THE CHARLOTTETOWN GUARDIAN IS READ DAILY BY 50,000 PERSONS **50,000**

That the above statement does not include any spoiled sheets, destroyed papers, returned unsold copies or papers sold in any other way than day by day in the ordinary course of trade and to news dealers, newsvendors and subscribers, including exchanges."

The circulation of The CHARLOTTETOWN GUARDIAN is greater than that of all the other Daily Newspapers on Prince Edward Island combined.

Subscription book are open to interested parties and all possible assistance will be given anyone who wishes to verify circulation.

THE KING'S COUNTY GUARDIAN

Offices in Montague, Capt. W. A. Johnstone, Agent, and in Souris, A. J. McDonald, Agent.

...The latest news, first of all.

...Dealers in Montague yesterday were paying forty-two cents a bus for oats, twenty-two to twenty-five cents a bus for potatoes, ten dollars a ton for loose hay, ten and a quarter cents a lb for pork; twenty-two cents a lb for butter and twenty-five cents a doz for eggs.

...Dealers in Souris yesterday were paying twenty-five cents a lb for butter, forty cents a bus for oats, twenty-eight cents a bus for potatoes; ten and a half cents a lb for inspected pork; sixteen cents a bus for turnips; nine and one half cents a lb for hides twenty cents a doz for eggs; one dollar each for pelts, ten dollars a ton for hay and five dollars a ton for straw.

VICTORIAS WIN FIRST PLAYOFF

(Continued from page 9.)

Vics 2; Abbies 1.

After fifteen minutes play Cornfoot received a terrible cut on the face, about half an inch below the eye, by a lift from Purcell. He pluckily continued his magnificent play to the finish with his face plastered up and one eye closed.

Herrel the Abbies point man made many brilliant runs the full length of the rink and nearly found the net on several occasions amid cheers upon cheers. Davey of the Vics was always in his place and handled his part if the game to perfection. His rushes were splendid and admired by everybody. Cornfoot, the Vics coverpoint and Purcell of the Abbies played their same accurate game. Their blocking and taking the puck from their rivals in such a cool manner was marvelous and they too received their share of triumph.

The forward line of both teams played good combination and the rushes of Hughes and Hennessey of the Abbies and Rodd, Rattenbury and the Burns' brothers of the Vics were clever. Rattenbury who played a star game throughout appeared to be a little unsteady on his feet and had many toses. Harrington and Reddin who did invaluable work for their team, did noticeable loafing and caused the referee to blow his whistle too often.

The teams lined up as follows:

ABEGWEITS		VICTORIAS.
Bell	Goal	McAskill
Herrel	Point	Davey
Purcell	C. Point	Cornfoot
Hughes	Centre	Rattenbury
Harrington	Rover	Rodd
Hennessey	L. Wing	Burns
Reddin	R. Wing.	Burns

NOTES.

The same line up played last night except Gordon Hughes replaced Murnaghan who is suffering from an injured knee. Reddin was moved to wing and Hughes took his position at centre.

Only two starters turned up for the half mile skating race, held at the close of the game last night viz: Ray Flood, Southport and Harry Stanley of this city. They started from opposite sides of the ice and the Southport representative won by a close margin. The racers caused many remarks, it was certainly "the short and the long of it" The Southport racer is over six feet tall while Stanley is around four feet.

Last evening a representative from the Victorias and Crystals tossed for the choice as to where the first of the two games be played. The Victorias won the toss and they will decide where and when they will play The first game will be played in about ten days probably in Summerside. Largest number of goals to decide the winners of the trophy and championship of Prince Edward Island.

SCORING SUMMARY.

First Half.

Abegweits Harrington 1 min.
Victorias C. Burns 29½ min.

Second Half.

Victorias Rattenbury 11 min

Penalties—Hughes, 1 min; Cornfoot, 1 min.; Rattenbury, 1 min.; Reddin, 1min.; Harrington, 1 and 1; Rattenbury, 1 min.—Total—Abegweits, 4 min.; Victorias, 3 min.

AQUIRI, 4005

Sired by Aquilin, 2:19 3-4 son of Bingen 2:06 1-4 and Lesura by Allerton 2:09 1-4 1st dam Eutaxia, by Expedition, 2:15 3-4, 2nd dam Eveline, by Woodford Mambrino 2:21 1-2 3rd dam Vara, by Hambletonian, 10; 4th dam Venus, by American Star, 14. (All great brood mares.)

