MONTEITH - FORBES—The home of Mr. and Mrs. D. K. Forbes, 108 Smith's avenue, Truro, was the scene of a pretty wedding Wednesday evening when their only daughter, Helen Winifred, was united in marriage with Willard Randolph Monteith, by Rev. J. D. MacLeod of St. Andrew's United Church. The bride, who was given in marriage by her father, looked exceedingly lovely in white silk organdie and taffeta, carrying an arm bouquet of yellow chrysanthemums. She was attended by Miss Dorothy Kaye of Halifax. The groom was supported by J. G. McDonald, Liverpool. The wedding march was played by Miss Shirley Blois. Little Miss Louise Chase in peach organdie made a charming portress. After the ceremony a luncheon was served to about 75 guests from Truro, various parts of the province and the United States by Mrs. J. P. Johnstone, Mrs. Walter Casson, the Misses Edna Mingle, Edith Christie and Norah Dickle of Truro, also Mrs. J. R. Baker, Mrs. Nelson Corning of Yarmouth. Coffee was poured by Mrs. H. C. McDougall and Mrs. F. C. Layton. Mrs. L. M. Christie acted as usher. The bride's going away costume was a swaggar suit of cruise blue tweed with grey squirrel trim and accessories to match. The many beautiful presents received by the bride including silver, cut glass, spode china and cheques, testified to the esteem of this popular couple. After a honeymoon spent in Saint John and P. E. I. they will reside in Yarmouth.—Halifax Herald.

GERMANY DRAFTING LAWS AIMED AT BACHELORHOOD AND CHILDLESS WOMEN

BERLIN, Sept. 13.—Aiming at more marriages and larger families the Government announced that it was preparing a number of laws to make bachelorhood unprofitable. Likewise, women may be taxed if they are married and without children, regardless of whether it is "their own fault," or not, it was intimated.

TOO MUCH MONEY TOWNSHIP'S FLIGHT

CHARDON, O., Sept. 13.—Consider the plight of Chesheland Township—it has so much money it doesn't know what to do. This month, the township's treasury will receive \$171,000 as the second payment of its share of inheritance tax from the estate of Walter White, killed in an automobile accident nearly two years ago. The first payment of \$202,000 has been spent for new roads, a fine new school building, the payment of village debts and relief for the poor.

Piles Go Quick

Without Salves or Cutting Thousands of sufferers from itching, bleeding or protruding piles have learned that quick and permanent relief can only be accomplished with an internal medicine. Neither salves nor cutting remove the cause. Bad circulation of the blood in the lower bowel causes piles. The veins are flabby, the bowel walls weak—the parts almost dead. To end Piles an internal medicine must be used to stimulate the circulation, heal and restore the affected parts. Dr. J. S. Leonard's HEM-ROID has been the first to discover a real internal Pile remedy. He called his prescription HEM-ROID, and prescribed it for 1000 patients with the marvelous record of success in 990 cases, and then decided every Pile sufferer should be able to get HEM-ROID tablets from their own druggist with a rigid money back guarantee. Dr. J. S. Leonard's HEM-ROID has an almost unbelievable record of success right in this city. So why waste time on external treatments or worry about an operation when Geo. E. Hughes and Taylor Drug Co., of Kensington invites every Pile sufferer to try HEM-ROID with guarantee of money-back if it does not end their Piles, no matter how stubborn the case?

TRAVEL ON INCREASE

(Special to the Guardian)

MONTREAL, Que., Sept. 13.—Returning confidences on the part of the people led to improvement in the tourist traffic in Canada after the opening month of the season with the result that August travel was very heavy on the Canadian National System and there is yet a prospect of heavy traffic to and from Chicago in connection with the century of progress exposition being held there. It was stated by Mr. C. W. Johnston, general passenger traffic manager of the Canadian National Railways. Excursions from the Prairie Provinces to the Pacific Coast during the early season and also at later dates helped considerably in swelling the movement of holiday seeking Canadians.

Exhibitions both in eastern and western Canada reported attendance increased over those of other years. The holding of the world's grain exhibition at Regina attracted many people in the Prairie Provinces while in other parts of the Dominion the low rate excursions arranged by the railways attracted many passengers and helped to improve earnings.

