JUNIORS' WINTER COATS
Warm woollens and camelot, fur trimmed with warm cuddly collars. The season's latest shades. **\$6.95 \$14.95** Sizes 4 to 14

U.S. POTATO MARKET REPORTS

Latest potato marketing news from the United States, received by Mr. M. G. McNeely, manager of the Associated Shippers, Inc., indicates that the harvest is in full swing in all the States and that shipments will likely be heavier during the remainder of the month. The heavy crop States have more potatoes than can be stored conveniently and a great many are going into temporary quarters. These will have to be moved before cold weather.

Weather conditions for the past six weeks have been ideal for potatoes in all of the States from Wisconsin east and frosts are holding off. The October crop report indicates a total production of 362,391,000 bushels for the season, compared with 337,141,000 bushels last month and 320,353,000 bushels last year. The heavy holdings are all in the north and east, and the Western States still have the lightest crop in a great many years.

The increase of 25 million bushels during the past month was a surprise. The September rains and delayed frost put on a lot of tonnage in Wisconsin, Michigan, New York and Pennsylvania.

The unequal distribution of the late crop this season is reported as unfavorable for all markets. The heavy supplies are near the large centers of population. The movement of these supplies, it is stated, will depress the markets in most of the key cities. Unless heavy government buying makes its appearance in the large producing areas prices will settle at somewhat lower levels before cold weather.

Liberal rainfall and mild temperatures were the order of the day through September over Michigan, Wisconsin, northern Ohio, New

York and Pennsylvania, and frost held off until the potatoes were fully matured in Maine. There has still been no frost of any consequence in most of these states and it will not be surprising if there is some further improvement in yields this month. The blight in New York State is confined to a few of the south-central counties that do not stack up high in production. In these the blight came so late that the damage will not be estimated until after the harvest. Any change in the later estimates for the country as a whole will likely be upward, but they should not be material.

All of the increases in the crop this season are from Wisconsin east, and this particular group of States has the largest crop on record—larger than either 1928 or 1924. Partially offsetting this the States west of the Mississippi River, including Minnesota have the smallest crop since 1919. There has never been such a preponderance of the available supplies in the eastern half of the country.

Water Shipments From Maine

This, it is predicted, will mean a shift in the usual marketing territory for quite a few states, and in fact it has already developed. Maine is shipping by water around to New Orleans, Galveston, Houston and other Gulf ports, and reshipping by rail from Houston to nearly all interior Texas cities at lower delivered prices than Idaho, Colorado or California are quoting. Maine quality and sizes are very fine and their only disadvantage in the Texas markets is the length of time in transit. Recent Maine quotations were \$1.40 cwt. delivered to such Texas cities as Austin and San Antonio, and around \$1.18-\$1.20 dock at Houston.

The daily Presque Isle reports are showing shipments of extra nearly every day to such middle western cities as Detroit, Cleveland, Cincinnati, St. Louis and practically all markets of importance between. One car of Maine Green Mountains arrived in Chicago early this month. The same is true of the Southeast. This outside trade is not heavy yet, but it indicates some of the territory that the Maine

shippers are reaching out for to move the surplus potatoes before cold weather comes. So far: New Jersey and Long Island have kept them mostly out of New York City and Philadelphia but they are expecting to get into these markets in volume after this week.

Truck Activity

Minnesota is being over-run by trucks coming from as far south as Kansas and Nebraska, and between this truck activity and the filling of the Government Relief orders in the Red River Valley most of the Minnesota, and North Dakota markets are out of line with the general shipping prices. Growers in the Red River Valley are receiving 50-55 cwt. bulk compared with 40c in Wisconsin and Michigan, and from 50c to 60c for almost field run potatoes from the truckers around Wadena.

The Nebraska and Colorado crops are so small that the growers have practically cut loose from the general markets, and it is doubtful if either State amounts to much in a carlot way.

Idaho is, as usual, the important western State this side of the Pacific coast. The crop is smaller than last season and has not improved during the late summer. The average quality is also much poorer both as to size and shape than last season.