AQUIRI has very heavy bone, his legs are perfectly clean, and he is one of the best gaited fine trotters in the country. Is good headed rarely makes a mistake, is a horse of great quality and substance. 16 hands high, a rich mahogany bay, and no horse in Canada is better equipped to sire fast colt trotters than this fellow.

AQUIRI will make the season of 1910 at my stable as $15.00 for a live foal, to be settled at time of service by cash or note due November 1st next. Mares sent to be bred will be met at train or boat and be well cared for at the most reasonable rates.

HILLSBORO DAIRY MEET

On Tuesday evening last a dairy meeting was held in Mt. Herbert Hall under the auspices of the Hillsboro Dairying Company. Mr. Mitchell, formerly head of the Sussex Dairy School and now on the staff of the Dairy Division, Ottawa, was the speaker of the evening. The hall was too small to show his lantern slides on "The Care of Milk on the Farm," so the time was spent in a practical talk on dairying.

The speaker, in opening, referred to the Islanders whom he met at the Truro Short Course. They were men who were there for business—men who asked questions and took part in discussions rather than spending the time as a holiday at the Government's expense.

Although this section of the country had been producing milk for the condensing factory, the city milk trade, and their cheese factory, still the dairy herds were far below the standard. The average production of dairy cows in the Maritime Provinces is 3,000 pounds of milk. There are lots up to four and six thousand. What must some of them be producing?

We must take a lesson from Denmark. Up to 1865 she was a grain-growing country, but owing to the impoverishment of the soil she had to change her system of farming. By studying the individual cow through the scales and test, weeding out the poor individuals, and improving methods of care and feeding she had raised her production to 9,000 pounds of milk as against our 3,000 pounds.

Our Dairy Division has been studying the methods of the Danish farmer and are trying to make them general in Canada. Many farmers are getting surprises. For instance, after four years' experience in keeping records a farmer of Woodstock, Ont., had his herd of eighteen cows up to an average of 4,632 lbs. Of these, ten were below and eight above, ranging from 2,640 to 6,530 pounds. A herd of twelve cows in Quebec, after nine years of weeding, from records, showed an average of 7,055 pounds, with the narrow variation of 6,260 to 7,710 pounds per cow. Of seventeen cows in four different herds in Prince Edward Island, the average was 4,864 pounds, with a range of 3,070 to 5,860 pounds. A Mr. Thompson, of Western Ontario, started nine years ago with an inferior herd. Last year he had them up to an average of 10,000 pounds per cow, and was weeding out one with a record of 9,304 pounds of milk, yielding 281 pounds of butter fat—all brought about by individual selection and breeding to the best dairy bulls. A Quebec farmer found that eight out of twenty-two of his herd weren't paying for their board. He weeded them out and cleared more profit on the remaining fourteen.

The Dairy Division has arranged to help the farmer keep records of his individual cows. It furnishes free of cost sheets for recording weights, and preservatives for samples which will be tested free. The farmer has to provide a weighing scale, a small bottle for each cow, and one sampling dipper. He may weigh every ten days and take a sample for testing, then average results for the month. But when they get at it and find the little time required, most farmers are not satisfied without weighing every day. Three in the audience volunteered to keep records.

Replies to questions brought out the following information: Milk, testing 3.8 per cent fat, will not make as much cheese as that testing 4 per cent., and the cheese will be poorer in quality. June and September cheese are better than those made during July and August, when the milk is lower in fat content. Milk should be cooled down as rapidly as possible after milking and receive least possible exposure to the air. A tough, leathery skin on the surface is due to evaporation from exposure. This will cause particles of cream to adhere to the strainer. It takes more pounds of over-ripe or gassy milk to make a pound of cheese. There is something wrong with so much milk being sent home on Monday mornings. Farmers should provide themselves with a supply of ice. It is preferable to have night's and morning's milk sent to factory separately or the latter cooled down before mixing.