The prevalence of hot weather during the time of the world's fair has been in progress at Chicago has caused many people to defer their visits and it is anticipated that during the balance of September and October several thousands from Eastern Canada and the Eastern United States will take advantage of the opportunity to visit Chicago and the Fair.

The movement of sportsmen, both fishermen and hunters into Canada this year, promises to be well up to expectations. During the fishing season several important parties have come into Canada from the United States for fishing outings at points along the Canadian National Lines in Eastern Canada and in Jasper National Park.

With the opening of moose hunting in Quebec and Ontario several parties are due to pass through Montreal enroute to the north woods. It was stated by Mr. C. K. Howard, manager of the tourist and convention Bureau, while several important parties are now out in the mountain adjacent to Jasper National Park.

While the moose and deer season in Nova Scotia does not open until October 10th and in New Brunswick until October 20th, a considerable number of enquiries have been received from sportsmen.

Large flocks of geese, brant and duck have been reported in all three Maritime Provinces, Nova Scotia, New Brunswick and Prince Edward Island, and there should be some good bags available to hunters. The season opened on Prince Edward Island on September 15th and for geese and brant October 1st except in Shelburne and Queens Counties where it opens November 1st. The season for duck, geese and brant in New Brunswick opens September 15th except in the Grand Manan Island group which commences October 15th.

Post Era Stars Stage Comeback In Small Roles

HOLLYWOOD, Sept. 12.—(C.P.)—Hollywood has gone sentimental about its motion picture stars of another era, and many of them are getting comeback chances in bit roles at \$10 and \$15 a day.

The idea originated in the assistant directors' branch of the Academy of Motion Picture Arts and Sciences. A preferred list was assembled and it was agreed to call upon the forgotten stars wherever possible.

Recently, in the film "Pilgrimage," five stars of a past era got their chance to start the long, arduous climb back to prominence. They are Betty Blythe, once a queen of vamps; Robert Warwick, once the greatest of leading men; Ruth Clifford, who quit the films for motherhood; Francis Ford, a former director, and Ross Rossanova, a noted character actress.

Three years ago Pat O'Malley, a dashing Irish star of the films, was earning \$2,500 a week and couldn't take all the roles offered him. Six months ago he started the round of the studios, looking for extra parts—for any work that would enable him to keep his family going. Finally, Hollywood remembered. He got a bit role, tumbled the small part, and it isn't likely he'll be out of work for some time.

The decision to call upon the once greats gave Miss Clifford a

In Memoriam

HUGH MACPHEE

The funeral of the late Hugh MacPhee, who died at Ottawa, on Friday, September 1, was held at Peter's Road on Monday. The service, in charge of Brother Masons and comrades of the Montague Branch of the Canadian Legion, was conducted by the Rev. Mr. Douglas in the Peter's Road Presbyterian Church.

A short service was held at the home of his mother-in-law, Mrs. Johnston, after which the flag draped casket was borne across the road to the church by six brother Masons, who were also comrades of the Great War. At the Church door a uniformed Guard of Honor presented arms and upwards of one hundred returned men formed into two ranks as the casket was carried in.

Mr. Douglas took as his text "In My Father's House are many mansions" found in Luke's Gospel. Rev. O. E. Armstrong read the scripture and led in prayer. Mr. Willard McLean sang a favorite song of the deceased "There will be no shadows." The Brooklyn male trio sang "Tread Softly," unaccompanied. Hymns sung were "Asleep in Jesus" and "Rock of Ages." The remains were then carried to the nearby cemetery followed in order by Masons, Guard and Returned Men. Upon arrival at the grave the Masons performed the last rites of the order after which the Guard of Honor fired the farewell salute followed by the Last Post and two minutes silence and to the last notes of the Reville all that was mortal of a brave soldier and a kind and loving husband and father was lowered into the grave.

The late Mr. MacPhee was thirty nine years of age and was born at Sydney, the son of Alexander and the late Katherine MacPhee. He enlisted with the 17th Field Battery and went overseas at the outbreak of the war. At the Battle of the Somme he sustained severe gunshot wounds in his head, arms and legs. Unfit for further service on the battlefield he was returned to Canada in 1917. In 1918 he went to Halifax as an official of the D. S. C. R. and in 1929 was appointed Chief Revising Officer with headquarters at Ottawa. Shortly previous to his death he spent two weeks vacationing at Peter's Road with his wife and two children who are left to mourn besides the following family. Father at Sydney, C. B., five brothers, Jack at Montreal; Walter at Sydney Mines; Murdoch, Sydney; Stewart at New Jersey and Dan at New York. Three sisters, Mrs. Kunkle, New Jersey; Christina and Elizabeth at Sydney.