The Idaho growers are particularly fortunate in two respects this season. First that they have a small crop considering the acreage planted, and second that Colorado and Nebraska almost failed completely. Between them and the Pacific Coast there is Yakima with a fair crop, there is the Klamath Falls section of Oregon; with probably the best crop on record, and then there is the California crop which was boosted a million bushels during the past month.

The present potato crop is a little larger than in 1932 and somewhat smaller than in 1931. It is not a large crop as United States crops go and taking both the 18 late surplus states and the 30 late states as a whole the crop is almost the same as the 1927-1931 five-year average. About 14 million bushels of the increase over last season was

in the early and intermediate states which are now through marketing. The fact remains, however, that it is terribly lopsided and a great many potatoes must be moved from Maine, Michigan and Wisconsin this fall. These states dominate all the big markets from Chicago, east, and nothing but fairly low prices can be expected until the surplus is whittled down to reasonable limits. This may take most of the fall and part of the winter, at the best, regardless of the ultimate wind-up of the season.

ELDON SCHOOL

Honor roll for the month of September.

Grade IX (Sr.) 1 Jean Halliday, 2 Ruth Gillis.

Grade X (Jr.) Minnie McMillan, 2 Buddy Larabee, 3 Cassie MacPherson.

Grade IX—1 Alice Halliday, 2 Beryl Vandierstine, 3 John Penny, 4 Marie Davies.

Grade VIII—1 Aileen McMillan, 2 James Halliday, 3 Hampton Penny and Lawrence McMillan.

Grade V—1 Joyce McDonald, 2 Ambrose McMillan, 3 Jean Vandierstine.

Grade IV—1 Newton Penny, 2 Howard Davies, John McPherson and Donald McPherson, 3 David Gillis.

Grade III—1 Irene Finlayson, 2 Vernon Finlayson.

Grade II—1 James McMillan.

Grade I (Sr.) 1 Frederick West, 2 Helen West, 3 Mae Vandierstine, 4 Marie Davies.

Grade I (Jr.) 1 Charles Gillis, 2 Ernest McPherson.

Perfect attendance, John Penny, Joyce McDonald, Jean Vandierstine, David Gillis, Newton Penny, May Vandierstine, Helen West.

In a volume recently published by the State of Nebraska are 10,000 characters of cattle brands used as signs of ownership by ranchers of the State.

While sugar and pineapples are the chief agricultural products of Hawaii, coffee, bananas, rice, cassia, tobacco, cotton, and meat are also important.

NAVAL EXPERTS ARRIVE IN ENGLAND

Delegates Arrive To Begin Tri-power Naval Conferences.

By Harold P. Braman, Associated Press Staff Writer (By Guardian's Special Wire)

LONDON, Oct. 16.—Experts from the United States and Japan came to Great Britain today to begin tri-power naval conversations, armed with proposals for naval limitation. Each plan, apparently, differed radically from the other.

The outcome of the talks here was expected to decide the fate of naval regulations, and chart the course of the 1935 naval conference.

Japan's representative, Admiral Isoroku Yamamoto, arrived at Southampton, saying Japan would decide at the end of the conversations whether to denounce the Washington Treaty and pleading for co-operation of the three powers for successful conclusion of the conversations.

His plan, officially, was very secret, but it was understood to contain the following main points:

- 1.—Equality for the big three—Japan, Great Britain and the United States—with abolition of the ratio system now in effect.
- 2.—A big reduction in all types of offensive ships and authority for each nation to build all the defensive ships it wants.
- 3.—Limitation on the total, or global, tonnage basis of each navy, this limit to be the same for Japan as the others.

The Admiral indicated he would push those proposals energetically, but at the same time hinted broadly that Japan is open to any compromise mutually satisfactory to the

"Confession" Read In Murder Case

(C. P. By Guardian's Special Wire)

HALIFAX, Oct. 16.—A "confession" statement in which Daniel P. Sampson is alleged to have told Royal Canadian Mounted Police that he stabbed Bramwell Hefferman, 12, and Edward Hefferman, 10, because they had thrown stones at him and called him names, was read again in supreme court today as the middle-aged negro faced his second trial on a charge of murdering the elder brother.

R.C.M.P. officers testified that after Sampson had told his story he accompanied them to the scene of the crime and demonstrated how he had stabbed the boys and thrown his knife away.

