

Foster's Corn Cure

If you're tired of mesing with corn salves, awkward and cumbersome bandages for a place where no bandages can be comfortably applied, try

Foster's Corn Cure

Then you won't have to wrap up the toe, for this remedy itself forms a coating over the corn while it is being removed. This preparation has given so much satisfaction and is becoming so well known, that we find it hard to keep it in stock. We have a new lot on hand at present. Only 15c a bottle.

SHOOTING

A rifle team from Charlottetown yesterday travelled to Summerside to shoot a match against the representatives of the Summerside Rifle Club. The match took place on the home club's range, at 200, 500 and 600 yards ranges, between 12.30 and 4.30 o'clock in the afternoon. Though the light was good, the wind was strong and gusty, and was responsible for some spoiled score sheets. In fact, there were several misfires recorded, and others were almost in some cases as frequent as bulls. On the whole the scores were moderate, but there were a few excellent individual performances. Dr. A. W. Leard, of the home team, for example, made top score of the match: a splendid 96 pts.—he came down from 500 yards with a total of 66 out of a possible 70 pts. The next highest score was also made by a Summerside shot—Mr. L. R. Allan, who scored 93 pts, notching 34 out of 35 in the first stage of the shooting. A similar feat was done by Mr. S. Gray of the visiting team, at the 500 yards range. Top score for the visitors was 90 pts., made by each Mr. W. K. Rogers and Mr. Beer, the former counting out the latter by reason of the better score at the longer range. At the close of the shooting at the first range, only six points separated the two teams' scores, Summerside leading, but at each of the succeeding ranges the home men increased their lead, gaining seven points more at the 500 yards and thirteen points at 600 yards, eventually winning the match by 27 pts; their total being 704 pts. and the Charlottetown team's 677 points. At the close of the shooting on the

result being announced, the Charlottetown team gave three hearty cheers and "a tiger" for the victors, while on behalf of the team Mr. Rogers heartily thanked the Summerside club for the splendid manner in which they had been received and entertained. Excellent arrangements were made for the visitors' comfort, which they highly appreciated.

Following are details of the scores:

SUMMERSIDE			
	Yds	Yds	Yds Ttl.
A. W. Leard	200	500	600
L. R. Allan	33	33	30
H. Callbeck	30	32	27
J. Fritchard	31	29	29
Capt. A. R. Brennan	31	29	29
H. R. Crockett	31	29	29
E. Monkle	31	33	20
F. Johnson	26	27	24
	244	244	216

Average: 88 pts. per man.

CHARLOTTETOWN

THE WEATHER

THE TEMPERATURE TIDE, MOON ETC

TORONTO, July 24.—Fresh southerly and south westerly winds, becoming showery.

THE WEATHER.—Yesterday was beautifully clear with bright sunshine all day; clear at night.

The temperature at three o'clock this morning by the Rexall Store tested thermometer with a northern exposure was 64 degrees above zero, and with a southern was 66 above.

The highest temperature recorded yesterday was 82 degrees above zero and the lowest was 67 above. The lowest the previous night was 60 above. At nine a.m. it was 70 above and at nine p.m. 67 above.

The tide will be high this afternoon at 2.34 and tomorrow at 3.19; it will be high tomorrow morning at 3.08 and Saturday at 3.36.

The sun sets this evening at 7.40 and tomorrow at 7.38; it rises tomorrow morning at 4.34 and Saturday at 4.25.

The moon rises tonight at 10.09. The moon was full Friday, July 18 at 2.06 a. m.

The last quarter of the moon will be on Saturday, July 26th, at 5.59 a. m.

The length of to-day will be fifteen hours and seven minutes.

No matter how tough your beard or how wiry your whisker you will find Euthymol Shaving Soap just the thing that will give satisfaction. On application it immediately begins its work, softening the beard, soothing the skin and makes shaving a "short and sweet" pastime. Price 25c. The MacKinnon Drug Co., Corner George and Kent Sts. MBT.

EXTRAORDINARY DEMAND FOR CHEWING GUM

First Used by Indians, One Generation Saw a Big Business Develop

More than 30,000,000 sticks of gum are manufactured annually to satisfy the lovers of this confection, a Toronto manufacturer declares. All of it is made of chicle, which comes from a gum tree in the tropics, the importation of chicle into the United States and Canada figuring up \$2,000,000 a year. The chicle business has become a big industry in the South American republics. The gum trees are tapped very much the same as the rubber tree.

Spanish explorers found the Indians of this hemisphere chewing gum to quench their thirst away back in the fifteenth century, and they reported that it relieved exhaustion; but it was 1876 before gum chewing became a habit among the nations, so at least the gum-makers say, being guided in their opinions by the statistical records. Still, the oldest inhabitants say they always had gum. Resin or something else must have been chewed before the modern gum factory brought out a substitute—that was better liked.

Since that time the demand for this commodity has increased to such an extent that important firms have been obliged to search the markets and exploit the growing of the tree in order to obtain a supply sufficient to meet existing requirements.

Prior to 1888 chicle sold for from seven to eight cents a pound. Now it sells for \$2 a pound. The chicle tree is indigenous to northern South America, Central America, and some of the Mexican States.

Experiments have shown that trees planted at a distance of ten feet apart or 400 to the acre, will yield from five to six pounds of chicle gum when from eight to ten years old. In their wild state the trees are usually found in groups, frequently growing to a height of from forty to fifty feet. Hands well adapted to the growing of the tree, once thought valueless unless the timber could be cut and transported, are now worth \$15 an acre.

