

The Morning Guardian.

ESTABLISHED 1891.

THE GUARDIAN, CHARLOTTETOWN, PRINCE EDWARD ISLAND, WEDNESDAY, AUGUST 16 1899.

PRICE TWO CENTS

LABORER LIVING

And Doctors Say He May Recover.

THE VICTIM OF A PLOT

Assassins Stole His Papers, Not His Money or Jewelry—Mr. Tarte.

PARIS, Aug. 15.—(Special)—Laborer still lives and his condition is such that the doctors look for his recovery. His assassin is still large. All the indications now are that the assassination was the result of a plot. The assassins rifled his pockets, stealing some papers, fortunately unimportant. They did not touch his money or jewelry. A wallet on his person that contained important papers was not secured by the assassins. Laborer announces that a fresh forgery is the secret dossier has been discovered. Hon. J. J. Tarte is here and is much improved. He may leave for home at the end of this month.

The prize list of Canada's International Exhibition, St. John, New Brunswick is to hand.—The exhibition will be open to the public on Monday, the 11th September, at 9 o'clock a. m., and will continue open each day from September 11th [Sunday excepted] to September 20th, from 9.00 a. m. to 10.00 p. m., except the Live Stock Department, which will close at 6 p. m. The Exhibition will be closed at 10.00 p. m. on Wednesday, the 20th day of September, after which exhibitors must remove all their property from the grounds and buildings. 2.—The opening ceremonies will be held at 3.00 p. m. on Monday, the 11th day of September. Live Stock and Farm and Dairy Produce must be on the grounds at 10 o'clock a. m. Tuesday, 12th September, and may be removed after 3 p. m. on Wednesday, 20th September. All other exhibits must be in place not later than two p. m. Saturday, 9th September.

SHOT HER HUSBAND

A Bride's Fatal Fooling With a Pistol.

APOSTOLIC DELEGATE

Money Package of \$75,000 Stolen—Yaqui Indians Whipped by Mexicans.

WINNIPEG, Aug. 15.—(Special)—At Keewatin, Mrs. Eastwood, a bride, while fooling with a revolver, accidentally shot her husband in the head. He is in a critical condition. OTTAWA, Aug. 15.—(Special)—Mgr. Del Falconia, the Apostolic Delegate to Canada, is expected here Saturday. JOLYETTE, Que. Aug. 15.—(Special)—Thieves stole a money package of \$75,015 from the station here. It belonged to the Banque Nationale. GUYANAS, Mexico, Aug. 15.—(Special)—The Yaqui Indians have been routed in several engagements and the rebellion will soon be at an end. The Mexican troops have suffered heavy losses but proved entirely victorious.

THE WEATHER.

WASHINGTON, Aug. 15.—(Special)—rain with high northerly to northeasterly winds, increasing to gales.

To Cure a Headache in Ten Minutes Use Our Wonderful Cure

The famous inventor, Thomas A. Edison, was born in this house at Milan, Ohio, Feb. 11, 1847. The photograph from which the illustration was taken was made in February, 1898, before the house was remodelled. The place is now occupied by Mrs. Marion Page, Mr. Edison's sister. Mr. Page states that the photograph shows the house as it appeared when Mr. Edison lived there.—The New voice.

THE EDITOR'S MAIL.

Education For Farmers.

Str.—Few will deny that agriculture is the main stay of the people of P. E. I., and that it must continue so. Farming is not now what it was. The old system will not do; every advantage must be seized; fodder must be used to the best advantage; the rate of interest must be kept low; the result desired; seeds must be carefully selected and only the best sown; special manures to be applied for the particular crop or to make up a deficiency in the soil. In short, there is an imperative demand for higher education among the farmers, such an education as can be gained only by the help of a college training. We have a Model Farm, but little benefit is derived from it. The agriculture taught in the schools and on the course of study in P. E. W. College is of little practical use. A great deal more is required. The farmer's sons need and surely deserve a thorough practical training in agriculture, horticulture and dairying, may be had. The only opportunity of receiving such an education is at Guelph College, but the travelling expenses there and back, cost a good share of what a full course should cost. The Model Farm and Observation Stations that have been promised are certainly splendid; but would not this money be judiciously better spent if used to help provide a college? There is no doubt that were such an institution started, very many would attend, and though it would not be self-sustaining, the expenses could not be very great. I hope, others, better qualified in every way, will discuss the question; it is certainly a live one, and should come for a fair share of public attention.

MINERVA.

T. J. Dillon, the well known cheese buyer came up on the Cape train yesterday.—Sackville Post.

Remember the E. L. O. E. meeting tonight in the large class room of the First Methodist Church. Topic: "Promises" John. 14: 1-14.

PROF. W. H. WATTS of Charlottetown passed through the city yesterday afternoon to Sussex, on business, connected with the Military Camp, which opens next month at that place.—Moncton Times.

The P. E. Island Cheese Board will meet in the Council Chamber on Friday the 18th inst. at 11.30 o'clock. A private cable will be on hand for the information of salesmen. This is now one of the largest boards in Canada. Over 1400 boxes being boarded on that sales day.

The travel via the Plant Line between Boston and the province has been the largest in the history of the Line. The S. S. La Grande Duchesse, with accommodations for 500 people, has been full each trip, and the popular S. S. Halifax, so well known to the travelling public, has each trip carried her full complement. The return travel to Boston via these popular steamers promises to surpass any previous season.

The GUARDIAN regrets to learn that yesterday afternoon during the absence of her maid and little daughter, Mrs. Harrison Carvell had the misfortune to fall, causing a backward dislocation of the elbow. Fortunately a telephone was in the room and the patient being quite alone, herself summoned a physician, who quickly restored the bone to their socket. Mrs. Carvell bore the painful operation without an anaesthetic and is now doing nicely.

