Father and Son Banquet held

About 100 fathers and sons sat down around the table at the Y. M. C. A. last night when the annual Father and Son Banquet was staged. A very enjoyable evening was had by those present.

"Knowledge, ability, confidence and personality" are the four requirements most necessary to the boys of today. Mr. P. W. Turner said as he delivered the main address of the evening. He urged a better understanding between fathers and sons in order to assist the young boys in avoiding the pitfalls of life. Mr. Turner urged the boys to take a more active part in community life and told them to study the political questions of the day so that they would be in a position to be dedicated to their leaders. "Our responsibility in the years to come is to see that this Canada of ours becomes the greatest nation its natural resources meant it to be," he said in conclusion.

Mr. Barrett was chairman and the toastmaster for the evening was Burton Howatt, president of the Y. M. C. A. The toast to the Y. M. C. A. was responded to by J. M. McPadden; the toast to the fathers was presented by St. Clair Cutcliffe and responded to by Mr. Roy Cudmore. The usual toast to the King was duly honoured.

The local Y. M. C. A. has been established in the city for 88 years.

Attending last night's banquet were members of the Y's Men's Club, Hi-Y Grads, Hi-Y Club and the Y.M.C.A. executive. The enjoyable program consisted of tap dancing by Lance Corporal B. Bourgeois and moving pictures shown by Mr. Neil MacLean.

Card of Thanks

The family of the late Mrs. P. C. Gallant wish to convey their sincere thanks to those who sent Mass Cards and letters of sympathy and the neighbours for their many acts of kindness during their recent bereavement.

No. 12
MIRACLE BILL SAYS

Here's another letter from a friend. It says: "Last summer I had twenty-three pigs. Some did well — some were doing nothing. I sold them as they came to two hundred pounds. At last I had four left and I thought they were real runts — weighed less than a hundred pounds each. But I took your advice and fed them mixed grain and "Miracle" Hog Protein Mineral Supplement for fifty-four days. I am enclosing a bill of sale which shows they weighed two hundred and ten pounds each. They graded two select and two bacon. After paying the truck I cleared sixty-five dollars on them." Well, now, that's something! Thanks, friend, for telling me about it. You didn't say how much Ogilvie "Miracle" Feed you used—but I know that you made its cost five or six times over.

DEATHS

McQUAID—In the Charlottetown Hospital Thursday, March 19, 1942 Mrs. Margaret McQuaid dearly beloved wife of Frank McQuaid (formerly of Lot 65). Her remains resting at the A. A. Hennessy Funeral Home from where the funeral will be held on Saturday morning at 8.45 to St. Dunstan's Basilica thence to the Roman Catholic cemetery.

McKINNON—At the Provincial Sanatorium Thursday, March 19th Mrs. Sterling McKinnon (nee Clara Masters of Vernon River) in her 86th year. Funeral from her late residence at North River, Saturday, March 21st, service starting at 2 o'clock. Interment Cornwall Cemetery. The late Mrs. McKinnon is resting at the McLean Funeral Home until this afternoon then at her late residence.

In Memoriam

In loving memory of Mr. Lambert Spencer who died March 20, 1940.

In our hearts your memory lingers sweetly tender, fond and true; there is not a day dear Father, that we do not think of you.

Lovingly Remembered by His Wife and Family.

ONE HOUR SKATE—West Kent Ice Sports, Friday, 7.30 P. M. L-1031-3-18-31

ARTIST HERE—Mr. Randolph Hakanson, New York, arrived in the city last night to take part in a Community Concert Association entertainment. He was accompanied by Mr. Craig Hutchinson of the same place. They are registered at The Charlottetown.

MODELS BUST—A piece of clay modelling that might have been turned in by an expert is on exhibition in the window of Reddin's drug store at present. It is a bust of Joe O'Brien done by Tom Mills, 12-year-old son of Mr. and Mrs. Jack Mills of this city. Many passers-by stopped yesterday to have a look at the work and their comment was very favorable.

