

Red Rose Orange Pekoe Tea is truly economical. A half pound makes almost as many cups as a full pound of cheap tea costing 50c to 60c.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

UNCLE RAY'S CORNER

If we look at a mountain, we are apt to think that it is the most solid thing in the world. We may say to ourselves, "There is something which cannot be moved—even by man, with all his power." Brains cannot transport a mountain.

A view of Bolan Pass

Yet little drops of water are moving in torrents. Every day that it rains on a mountain, every day that snow melts, water carries away bits of the mountain. Scientists know that the Allegheny mountains were once far higher than they are today. Though the course of millions of years, they have been worn away. If the earth last 10,000,000 years longer, the Alleghenies will probably be cut down to flat fields.

The Rockies are also being worn away. They are not so solid as the Alleghenies.

leghenies, and do not show so many signs of the action of water; but the time will come when they are rounded and smoothed down.

When we look at a river, does the water seem clear and pure? Very seldom. The usual thing is for the water to be brownish, because of the mud which it carries. Part of that mud—in the case of a long river—has traveled hundreds of miles, often coming from a mountain top.

You have heard that dripping water wears a way a rock. That is also true of melting snow or rain coming from a mountain. Great layers of rock are worn down by mountain streams. A good example of the power of water is found in Grand Canyon. There the Colorado river has cut a path through thousands of feet of solid rock.

Many mountain passes have been formed by streams and rivers. The rivers may have dried up, but the passes remain and help travellers.

One famous pass is known as Bolan Pass. It is in the mountains of Baluchistan (a small country of Asia) and runs for a distance of 54 miles. At some points this pass is so narrow that three persons could scarcely ride abreast. Cliffs rise on either side to a height of 700 or 800 feet. During winter, icy winds sweep through Bolan Pass.

LIVESTOCK REPORT

MONTREAL, Jan. 14.—Cattle receipts 1714. The average quality of the cattle was better than last week, but buyers were offering from fifty to seventy-five cents lower. At time of writing practically no sale had been made. Calf receipts 542. Calves were in good demand. Grassers brought from \$0.75 to \$7.00. And veal calves from \$10.50 to \$15.00, with the bulk of sales between \$13.00 and \$14.00. Quotations, good veal \$13.50 to \$15.00, medium \$12.50 to \$13.50, common \$11.00 to \$12.50. Grassers, \$0.75 to \$7.00. Sheep receipts 1978. There were no top lambs. Lambs were of common to medium quality, mostly bucks brought from 19.25 to \$11.00. Sheep were stronger at \$4.00 to \$6.50 with a few of the worst at \$3.50. Quotations, Ewes \$3.50 to \$6.50, lambs, common 10.25 to \$11.00.

Hog receipts 1820. Hogs were about 25 cents lower. \$10.75 fed and watered flat was the standard quotation. Rough or heavy lots and lots containing an odd sow sold for \$10.50 and on one market where only 220 hogs were offered, sales were made up to \$11.50 or better. The bulk of the hogs were sold for \$9.00.

In Memoriam

HARRY D. LOWTHER

The community of Charlottetown was greatly shocked to hear of the sudden death of Harry D. Lowther, who passed away at the Prince County Hospital on the 9th of January, 1928, at the early age of 43 years. The deceased was a son of David I. and Mrs. Lowther, of North Charlottetown, and resided in the community all his life, and was one of its most successful farmers. Twenty years ago he married Ellice Laird of Cavendish, and the union was a most happy one. Besides his parents, two brothers and four sisters, he is survived by his widow and three children, Margaret, Annie and Edward, who have however, the memory of a loving and companionable husband and father to bear them up in their bereavement.

The community of Charlottetown is already beginning to realize to what extent they will miss Harry, as his bright, lovable nature made friends for him everywhere, and with all classes and creed. As one friend so well said: "to know him was to love him." He was ever ready to assist anyone in trouble or distress, and never thought of any return kindness. He served faithfully on the School Board and was connected with any movement for the betterment of the community.