Wood Like Mahogany

The wood is of reddish color, closely resembling mahogany, is quite hard, heavy, compact in texture, and fine grained. Prehistoric door frames and rafters of this wood are found among the Mexican ruins, and are still in excellent state of preservation. This wood is to-day greatly in demand by cabinet makers, who employ it in the manufacture of high grade furniture and household fittings. It is called sapota.

For many years the sapodilla pear, which also comes from the sapota tree, was a popular variety of fruit among the natives, but now on account of the great demand for chicle gum the attractive rewards offered the fruit is seldom marketed.

The operation of gathering chicle and preparing it for market is similar to that employed in the maple sugar industry. Throughout the rainy season, and while the sap is up, the tapping is done. The outfit consists of nothing more than a piece of rope, and a machete. By means of this rope, which is fastened about the waist and slipped around the tree, the gatherer is enabled to hold any desired position, and wield the machete in cutting the incisions.

Care in Tapping

Great care must be exercised, as excessive bleeding of sap will cause the rapid decay of the tree. It is possible for one man to gather properly from ten to fifteen pounds of sap a day, for which he is paid, in most cases, a contract price from ten to fifteen cents a pound. In granting concessions to gather chicle in the national forest reservations the Latin-American Governments demand that natives shall be properly instructed in the gathering and preparation of the gum.

In some instances trees have been tapped for five years, where great care has been taken, although after that time they produced only from one-half pound to two pounds of the sap. However, if allowed to remain untapped for a period of five or six years they will then produce from three to five pounds of gum.

IN MEMORIAM

MRS. DAVID WALKER

The death occurred at 1.30 this morning in the P. E. Island Hospital of Mrs. David Walker, Charlottetown. The deceased was 72 years of age, was in her usual health till last evening and had attended the Grace

Church picnic yesterday. On return and while at the Railway Station she was stricken with apoplexy becoming unconscious. She was removed to the hospital where all that was possible was done for her. She never regained consciousness and passed away as above stated. She leaves to mourn her husband, four sons and five daughters as follows: James S., Police Officer, City; John G., Texas; Kenneth H., Sharon, Pa.; Walter, North Lake; Mrs. John Gill, Union Road; Mrs. David Chandler, Moncton; Mrs. Daniel McKenzie, Cardigan; the Misses Barbara and Annie at home. Funeral notice later.

The death occurred in Summerside yesterday after a lingering illness of Miss K. Gladys Moore, aged 23 years. The deceased was the youngest daughter of the late Charles Moore, Georgetown, and since the death of her father, seventeen years ago, resided with her uncle, Mr. W. N. Huestis, Summerside. One sister, Mrs. George F. Doyle, Calgary, survives her.

The funeral takes place tomorrow, Friday, at 2 p.m. from the residence of Mr. W. N. Huestis to the Methodist Church where a short service will be held. Interment in the People's Cemetery.

SALVIA is a hair dressing that has become the favorite with women of taste and culture, who know the social value of beautiful hair. A large, generous bottle costs only 50c. at leading druggists everywhere. The word "SALVIA" is on every bottle. Sold at Hughes' Drugstore.

MISS ANNIE E. REDDIN.

Heartfelt sympathy goes out to the family of Mr. D. O. M. Reddin in the death of his sister, Miss Annie

Old Dutch Cleanser

OFFERS THE BEST PROTECTION AGAINST DIRT

Estelle, which occurred yesterday morning after a somewhat protracted illness. This is the third bereavement in the Reddin family within the year. The late Miss Reddin, who was the third daughter of the late Judge D. O. M. Reddin, was a most estimable lady and one whom all loved who knew her. Her patience and Christian resignation during her illness told as nothing else could of her abiding faith and her devoted Christian life. To the bereaved family The Guardian tenders sincere sympathy.

The Clink of Comfort

in a glass of

Iced Postum

Means more than the passing pleasure of a cool drink on a hot day.

Postum contains no drugs, but it does contain vitalizing food elements from wheat that afford lasting refreshment, and sustains the heat-wearied body by furnishing the support Nature requires.

Instant Postum dissolves instantly in hot water. Chilled with ice and flavoured with sugar and lemon, it makes a delicious drink that cools and comforts and is really a food for Brain and Nerves.

"There's a Reason" for Postum

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

THE PLAYERS' SIDE

President Fultz Deals With the Question of Farming Players.

Some of the reasons why baseball players in the big leagues want to change the system under which they are "farmed" out to minor league clubs at salaries less than those called for in their original contracts, were given in a letter written by David L. Fultz, president of the Baseball Players' Fraternity, to August Herrmann, chairman of the National Commission.

The letter was in reply to one written by Mr. Herrmann in answer to the first communication on the subject. Mr. Fultz said in part:—"You say after the player is transferred it is a question of negotiation between him and his new owner. How can it be a question of negotiation when the player is compelled by your regulations to sign with one particular team, or quit his profession? There can be no negotiation when one party is absolutely at the mercy of the other; it then becomes a question of duress. When the situation is reversed and the major league recruit plays far better ball than he is expected to, he can't 'welch' on his agreement and refuse to play unless he gets more money. Why, then, should the owner have the right to withdraw from his contract when he finds his bargain is not quite as good as he expected?"

We cannot live without wood. Everything from the houses we live in to the books we read is made of the product of the forest.
