tryon. It is sincerely hoped that they will soon regain their health.

Victoria Arena was crowded on Monday Evening, Jan. 20th to witness the fast and thrilling game of hockey between the Alberton "Regals" and the Victoria "unions" which resulted in a total score of 3-1 in favor of the "unions". The game was a close one from start to finish and caused great excitement among the fans. It was ably refereed by Mr. Frank MacFarlane of Augustine Cove, who treated both sides with fairness and alike.

The Victoria "Unions" famed Hockey Sextette of Victoria, P. E. I. recently made a tour of a few western towns on the Island, crossing sticks with Kensington, whom they beat 1-0, O'Leary, who were defeated 3-1, the Unions only defeat being at Alberton where the score was 2-1, here the rink was considerably smaller than their own, and not such good lights as they were accustomed to play with these two handicaps prevented the team from doing their best, but here's telling we are "all" proud of the Victoria "Unions" and hope to see them win many victories this season.

Mrs. Joseph Stirling and little son, Bill of Calgary, Alta. arrived home recently on a visit to her father, Mr. Fred Lord of Tryon, who has been ill for some time but is now much improved in health. Mrs. Stirling's many friends in Tryon are delighted to see her again as this is her first visit home for several years.—adieu "D"

Is Your Chest Sore? Does Breathing Hurt?

A vigorous rubbing of the chest, neck and sore side with good old Nerviline is the best treatment. This wonderful liniment sinks into the tissues where the pain is seated, and gives instant relief. Painful breathing disappears and all sense of soreness goes quickly. Just try Nerviline for chest-tightness, coughs, colds and soreness. It is a wonderful liniment, saves the whole family from numerous minor ills. Even for cramps, colic, stomach pains, the effect of Nerviline is wonderful. It should be in every home. Large bottles, 35 cents, at all dealers.

NERVILINE
Drives Out Pain

Gleanings From Millview And Vicinity

The measles are very prevalent in these parts.

Mr. E. T. Higgs, City, was a recent visitor to Millview.

Miss Lila Jenkins is confined to her home with the measles.

Mr. and Mrs. Vernon Jenkins were recent visitors to Alexandra.

Mr. Joseph Smith was a recent visitor to Vernon River.

Mrs. M. E. Jenkins, Millview, was recent visitor to the city.

Mrs. W. A. Jenkins, Seal River, was a visitor to the city on Saturday.

Mr. Matheson, Oyster Bed Bridge, was a visitor to Millview on Sunday.

Mr. and Mrs. Geo. Jenkins were recent guests of Mr. and Mrs. W. H. Jenkins.

The many friends are sorry to learn of the serious illness of Mr. Joseph Bradley.

Mr. and Mrs. Albert Drake were guests of Mr. and Mrs. W. L. Jenkins on Monday evening.

The many friends of Mr. Lester Hayden, Vernon River, are sorry to learn of his continued illness.

Mr. W. L. Jenkins, Millview, was in Montague on Sunday attending the funeral of Mrs. Warren Campbell.

Miss Daisy Vanderstine, Millview, left for Boston on Friday morning. She will be greatly missed in the social activities.

Mr. Wallace McNeill, Western Canada, spent a few days the guest of his daughter, Mrs. Clarence Wood, Vernon River. Owing to the responsible position which Mr. McNeill holds he was only able to remain the Island a few days. It may truly said he is one of our successful Islanders abroad.

On Tuesday morning at 7 o'clock a number of the radio fans of Millview and vicinity heard the excellent speeches and His Majesty's Service speaking from Great Britain. Col. Keith Rogers is to be highly complimented on being able to have the program so clearly broadcasted.

A dance and whist was held in the Millview Hall on Friday night. L. Samuel Drake was the director. Whist began at 8 p. m. and lasted until 10 p. m., when the light footers tripped it off 'til 12. The following prizes were awarded: Ladies, Mrs. Jay McDonald; Gentlemen's, Mr. Wm. Ross; Consolation prizes, Miss Myrtle McEachern and Mr. Everett Jenkins. It is the intention to hold the dance and whist every Friday evening.

The entire community was greatly shocked when, on Sunday morning they learned of the sudden passing of Mr. Neil McInnis, Orwell, at the age of 69 years. Mr. McInnis was a first class carpenter. During the summer months he worked in Western Canada and spent the winter with his family in Orwell. Those who had the pleasure of knowing the deceased will recall his many talents as conversationalist, reader, kind neighbor, and intelligent man. While in Millview and Vernon River he made many friends who will never forget his kind word and good advice. He leaves to mourn his sorrowing wife, four daughters, namely, Violet, and Elsie in Hamilton, Ont; Goldie and Maddy at home and two sons Harold and Restin to whom sincere sympathy is extended.

James Ferries, ex-champion checker player of the world, died recent at his home in Glasgow, Scotland.

Lady Cynthia Moseley, the Socialist M. P. in England, has asked that members forced to hire taxis to get home after late sittings of parliament have their fares refunded.

-DAIRYMEN-

Naturally you expect every manufacturer of BALANCED RATIONS to assert that his product is the best on the market—BUT ASK THE MAN WHO FEEDS THEM.

Note what Mr. Gilbert McMillan, noted Ayrshire Breeder of Huntingdon, Que., breeder of the first Ayrshire Cow to produce over 100 lbs. of milk in a day, has to say regarding BALANCED RATIONS. (Extract from a letter dated Dec. 2, 1929)

"UNION GRAINS are practically the only Commercial Mixed Feeds I have ever used that I felt satisfied were as good value as I could mix myself. As long as they hold to their present relationship in price to the other standard feeds we will continue to use them."

(signed) Gilbert McMillan.

There is no Dairyman in Eastern Canada better qualified to judge of the value of Dairy Rations than Mr. McMillan as his lifetime has been spent in breeding, rearing and feeding cattle for show and production.

—ASK YOUR LOCAL DEALER FOR UNION GRAINS—If he cannot supply you, communicate with—

CHARLOTTETOWN

UNION GRAINS LIMITED
LENOXVILLE, QUE.

On his completion of 40 years service with the Y. M. C. A. in Britain, and his retirement after 17 years as general secretary, Sir Arthur Yapp was presented a check for \$2,500.

Charged with accepting bribes in the form of drinks and money from book-makers and public house proprietors, 24 policemen have been suspended from the Sheffield, England, police force.

Because they tend to congest traffic, establishment of more filling stations in Prague, Czechoslovakia, should be prohibited, according to a recent general protest filed with city authorities.

"NOT BY MEAT ALONE"

Leading fox ranchers have demonstrated that, in addition to meat, it is absolutely necessary to feed a liberal supply of IMPERIAL BISCUITS daily during the winter season, in order to keep the bowels regular, and also to ensure the females having an adequate supply of milk during the lactation period.

IMPERIAL COD OIL BISCUITS are made from a formula which has been prepared with these results in view and which reliable tests, extending over a considerable term of years, have proved to be signally successful.

Ranches, which have continued the feeding of IMPERIALS regularly in winter, have had the largest litters of young foxes and also the highest average of pups raised to maturity; in addition, they have practically eliminated the destroying of young by the females.

For assured results feed IMPERIALS throughout all the winter season.

IMPERIALS are sold by leading distributors or direct from the factory.