HEAR TALK ON HOME DEFENCE—The speaker at last night's meeting of the Kinsmen Club was Captain N. W. Lowther who spoke on home defence. He pointed out that at last Ottawa realized that the Mar time Province was in danger. The work of organizing units in various centres of the island is now in progress and much enthusiasm is being shown by all classes of men. Men will train one night per week and spend two weeks in camp, probably in August.

ENJOYABLE ENTERTAINMENT—The second of a series of card parties composed of Bridge and Auction Forty Fives, was held in the Odd Fellows Hall last evening. Proceeds were in aid of the War Services Fund being raised by the Order for a contribution by their Grand Lodge to the war services for which aid is needed. There was a good gathering present considering the many other attractions going on in the city and the prizes offered for the highest scores were keenly contested. The ladies' prize for first at bridge was won by Mrs. B. J. Andrews, second prize went to Mrs. Helen Acorn. The highest bridge score by the gentlemen went to Mr. Harper MacNeill, the second to Mr. Harry Dickinson. First prize to the lady with the highest Auction Forty-Five score went to Miss Elsie Hobbs, the second to Mrs. L. Gillespie. The prize for the highest men's score went to Mr. Willard Jordan the second to Mr. Norman Nicholson.

LEGION DANCE—The Legion dance at the armory last night was a decided success with a large attendance. The R.A.F. orchestra supplied excellent music and the old time numbers were taken care of by the veteran violinist Bob Weeks, who was accompanied on the piano by Mrs. Russell Roper. The dance was put on under the direction of Mr. A. G. Bruce, Entertainment Officer, and the Ladies Auxiliary. As Frank Wooley, I. A. F., cooperated with Legion members in arranging the dance the great success it was, arranging for the floor show, attending to decoration, etc. He also acted as master of ceremonies for the dance. The show consisted of first class tap dancing and songs which drew rounds of applause from the audience. Those taking part were: Adele Landriani, Pauline MacDonald, Peggy Campbell, Felice Arsenault, Bebe Welsh, Edith Whitlock, Annabelle Lawson, Barbara Whitlock and Teresa Costello. This show was under the direction of the Meynell sisters. The spotlight was installed by Mr. C. Clarnum. Refreshments were available throughout the evening, the entertainment being well patronized.

Potato Growers

(Continued from page 1)

Mr. J. W. Boulter took place. The text of this appears below. He also submitted the financial statement. These were again submitted at the night meeting and were approved.

Evening Session

When the meeting opened with Hon. Mr. Wright in the chair, Mr. S. G. Peppin was called on to speak in a very interesting address he outlined the common diseases found in Island potatoes and explained the best method of controlling these. The cobblers were attacked by stem-end browning during the past season, he asserted. This was not new as the same disease had appeared in Island fields in 1917. The speaker was of the opinion that this disease was not reproduced when the tuber was planted.

Another virus which attacked the potatoes, particularly the Green Mountains, this past year was net necrosis, a primary symptom of leaf roll. This is carried to other varieties by an insect which feeds on the diseased plant. He believed there was a possibility that the Katadin variety, which is not plentiful in this province, might be responsible to some degree for this condition. Ninety per cent of all the fields on the Island had a trace of leaf roll last year, the senior seed inspector declared.

Method of Control

The best method of cleaning up this net necrosis is by using only the best certified seed and by planting the potatoes in tuber unit plots, was his advice to the growers. The insect which spreads the disease is almost impossible to control, he explained.

In a discussion which followed, Mr. Peppin advocated early planting, particularly the Green Mountains, in order to obtain the best crop. He advised treating the tubers about two weeks before planting; the instantaneous dip is also beneficial.

Mr. R. R. Hurst, plant pathologist, gave a technical outline of the various diseases which attack Island tubers. He enumerated the

Amendments To Chancery Act

Bill discussed in Committee of Legislature yesterday.

Legislative Assembly, March 19. The House met at 3.15 p. m. The following bills were introduced and read the first time: Hon. Mr. Acton's Bill to amend the Credit Union Society Act (Hon. Mr. McGuigan).