Inspector Morrow showed the importance of improvement in the care of milk on the farm. The delivery of sweeter milk to the factory meant more cheese. This year the Hillsboro Factory gave $450.00 to its patrons over last year, because of more cheese being made per hundred lbs. of milk. Improvement was shown by increased quantity of milk.

Mr. LeLacheur, of the Consolidated School, said Prince Edward Islanders could surpass Ontario's brightest when given the same opportunity, and quoted President Falconer, of Toronto University, as an example. The Island can beat Ontario in growing turnips, potatoes and oats, and, if they would apply the same principles in the improvement of their dairy herds, could whip them "hands down." With the adoption of scientific or common-sense methods in all lines of farming, such profits would be reaped that very few complaints would be heard against paying 40 per cent. on property valuation for school taxes. He spoke of a Maritime Field Crops Inspector remarking that he never saw poorer live stock in Eastern North America than in Prince Edward Island. How can we have good dairy cows if we choose one breed this year, another the next, and so on; we'll have simply mongrels when we are through. We must make our cattle more comfortable in their winter quarters. Dark stables with damp walls should be provided with large windows for the admission of plenty sunlight, and a simple system of ventilation for the removal of damp, impure air.

Headache

Biliousness, sour stomach, constipation and all liver ills are cured by

Hood's Pills

The non-irritating cathartic. Price 25 cents. Of all druggists or by mail of C. I. Hood Co., Lowell. Mass.

$3.50 Recipe Cures Weak Kidneys, Free

Relieves Urinary and Kidney Troubles, Backache, Straining Swelling, Etc.

Stops Pain in the Bladder Kidneys and Back

Wouldn't it be nice within a week or so to begin to say goodby forever to the scalding dribbling straining, or too frequent passage of urine the forehead and the back-of-the-head ache; the aches and pains in the back; the growing muscle weakness; spots before the eyes; yellow skin; sluggish bowels, swollen eyelids or ankles; leg cramps; unnatural short breath; sleeplessness and the despondence?

I have a recipe for these troubles that you can depend on, and if you want to make a QUICK RECOVERY, you ought to write and get a copy of it. Many a doctor would charge you $3.50 just for writing this prescription, but I have it and will be glad to send it to you entirely free. Just drop me a line like this: Dr. A. E. Robinson, K 1621, Luck Building, Detroit, Mich., and I will be glad to send it by return mail in a plain envelope. As you will see when you get it, this receipe contains only pure, harmless remedies, but it has great healing and pain conquering power.

It will quickly show its power once you use it, so I think you had better see what it is without delay. I will send you a copy free—you can use it and cure yourself at home.

Our Profession

The master of his profession asserts himself. "There is a reason." He treads on ground which the less confident man dare not trespass. He places his judgment, where it just fits. He sees defects that others are not conscious of. This means success to him and the confidence of his patrons a foundation firmer than stone.

We Profess One Thing

a thorough knowledge of the eye and its errors of refraction. No defects escape us unseen. We leave no error uncorrected. Time waits for none. Delays are dangerous, an examination today may save you time, money and eye sight. Examination free and satisfaction guaranteed

DIED HEARING SERMON ON DEATH

WILKESBARRE, Pa., February 17.—While the congregation of the Holy Saviour Church, of this city, was listening to an eloquent sermon on the brevity of life and the necessity of always being prepared for death, Hugh J. Flynn, a leading member of the church, who occupied one of the front pews, toppled over in his seat, tried to sit up and then fell dead.

Father Mulhall stopped the sermon, and Mr Flynn was carried out of the church, while several priests attended him. He had, however, died instantly of apoplexy. Flynn was one of the best-known engineers on the Lehigh Valley Railroad, and had been employed on important runs for many years.

MANY INJURED IN FIRE.

HAMILTON, Ont., Feb. 18 — Two men are dead, three seriously injured and a score or more painfully bruised as the result of a fire which broke out at the immense plant of the Gurney-Tilden Company, stove manufacturers.

Minard's Liniment Co., Limited.

Some time ago I had a bad attack of Quinsy which laid me up for two weeks and cost a lot of money.

Finding the lump again forming in my throat, I bathed freely with MINARD'S LINIMENT, and saturating a cloth with the liniment left it on all night.

Next morning the swelling was gone and I attributed the warding off of an attack of Quinsy to the free use of MINARD'S LINIMENT.