Sampson was convicted last winter on a charge of murdering Bramwell, and was not tried on the second charge. Later the supreme court granted a new trial on the first charge, on the ground that the jury had been misled regarding the alleged confession.

"We will do all we can to bring about a happy ending," he said.

Norman H. Davis and Rear Admiral William H. Standley, the United States entrees, arrived at Plymouth to be met by Vice-Admiral Eric Fullerton and Captain Thomas Hugh Binney of the Royal Navy.

Davis said "we do not come here to make any agreement," declining to prophesy as to the future of the conference, refusing to discuss what- ever proposals he plans to make and asserting he regards the conversations as entirely exploratory, looking toward a satisfactory basis for continued limitation.

However, it was understood the Americans, like the British, will insist on continuance of the ratio principle and renewal of the Washington and London treaties on the same basis.

The Americans probably will press for a 20 per cent cut in all naval tonnage.

McGILL ENROLMENT HIGHER THIS TERM

MONTREAL, Oct. 16.—Preliminary registration figures at McGill University for the academic year 1934-35 reveal an increase in the number of undergraduates enrolled in degree and diploma courses, and a fairly substantial falling off in those taking partial courses, it was reported at a meeting of the Corporation of the university held recently. Total registration to date, exclusive of the faculty of graduate studies and research, is 2,381, exactly the same number of students as last year at this time.

Undergraduates enrolled in courses leading to degrees this session total 2,245 as compared to 2,229 in 1933-34, an increase of 16; diploma students number 43 against 38 last year, an increase of five; and partials total 93 as compared to 114 last fall, a decrease of 21. The totals show that 1,814 men students are registered at the university and 567 women. There are six more women, and six fewer men, attending McGill this year than in 1933-34.

CRAPAUD SCHOOL

Primary Department Report for September:

Grade V—1, Norman MacDonald, 2, George Nicholson.

Grade IV—1, Audrey Harvey; 2, Jessie Martin.

Grade III (Sr.)—1, Douglas MacKinnon; 2, Norman Simmons.

Grade III (Jr.)—1, Fred Norton and Mildred Dawson (equal); 2, Lillian Fall.

Grade II—1, Hubert Harvey; 2, Lyman Harvey.

Grade I—1, Kathleen MacDonald; 2, George Nicholson.

Perfect attendance—Audrey Harvey, Douglas MacKinnon, Fred Norton, Mildred Dawson, Hubert Harvey, Lyman Harvey, Leslie MacKinnon, Kathleen MacDonald.

Percentage of attendance—93.8.

Edith Leard—Teacher.

George Koestler, of the police department of Cleveland, O reports citizens bringing children for fingerprinting as means of identification in case of kidnaping.

N. B. Govt. Seeks British Rwy. Order

(C. P. By Guardian's Special Wire)

MONTREAL, Oct. 16.—Premier L. P. D. Tilley, of New Brunswick, tonight was enroute to Ottawa after negotiations here which he hoped would result in an order for 1,000,000 wood railway ties from the London, Midland and Scottish Railway to the lumber dealers of his province.

The Premier was in Montreal on his way to Ottawa to attend the session of the Dominion Government commission named to study implementation of the unfulfilled recommendations of the Duncan report. While here he conferred with W. J. Manclerk and J. W. Melville, directors of the L. M. and S.

The British railway executive are interested in the purchase of Canadian ties and the Premier declared these could easily be supplied by Canadian mills. Up to the present, it was pointed out, Latvia and Russia have been the sources of supply for the ties.

SCORN OF RICH MAN MAY BE REGRETTED

NORMAN, Okla., Oct. 16.—The modern co-ed was a man just like the man that married dear old grandma, a survey made at the University of Oklahoma discloses. They want stalwart men—men of character—robust in the manly virtues, of whose side they can toll to financial and social heights.

The rich man's son with his card of entree to the best clubs and social atmosphere was scorned by the majority of the co-eds. This brought a cynical observation from Dr. L. B. Holington, university psychologist, that a few years of the daily fight for bread and butter would make them look upon the rich man's son with less prejudiced eyes.

The psychologist said, however, he did not wish to be misunderstood as favoring wealthy marriages.
