## MOORE & McLEOD LIMITED

Having a spiral groove ending in a hole on the lower surface, a porcelain disk has been invented to produce the effect of stirring by land currents of vapor it creates when placed in cooking utensils.

The commissioners in charge of the coordination of electric power production in southeastern England have estimated an average rate of increase of 204 per cent for the years between 1933 and 1941.

## Bungalow Camps

Never watched purple Alpine twilight turn to silver night, from your own little cabin in the Canadian Rockies? Never crawled from a drift of Hudson Bay blankets, dashed up to the clubhouse "before you starved"... swung into the piney, heaven-bent trails with a carefree crowd? This summer, treat the Adam in you to a ten-ton thrill. Come up to one of the 8 modern bungalow camps in the heart of America's Alps. Motor to Banff and Lake Louise when the bright lights call. Find out about it, now—reservations go fast.

Only \$5.00 a day... American Plan

C. Bruce Curpes, District Passenger Agent, Saint John, N.B.

### LETTER OF SYMPATHY

Mrs. K. H. MacKenzie,  
Rose Valley, P. E. Island.  
Dear Sister:

We, the members of Tryon and Westmoreland, V. B. W. M. A. Society, wish to convey to you, in this humble way, our heartfelt sympathy in your bereavement of your dear mother. We know how deeply you will feel her loss, as you were so long together, but we all feel that she has gone where there will be no more weakness, or care, or trouble. She has fought the good fight, and is now receiving the reward, but she has left vacant a place that will be hard to fill in the hearts and homes of many for she was always ready in time of sickness or trouble to lend a helping hand, never looking for any reward, and we always found her loving, kind, and self-sacrificing.

We would therefore, dear sister, commend you to His care; He can heal up the broken heart. He will be a comforter to all who come to Him, and not so many years will it be, till we hope by God's grace to meet her beyond, where all the dear ones are gathered together.

Signed on behalf of Tryon and Westmoreland Societies.

Annie Gamble  
Secretary

### A Tired-Out Feeling

Is a Sure Sign That the Blood is Thin and Watery.

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N. B. She further says:—"Some years ago I was working as a stenographer and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use my strength came back, I regained my appetite and the terrible backache from which I had suffered disappeared. I have been married some years now and have two fine healthy children, a girl and a boy, and am in the best of health. All this I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down person." All weak, run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### STUDY LOSSES IN KILN-DRYING LUMBER

Losses in kiln-drying lumber have been under intensive study by the Forest Products Laboratories of the Department of the Interior, Canada, for some time. As a result of these investigations, the laboratories have been able to suggest improvements in kiln operation which have already resulted in a marked reduction in the average loss from faulty drying.

### Health Services of Canadian Medical Association

#### DOES YOUR CHILD SEE?

When a child is blind in both eyes, the condition is, of course, recognized. There are many children who have defective sight, which fact is unknown to their parents. That this is so, is evidenced every year by the number of children entering school, who are found by school physicians to have defective eyesight.

The good work of the school health services does not provide for the pre-school child, or for the child who attends a school where there is no school physician or nurse.

A child should be able to recognize a picture or object one-half an inch square at twenty feet. Each eye is tested separately, one eye being covered with a card during the test of the other. For near vision, a picture book may be used. If there is any appreciable defect in either eye, for near or distant vision, the family physician should be consulted.

Cross-eye is a condition which is frequently neglected because of ignorance as to its significance by parents. Children with this condition should be placed under medical care without delay. A cross-eyed child sees double. This causes confusion and so the mind turns itself to pay attention only to the image that comes to it through the straight eye. This results in one eye's being developed through use and the other's becoming useless because it is not used.

Unless the condition is properly treated early, the child loses the use of one eye and is actually blind in that eye. If the child is treated between two and three years of age, the most, or all of his vision can be saved; the longer treatment is delayed, the more vision is lost. Cross-eye is a condition that does not correct itself. Children do not grow out of it.

If the child is placed sitting, facing the parent, an arm's length away, with one eye covered by the parent's hand, and is made to look at the parent's nose with the uncovered eye, the parent will find that, on uncovering the other eye, it is either looking at the nose, which means that no cross-eye is present, or that it moved in or out, or remained crossed in or out, which is an evidence that cross-eye is present.

Your children will appreciate, in later years, your care of this special organ.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

#### Kutz—Knight Wedding

St. Mark's Anglican church, Vancouver, was the scene of a very pretty wedding on Saturday evening, August 18, at 8 o'clock when Annie Madeline Kight, youngest daughter of the late Wm S. H. Knight, of Souris, P. E. I. and Mrs. Knight, now resident in Edmonton, became the bride of Russell Lawrence Kutz, second son of Wm. Kutz and the late Mrs. Kutz of Unity, Sask.

The Rev. A. H. Sovereign, performed the ceremony. Mr. Warren Knight, of Halifax, N. S., the uncle who was given in marriage by her uncle, Dr. I. Proctor Hall, was charming in a gown of ivory with panel of lace and veil of Lamerick lace, held in place with orange blossoms. She carried a shower bouquet of opelia roses and lilies of the valley. Her only ornament was a throatlet of amethysts and pearls, a gift of her brother the late Capt. Basil Knight, of Halifax, N. S. The bride wore a gown of peach tulle with hat to match and carried a bouquet of mauve and pink sweet peas and carnations. Mr. Donald McGowan supported the bridegroom.

The church was beautifully decorated with an arch of ivory interwoven with clerks and banked with hydrangea. Festoons of ivy and baskets of pink and mauve sweet peas completed the decorations. After the ceremony a reception was held at the home of Dr. and Mrs. T. Proctor Hall, where Mrs. Hall and Mrs. Knight assisted the bride party in receiving the guests. Mr. and Mrs. Kutz left on the midnight boat for Victoria, the bride wearing a platinum grey dress and reseta that and carrying a French beaded bag, the gift of the bridegroom. The bridegroom's gift to the bride was a gold watch, and to the best man a leather wallet. After spending a honeymoon in Victoria the young couple will leave for Montreal where Mr. Kutz, who received his B. Sc. from the University of Al-