The following floral tributes were offered in sympathy. Broken Circle—Wife and Family. Wreath—Board of Pensions Comm., Ottawa. Wreath—St. Andrew's Lodge, A. F. & A. M. —Spray—Major Hester and Staff, Ottawa. Wreath—Dr. MacKasey and Staff, P. E. I. and N. S. Wreath—Maud and Garf. Wreath—Percy and Myrtle. Spray—Uncle John, Aunt Minnie, Jereine, Winnie and Lester. Crescent—Louis and Annie. Crescent—Mr. and Mrs. E. J. MacFadyen and family, Somerville, Mass. Spray—Mr. and Mrs. J. H. Codner, Halifax. Spray—Lillian Johnston and Vera Sutherland.

Spray—Lou, Bee and family. Wreath—Janet, Earle and family. Spray—Fred and Mayburn Sheaf—Mother. Wreath—Alma. Crescent—Evelyn, Mary and Anna. Spray—Aunt Mary. Many telegrams and letters of sympathy were received from Ottawa, Montreal, Halifax, Sydney, Pictou and Westville. 1110.

chance in a recent picture. Gladys Hulette, who was a luminary, has been placed. Louis Natheau, the former DeMille villain, is being given small roles. Alice Lake has another chance. Jean Acker, Rudolph Valentino's first wife, who once drew \$3,500 a week, is doing a comeback role. A new picture is using 78 name parts and includes Marie Prevost, Miss Clifford, Julia Faye, Florence Lake, Miss Blythe, Cissie Fitzgerald, Natalia Morehead and Jack Richardson.

Lillian Rich, Clara McClaren, Florence Turner, Mary Kimball Young, Jerome Storm, the former director; Wallace MacDonald, Bill Kimer, the Wallace Berry of his day; Myrtle Steadman, Flora Finch, Paul Panzer, who has "died" 500 times on the screen in more than 100 different ways as a villain; Julianne Johnson, talented dancer; Wilfred Lucas, Helene Chadwick, Snub Pollard—but the list is almost inexhaustible—and all are either working on the lots now or else in line for parts in forthcoming productions.

Last week ended a year and one-half during which Patricia Maguire has recognized no one, said nothing though doctors say her coma is neither complete nor unusual. She has been removed from her house twice. For a week's observation at a Chicago hospital and a half day at West Suburban Hospital. Other than that her only movement has been this summer from the second-floor front room of her mother's yellow stucco, seven-room house at No. 523 Clarence Street, down to a first-floor room. She has slept through two birthdays, is now 28. Since Patricia fell asleep the night nurse, who cared for her five months, has married borne a baby now three months old. A twitching of the mouth at intervals is the only outward indication that Patricia is not just sleeping. She is still an attractive girl except that her face shows her increase in weight from 125 to 165 lbs. Tall (5 ft. 9 in.) she was known as a stately, dignified reserved girl who did not drink or smoke. She played a good game of golf, skated, swam

Announcing Our Annual Autumn Opening Displaying For Your Inspection on Thursday Afternoon, Sept. 14th. from 2 to 5 p. m. and following afternoons all that is new in New Coats, New Suits, New Dresses, New Millinery, Hand Bags, Gloves and Lingerie

The New Coats — They're New. They're Better, and they are less expensive. Puffed sleeves, all fur sleeves, gathered epaulets, etc., are some of the many new fashion hits for Fall. See the New Handbags, Hosiery, Gloves and Lingerie.

Woman Has Been Sleeping 18 Months

During This Lengthy Period She Has Showed No Signs Of Consciousness—Has Increased Weight Doctors Puzzled.

Because of newspaper interest rather than the unusualness of her case the most famed sleeping sickness victim in the U. S. is Patricia Maguire, of Oak Park, Ill. In January, 1932, her family noticed that it was getting more and more difficult to awaken her in time to catch an early morning elevated train to get to her secretarial job. Her friends observed that her eyelids drooped early in the evening, that she drowsed easily. She was taken to Dr. Eugene Traut, of Oak Park, to oculists and other doctors for examination. Returning from work one cold night in February, she fell asleep on the "L", rode past her stop, had to be roused by the conductor at the end of the line. She was barely able to make the ten blocks to her home without falling to sleep again. Her eye-droppings and twitchings increased. Her sister, Mrs. Gladys Hansen, chided her about attempting to imitate a cinema actress. Then she became very quiet, did not talk at all during the ten days preceding the start of her coma.

