So Human

it amazed all Charlottetown

Some of your friends must have been in the huge audience which heard Alice Verlet in her Tone-Test Recital at the Prince Edward. Ask these people about it. This is the astonishing discovery they made:

The keenest musical ear can not distinguish any difference between the voice of the living artist and the RE-CREATION of that voice by the New Edison.

And does it not amaze you, too, that Mr. Edison has succeeded in producing an instrument that captures every subtle sweetness of the human voice—that gives you all the ear can give you of the art of the world's great artists. No other phonograph dares to make this direct comparison.

The NEW EDISON

"The Phonograph With a Soul"

The New Edison alone can RE-CREATE music for you. Come in and hear it for yourself. Make the great discovery for yourself.
