It Pays

to have your eyes examined every little while. In olden times eye glasses had only one use—to assist the old folks in reading or seeing. Nowadays we lead more strenuous lives and the eyes suffer in consequence. Near-sightness, Neuralgia, headaches and many other afflictions are promptly relieved by properly fitted glasses.—We test your eyes free and sell only such glasses as we can recommend.

Veterinary Dentist

J. M. NICHOLSON D. V. D Graduate of the Detroit Veterinary Dental College, 202 Kent Street, Charlottetown

The cause of numerous diseases and disagreeable habits, heretofore ascribed as constitutional, have been traced directly to the teeth. Bit decay, drooping, trailing, loss of flesh, weak eyes, driving on one rein and pulling are very often due to diseased and irregular teeth. Rough edges and sharp corners of the teeth lacerate the mouth and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food, producing indigestion and general debility. Focused molars cause necrosis of the bone around the neck of the tooth and should be removed. Decayed teeth should be removed by extracting or by encephalic sharp corners and edges should be smoothed down, and elongated and uneven molars and incisors cut off. The common float or file heretofore deemed inefficient to accomplish this will not suffice but special instruments devised for the purpose are necessary.