A meeting of the citizens of Souris was held in the Court House on Monday evening in connection with the fire service of the town. It was voted that the fire wardens or their successors issue debentures for \$2000 for 15 years at 4 per cent. The money to be used for the erection of a tank, and the purchase of a hand engine and four pumps for fire protection. A committee was appointed consisting of Messrs Jas. McCormac, Patrick St. John, Archd. Currie, James McQuaid was appointed Chairman and C. C. Carleton, Secretary and Treasurer.

The officers and members of the Young Men's Christian Association of McGill University, Montreal, are desirous of welcoming to the College and community, all new students, and to this end invite correspondence on the part of pastors, parents and friends of students, and especially students themselves. The Association is the only distinctly religious organization in the College, and it also aims to carry on considerable social work. It occupies a building of its own, located in close proximity to the College grounds, and equipped with numerous conveniences. The annual "Student's Handbook" for the ensuing year, is now ready, and will cheerfully be mailed on application. All communications should be addressed to General Secretary, 844 Sherbrooke St., Montreal, Canada. Mr. Geo. Irving, Vernon River, is Secretary.

DEWEY IS LAID UP

The Jersey Lily Takes a Second Husband.

THE PRINCE OF WALES

Sends Good Wishes—War in Transvaal Seems Imminent—Steamer Ashore.

LONDON, August 15.—(Special)—Admiral Dewey is indisposed at Leghorna and his departure for Florence is postponed.

Mrs. Langtry has been married to Hugo Gold De Bathe aged 28, the eldest son of Sir Henry Percival De Bathe, Baronet and Crutcheon veteran.

The Prince of Wales was in the secret and sent the couple his private congratulations.

There is no fresh news from the Transvaal, but all indications are that war is imminent.

An American Government steamer is ashore at the mouth of Corrigor harbor, at the entrance to Manila Bay.

P. E. ISLAND'S PREMIER, Hon. Donald Farquharson, Premier of Prince Edward Island, was in the city for a few minutes yesterday, passing through on his way from the Island to Ottawa. He told the reporters at the Depot that his visit to Ottawa was in connection with the apportionment of moneys to be paid by the province for the railway being built on the Island. He intends spending but one day at the Dominion capital, and expects that Sir Louis Davies will be with him on his return.—St. John Telegraph.

ROYAL Baking Powder

Made from pure cream of tartar. Safeguards the food against alum. Alum baking powders are the greatest menaces to health of the present day.

A Slaughter Sale

—OF—

CROCKERY

For 30 days I will sell Dinner Sets, Tea Sets, Chamber Sets, Jardinieres, Cheese Dishes, Fancy China, Lamps, and all kinds of Glassware. Cheaper than ever sold before in this city.

LEWIS' OLD STAND

Grafton Street. Opposite North Side Market

THE END OF THE WORLD.

Is Comfortably Far Off Yet, According to One Scientist.

Scientists do queer things sometimes. One of them, according to the New York Herald, has attempted to calculate in cold mathematics how soon we may expect judgement day; and he has prepared a paper on the subject, which he expects to read before the American Association for the Advancement of Science when it meets next month in Columbus. Startling as the total amount of energy stored in the sun and the fact that the orb of day is continuously distributing energy equal to the work of seven men for each area of the earth's surface is the size of a human body, our statistician calculates that it will require 3,375,000,000 years of outpouring before a sensible diminution of the quantity of energy given out can be detected. Up to this distant period mountains will stand, rivers will run, plants will grow, and animal life will exist very much as it does to-day.

If you realize that solar energy, as soon as used, reasserts itself in some other form either as sound, electricity or simple motion, it is easy to see that this estimate is too small rather than too great. At any rate, the world is not liable to stop going for a few years yet, according to his reasoning.

Some idea of the vastness of the force that is meted out to us—from the physical source of earthly life may be gained, he says, by considering that if the energy that the sun gives to the earth in a single day could be bottled up and directed against Niagara Falls, it would cause the great body to dash back up the hill again for 4,000 years. It would cause every single creature instantaneously to blight and wither; the ice round the poles would be melted in one and three-quarter minutes, and in another eleven seconds all the oceans would be turned into steam.

If transmitted into electricity a spark would flash from the earth as far as the planet Jupiter. It collected into a single sound, the vibrations thereof would not only break every ear drum in the world but would sprout the giant trees of the forest, and even level mountains. It changed into a momentary flash of light its burst would be so blinding as to penetrate the walls of the deepest dungeons and destroy the sight of every living creature. In brilliancy this flash would exceed the brightness of the sun itself over a million times.

For one man to expend an amount of energy equivalent to that which the earth receives from the sun in the tenth part of a second he would have to work hard continuously for 87,000,000 years. This calculation is remarkable in that its results differ by more than 3,374,000,000 years from the period when scientists generally believe that the world will come to an end. Such experts as Dr. Wien and Huxley believed that it could not sustain life two million years hence.

HOLIDAY READING

One cannot enjoy a holiday without a book to read; or a magazine; or a newspaper. Some take one, some take another, when they go off for an outing. One has a favourite author, one has a favourite magazine, one a favourite paper. And they go on the holiday generally. We have hammocks too—a large stock.

Now at Carters' Bookstore

you can get your wants in this line supplied. Visitors to the Province will find the latest Books, Papers and Magazines on the Counters, and the shelves stocked with standard authors. Drop in. See our Books and Fancy Goods, &c.

SOUVENIRS

Photographs of P. E. Island Scenery on China-ware, Views, etc. A full line of Fancy Goods, Stationery, etc. Books and Papers ordered by mail, and promptly forwarded to customers.

Geo. Carter & Co'y.