The funeral was held from his late residence to the United Church cemetery at Charlottetown on January 11th, Rev. A. J. Reynolds, of Belvedere, conducted the funeral services, assisted

Western Guardian

—WESTERN AGENT—Mr. C. J. Gallant is Guardian Agent in Howland, and will be pleased to receive new and renewal subscriptions. 1-871

—THE CHARLOTTETOWN GUARDIAN may be obtained from the Hunter Book Store, next Bank of Nova Scotia, Water Street. Subscriptions will be received and advertisements taken for insertion in the Guardian.

—"CHICKEN" GALLANT WITH THE CRYSTALS.—Official word has been received from Mr. Barnhill, Secretary of the Maritime Hockey Association, Truro, N. S., that "Chick" Gallant, who recently returned to Summerside, is eligible for membership in the Crystal team. Mr. Gallant will, therefore, play with his old team for the balance of the season and will be in his old place in the line-up tonight at the Crystal rink in the league match against the Victorias of Charlottetown. —S.

—FORMERLY OF MINIMIGASH—Word has been received at Minimigash, of the death on Tuesday last of Mrs. Alexander Martin, who passed away at her residence in Shediac, N. B., after a long illness at the age of seventy years. She was twice married, her first husband having been Mr. Thibodeau, of P. E. Island, and of her children of that marriage, three daughters and one son survive, all residing in New Brunswick. She is survived by her second husband and three children of the second marriage, two married daughters residing in Shediac and one son in New York State. Interment took place on Friday last to St. Joseph's Catholic Church and Cemetery at Shediac, Rev. J. J. V. Gaudet officiating. —S.

—Miss Freda Bowness, of Summerside, was a week-end visitor to Kensington. —S.

—Mrs. Will Strong, of Summerside, is on a visit to her parents, Mr. and Mrs. James H. Yeo, of Port Hill. —S.

—Mr. Charles Bentley, who was the guest last week of Dr. and Mrs. E. T. Tanton, Summerside, returned on Monday to his home in Charlottetown. —S.

—Miss Helen Mills, daughter of Mr. and Mrs. Ernest Mills of Summerside, left this morning for Windsor, N. S., to resume her studies at Edgemoor Church School, after spending the Christmas vacation at home. —S.

—Amongst the students leaving Summerside to resume their studies at Prince of Wales College on Monday after the holidays, were: The Misses Sybil Tanton, Irene Linkletter, Norma MacQuarrie and Helen Rankin; Messrs George McDowell, Claire and Benjamin Tanton, Jack Baker and Charles Bentley. —S.

Eastern Guardian

—EASTERN AGENT—Mr. J. W. Murdock is Guardian Agent in Montague and will be pleased to receive new and renewal subscriptions. 11

—WHIST DRIVE.—The regular whist drive was held in St. James Hall, Georgetown, on Wednesday, Jan. 9th, and was a decided success. Whist was played from eight until ten-thirty. The ladies prize was equal in value to Mrs. Sampson and Mrs. Lavers, and was drawn by Mrs. Sampson. The gentlemen's prize was won by Bernard Batchelder. A delicious lunch was served by Mrs. D. P. McKinnon, Mary Macdonald and Genevieve Kiggis. —A

—HELPFUL LECTURE.—On Monday, Jan. 7th, Dr. Creelman, Provincial Health Officer, delivered a lecture on "Tuberculosis and the Need of a Sanatorium" in the Town Hall, Georgetown, under the auspices of Georgetown Women's Institute. A large and enthusiastic meeting greeted.

Don't Let That Cold Turn Into "Flu"

That cold may turn into "Flu," Gripe or, even worse, Pneumonia, unless you take care of it at once.

Rub Mustrerole on the congested parts and see how quickly it brings relief effectively as the messy old mustard plaster.