An Act to amend an Act to amend an Act respecting Dogs. Hon. Mr. Acton's Bill to amend the County Court Act (Premier Campbell).

Workers' Compensation

Mr. Matheson tabled the following report:

"To the Honourable the Speaker and members of the Legislative Assembly:

"The undersigned members of a committee appointed by resolution of this House at its last session for the purpose of studying the Workers' Compensation Act and recommending amendments in force in the Provinces of Canada and to recommend to this present session of this Assembly such enactments as may appear applicable and appropriate to the matter of workmen's compensation in this province, having special regard to the problems created by our peculiarly fastidious condition beg leave to submit the following report:

"During the recess the committee collected data respecting the form of the Act in its present session. More recently however, it has been represented to members of the Committee that, because of the additional financial and other burdens which have been imposed by the Federal Government upon employers because of wartime emergencies, the time is inopportune for the additional burden which would be placed upon the setting up of any scheme for Workers' Compensation."

Several Important Matters

There are several important matters which should be discussed at this meeting. We are realizing today the unsettled condition of the potato market. We know of no other cause for this than the potato ceiling which was placed on the potato market in 1942.

We are advised that potatoes go to make up part of the cost of living and therefore should be under a ceiling. He must be clever who can figure out the per dem cost of potatoes per person and can arrive at the fractional saving in cost effected by a ceiling. It is not difficult to guess that the ceiling has occasioned to the grower. It has upset the regular trend of marketing and left the farmer in a state of uncertainty as to what he should do. The ceiling has occasioned the marketing of this year's crop but as to whether or not he should grow potatoes and vegetables in 1942.

The placing of a ceiling automatically demands a floor. Unless the farmer has some protection and is guaranteed at least his cost of production, he will not buy high priced fertilizer, and spray materials besides employing expensive labor to take care of his crop in 1942. The placing of such a floor is the danger of loss of the government and did, the amount involved would be a mere trifle compared to the amount paid to protect the wheat grower. It has already been pointed out by the Hon. Mr. MacKinnon that the wheat board does not amount to eighty million dollars. The initial price for wheat for the 1942 crop is \$1.00 per bushel, 70 cents to 80 cents per bushel and when increases on coarse grain, flax and acreage diversion subsidies are added, the total cost of our western grain for this year may easily run around one hundred and twenty-five millions.

The United States Department of Agriculture has announced a program for the support of prices for the 1942 crop of Irish Potatoes. As a means of encouraging growers to plant their full potato acreage in 1942, the Department will attempt to support prices in each of the major producing areas at schedule based prices for potatoes grading United States number one or better sack FOB in carlots. The program is not aimed towards expanded production but rather to assure the full planting of the allotted acreage in 1942. The initial price for the 1942 crop of potatoes in Canada? Without price support for the coming season there is the probability of a severe decline in the potato acreage which might result in an acute shortage of potatoes in 1942.

We might state here that the base price set for the State of Maine for Green Mountains is \$1.25 per hundred weight sacked and loaded.

Useful Information

Mr. L. S. McLeane, Plant Protection Division of the Dominion Department of Agriculture, gave useful information and suggestions and referred to the necessity of provincial assistance which the Provincial Department of Agriculture could give. This question is of such vital importance that we think it is not out of place to make rather full mention of it as a report and to include the resolution for the control of Bacterial Ring Rot which was passed at that meeting and is as follows:

WHEREAS Bacterial Ring Rot is recognized to be one of the most serious potato diseases and a menace to the Potato industry in Canada;

RESOLVED:

(a) That the present standards for Seed Potatoes be not relaxed;

(b) That bags used for the movement of tuberculated Potatoes be new or shall have been disinfected or fumigated under government supervision;

(c) That the Dominion Department of Agriculture be requested to instruct their inspectors to examine critically and with all possible care the movements of Potatoes originating in a province infected with Bacterial Ring Rot and consigned to any province or portion of the country, and to require that after the potatoes have been removed the containers be either fumigated or destroyed;

(d) That growers of the Dominion Department of Agriculture be requested to meet with responsible representatives of the seven provinces and the government to arrange definite and uniform program for the control and elimination of Bacterial Ring Rot and to assign mutually agreed practical responsibilities in connection with the inspection of Tablestock Potatoes and the payment of compensation to growers who are required to destroy their crops as a control measure for the said disease.

