Kryptok Double Vision Lenses
 When the age of forty to forty-five years is reached, one needs another pair of glasses—a pair for reading and a pair for distance vision. Kryptok combine these two pairs into one, the upper half of the lens for distance vision and the lower half for reading. Kryptoks are not two lenses cemented together—they are two strengths of glass fused into one.

SHAME, Fear, Deceit and a Guilty Conscience all come wrapped up in the mail order package. We should never be ashamed to look a neighbor in the face. In a community like ours, all are neighbors and friends working together. Our interests are common. We are all in BUSINESS together. OUR business is home-town development. Unlike the overcrowded city, our community has a soul. We tamper with our community-SOUL whenever we boycott home interests. Then let us keep our conscience clear, let us so LIVE that we can at any time look our neighbors in the face, knowing that no action of ours is holding back the progress of our own home town.