Mustrerole, made from pure oil of mustard, camphor, menthol and other simple ingredients, is a counter-irritant which stimulates circulation and helps break up the cold. You will feel a warm tingle as it enters the pores, then a cooling sensation that brings welcome relief.

Better than a mustard plaster

BRINGING UP FATHER

The Daily Argument

AUNT HET

BY ROBERT QUILLEN

"I wasn't much surprised when I seen Harry's bride. He's been talkin' lately about the pretty ones bein' silly, like he was tryin' to reconcile himself to somethin'."

POOR PA

"Emma gets up an' volunteers to do a lot for charity, an' then sees around an' talks other people into doin' it all for her."

ed the learned lecturer on this, his first appearance in the eastern metropolis, and by the splendid attention given to the lecturer the audience showed how much they appreciated the occasion. Dr. B. C. Keeping of Georgetown, capably acted as chairman, and introduced Dr. Creelman. At the close of the meeting a vote of thanks moved by Rev. Owen Kiggins and seconded by Mrs. W. W. MacLaren, was tendered the lecturer. The musical program included a piano selection, Mrs. A. E. Jenkins, solo, Miss Myrtle Ross and Misses Helen Donovan and Isabel Lavers. —A

BIG MUSEUM

LONDON, Jan. 14.—The Natural History Museum in South Kensington, the Science Museum in Exhibition-road, the Museum of Practical Geology in Jermyn-street, and the Royal Botanic Gardens, with the Herbarium and Museums at Kew, are four great scientific museums in the London area maintained solely or chiefly from public sources. Each has its visitors of the scientific kind. Each has its clientele of serious specialists, who visit the collections with a defined purpose and who know something of the continuous research that lies behind the public exhibitions.

These museums, however, and their trained staffs have an immediate practical utility, on which much stress is laid in the Interim Report of the Royal Commission on National Museums and Galleries, because they are an invaluable and not sufficiently recognized agency in the development of industry and of industrial enterprises. A much larger part of the time of the staff than is generally understood is occupied not merely by curating and abstract research, but in studying and advising on problems of immediate practical moment.

Insects dispute man's lordship of the earth more seriously than any

other living creatures by direct attacks on his food, his health, and his habitations. If any insect plague is to be fought, the exact species must be identified as a first step towards distinguishing between harmful and harmless and towards finding out the weakest point in the life history against which measures may be taken with most chance of success. Advice is sought from the staff at the Natural History Museum. The whaling industry is recognized to be grave peril from reckless exploitation. When it was decided to collect knowledge on a sufficiently broad basis for the devising of international protection and regulation the Natural History Museum was at once called on. The scientific staff of the Discovery expedition is now at work at the Museum examining the results of their inquiries in southern seas.

One example is sufficient to prove the practical advantage to the Empire and the world of the Royal Botanic Gardens at Kew. The cultivation of rubber and the industries dependent on it represent a value of hundreds of millions of pounds, and have become possible through the agency of Kew. In June 1878, P. E. Wickham arrived at Kew with 70,000 seeds of the Brazil wild rubber tree, which he had been com-

municated by the India office to establish. These were sown on a space of 300 square feet. Some 2,500 germinated, and in August, 1890 were sent to Ceylon in charge of a skilled gardener. About 1,700 reached Dr. Thwaites at the Peradeniya Botanic Gardens in excellent condition. The plants were established in Ceylon, and the plantations of Para rubber in India, Burma, Malaya, and elsewhere are the result.

At the Museum of Practical Geology the expert staff are constantly giving advice and information on ores and minerals of economic value and on gems and ornamental stones. The Science Museum is designed to illustrate and aid the application of science to all branches of industry, and these functions it performs by a magnificent library and by loan collections and apparatus.

FORMS NORTHERN LINK The Bank-Windermere Highway is the final and northern link in the great Grand Circle Tour. This route covers approximately 5,000 miles through Canada and the western United States, touring sixteen national parks, four in Canada and twelve in the United States.

A coal pier to be erected by a railway at Darien, Manchuria, will cost \$5,500,000.