Subvention On Fertilizers

Another matter which cannot be viewed in any other light than that of unfair treatment to our growers is the subvention on fertilizers. However, the government has announced its policy and nothing can be done about that but one of the regulations would arouse suspicion in our minds that there is some collusion between the manufacturers of fertilizer and those establishing the regulations. Everything is in favor of the manufacturer. It is set down that 500 lbs of mixed fertilizer is the minimum required on which to apply for the bonus but if in buying chemicals, less than 500 lbs of each chemical is bought, the bonus cannot apply for that particular chemical.

United Effort

It is doubtful if there is any province where such a united effort, in which the Provincial Department of Agriculture took a leading part, was made to stamp out this ruinous disease and we are able to report that while in 1940 twenty-three growers had 200 acres of potatoes which had to be destroyed or cleaned up because of the presence of Ring Rot, there were only two growers with six acres in 1941, and the percentage of disease plants was very low.

Now an effort is being made to find out what would actually have been said last August, but what difference does that make? We are here today to discuss the problem that we have to meet today and there are many we regret to note the increase of disease in our certified fields. There is not the large number of clean reading fields that we formerly had but a greater tendency to Leaf Roll.

It is a puzzle to the grower and to us laymen to explain why this is happening. The Plant Pathologist is finding it difficult to ascertain why there should be such an upward tendency in the percentage of disease. One thing is certain—the grower must use every means at his disposal to prevent further spread. We have been shipping certified seed to the United States for the past twenty-five years and until lately we have been able to refer with pride to the wonderful record of thousands of acres of potatoes showing scarcely a trace of any virus.

Year after year the story was repeated and almost invariably

Your organization apart from the standpoint of marketing served in a general way in the interests of the potato industry. Your Manager as Chairman of the Potato Commission Canada appointed by the Canadian Horticultural Council was obliged to attend several meetings to discuss with the committee of Agriculture and others, questions relating to the supply of tubers for containers, the control of diseases, the probable market outlets and such matters. This was an added amount of work the time for which could be ill-afforded as we are somewhat understaffed to be able to take time off even for matters of such great importance.

We have already pointed out that the 1940 crop was sold at low prices and had some effect on the 1941 planting and the crop was very much reduced both in planting for Tablestock and Cer-

Hon. Dr. Manion Trinity United Church Issues statement

FRIDAY, MARCH 20th
7.00 — Choir Rehearsal.
8.15 — Y. P. U. — Social Hall.

Dr. Manion, chosen Conservative leader in 1938, was defeated in the 1940 election and a short time later Hon. R. B. Hanson was selected Conservative House leader. Last November at a party meeting here Rt. Hon. Arthur Meighen was selected as new leader. He was defeated in the Feb. 9 York South by-election by J. W. Roseworthy, C.P.F. candidate.

Dr. Manion said he had personally consulted men considered leaders of the party in all provinces, including Mr. Hanson, in connection with the National Government platform.

Try This Bean Dish

Toast bread slices to a light golden brown. Place a heaping spoonful of steaming Deep-Browned Beans on each slice. Cover with grated or sliced cheese and top with half a slice of bacon. Place in oven until bacon is crisp and cheese melted. Arrange on plates and garnish with cucumber pickles. Serve at once. A delicious, flavourful treat!

BEANS
Cooked a New Way

• Better—because each bean is individually cooked at an identical temperature until every one is a rich deep-brown colour . . . mealy and tender . . . no hard beans . . . no soft, mushy beans . . . every bean uniform in tasty flavour, fine texture and rich, deep, golden-brown in colour. Only Libby's exclusive, patented cooking process can give you beans like these . . . not overdone . . . not underdone . . . each bean just right.