She sleeps quietly in an immaculately kept full-sized walnut bed, last week she was wearing white cotton pyjamas. She lies so quietly that hardly a wrinkle can be seen in the white covers. She has been on a liquid diet ever since she fell asleep. At first she was fed through the nose (over 1,000 nasal feedings). Now she is being fed orange juice, egg-nogs and milk through the mouth. The better to withstand any disease that might set in, Patricia was fed every two hours day and night when she was first ill. Lately she has not been fed from 10 p. m. to 6 a. m. Her increased weight aided her in throwing off pneumonia which almost did away with her last winter. Tall, dark, Dr. Eugene Traut has been physician on the case from the beginning. Twice a week for a time he injected in Patricia's back blood obtained from men who had had her disease. He has also given her a blood transfusion, and non-specific germ-killing typhoid inoculations. The Maguire family is keeping a detailed, secret record of Patricia's diet, medicines, treatment, with the thought that they may some day write a book about her.

Last week ended a year and one-half during which Patricia Maguire has recognized no one, said nothing though doctors say her coma is neither complete nor unusual. She has been removed from her house twice. For a week's observation at a Chicago hospital and a half day at West Suburban Hospital. Other than that her only movement has been this summer from the second-floor front room of her mother's yellow stucco, seven-room house at No. 523 Clarence Street, down to a first-floor room. A twitching of the mouth at intervals is the only outward indication that Patricia is not just sleeping. She is still an attractive girl except that her face shows her increase in weight from 125 to 165 lbs. Tall (5 ft. 9 in.) she was known as a stately, dignified reserved girl who did not drink or smoke. She played a good game of golf, skated, swam

Probs Experts Have Worries All Their Own

LEICESTER, Eng., Sept. 13.—(C. P. Cable): Troubles of the weather-man were outlined today to the British Association for the Advancement of Science by Professor Sir Gilbert T. Walker, president of the Mathematical and Physical Sciences Section. Difficulties of long-range weather forecasting were not, in general, adequately recognized, he said, in an address on "Seasonal Weather and Its Prediction." Sir Gilbert is Professor of meteorology, in the Imperial College of Science and Technology. "The causes of unusual weather seem hopelessly obscure to the layman," said Sir Gilbert. "Hence primitive ideas, surviving in the

depth of our natures from countless ages of magical practices, still come to the surface in connection with it." In India, Sir Gilbert had been officially asked what was the need of a difficult scientific inquiry into the causes of drought when Hindu astrology would indicate what was coming.

Some of the most progressive countries in the world were inclined to make weather predictions on an insecure basis, Sir Gilbert declared. Their technical staff did not realize that though the prestige of meteorology might be raised for a few years by the issue of seasonal forecasts, the harm done to the science would inevitably outweigh the good if the prophecies were found unreliable.

"We can only learn from experience that while the forecasting efforts of a charlatan are judged by their occasional successes, it is the occasional failures of a government department which are remembered against it."

Sir Gilbert believed the almost universal idea that weather must repeat itself after a certain number of years found its origin in the ancient belief of the control of the earth's affairs by the heavenly bodies with their definite cycles—a belief which clearly showed itself on the supposed influence of the moon on the weather. Another regrettable feature of current practice, he said, was that of classing together processes with true periods and those sometimes called "quasi periodic" of which the true period varied.

Dealing with the development of seasonal predictions in various parts of the world, Sir Gilbert said in America the relations of weather and crops had probably been worked out more scientifically than in any other country, so that the commercial value of long range predicting had long been recognized. This value applied not only to farmers but to those interested in water supply, in power schemes, in transport and in commerce generally.

In conclusion, Sir Gilbert said that although seasonal foreshadowing was still very imperfect, it had come to stay. He pleaded for a much severer standard in handling questions of periodicity. No anticipations should be published until experience of 15 or 20 years had justified a less cautious policy.

When it comes to belts, you may be frankly belted, or you may be beltless in front and belted at the back. Inset belts that become free at the sides and buckle at the back are a happy compromise.
