

THE CENTRAL GUARDIAN

SIR EDMUND WALKER AND SIR JOHN AIRD ADDRESS THE SHAREHOLDERS AT THE ANNUAL MEETING ON SUBJECTS OF INTEREST TO CANADIANS IN ALL WALKS OF LIFE.

THE REVIEW OF 1922 AND THE OUTLOOK FOR 1923.

THE year through which we have just passed has been a trying and strenuous one, in the opinion of Sir John Aird, General Manager of the Canadian Bank of Commerce. In many cases, however, it has been a year of recovery, and the financial requirements of agriculture, and has sought at all times to assist the farmers in the way of money stringency in recent years when it was necessary to adopt a policy of restricted lending to farmers. Sir John Aird, however, believes that the conditions are now such that the general level of prices that prevailed before the war, but that the condition of comparative balance between the various occupations and industries that gives to each a fair share of the rewards of each day's labor, is this that it is still so woefully lacking, and that causes so much of the unrest all around us. Our national income has been reduced as a result of the war, not only by the amount of the heavy taxes which we have to pay, but in all the thousand and one ways that have resulted from the post-war depression in business. As a result we are finding that the carrying out of the magnificent plans we have for the future beyond the war is beyond our means, and we are come to the point where we must turn to call for outside assistance in carrying them through.

While on this subject I should like to say that this Bank has always adopted a friendly attitude towards the financial requirements of agriculture, and has sought at all times to assist the farmers in the way of money stringency in recent years when it was necessary to adopt a policy of restricted lending to farmers. Sir John Aird, however, believes that the conditions are now such that the general level of prices that prevailed before the war, but that the condition of comparative balance between the various occupations and industries that gives to each a fair share of the rewards of each day's labor, is this that it is still so woefully lacking, and that causes so much of the unrest all around us. Our national income has been reduced as a result of the war, not only by the amount of the heavy taxes which we have to pay, but in all the thousand and one ways that have resulted from the post-war depression in business. As a result we are finding that the carrying out of the magnificent plans we have for the future beyond the war is beyond our means, and we are come to the point where we must turn to call for outside assistance in carrying them through.

As I have not given the totals in Canadian dollars, I have given them in millions of dollars. The loss is not shown, but it is often as high as 25 per cent; the value of the potato crop of 1922 was less than half that of 1920.

As I have not given the totals in Canadian dollars, I have given them in millions of dollars. The loss is not shown, but it is often as high as 25 per cent; the value of the potato crop of 1922 was less than half that of 1920.

MR. W. MacKIE AND HIS INVENTION. Mr. William MacKie of Charlottetown has invented a steel car catching into things as the car is struck by the delivering of quantity operating in the station or wares of goods, in freight railway house. The special ball bearing sheds mills and warehouses.

It is two or three years since Mr. MacKie just built these cars or trucks, and already two are complete, and these have been inspected by three railroads, the C.P.R., C.N.R., and the G.T.R. They would also serve for bearing in the main shafting in pulp mills and lumbermills, which is a big feature for their success, as this class of goods is required in large quantities. Mr. MacKie who is well known in 1884 Mr. MacKie was awarded a diploma and medal in London at the exhibition, for a buggy that he built. It was afterwards owned by the late Owen Connolly. That same carriage is still in use in K-nora. It is probable that Mr. MacKie and others interested will form a company here and manufacture these trucks. There can be no doubt about the utility and the superiority of these trucks over any yet put on the market, and we feel that when they become generally known, and the company gets under way, that they will be in demand, and operated, not only in the railway systems of this country, but also into all mills and warehouses where trucks are considerably greater than that of the cars now in general use. We hope Mr. MacKie will meet the wheels are built of steel spokes, and are also adjustable so that they can be kept rigid at a normal cost, most capable mechanic, and an inventor whose inventions well merit are on the inside of the steelworks.

Another fact is that one eighth inch circle in front on ball-bearings so works that almost all friction in turning is cut out. Further the new trucks are so strongly constructed as to carry a load of 10,000 lbs. and are also adjustable so that they can be kept rigid at a normal cost, most capable mechanic, and an inventor whose inventions well merit are on the inside of the steelworks.

AGENTS WANTED. WANTED LIVE AGENTS FOR Watkins 150 products. Direct to consumer. Write The J. H. Watkins Co., 379 Craig St., West Montreal.
