A reader of The Guardian writing from Everett, Washington, on the far away Pacific Coast says: "Among the many interesting sketches of island scenery which appear in your paper from time to time the one that attracted my attention most is that of the Crosby Mills at Bonshaw." Visit once more the old homestead, and sit on the cool and cozy porch as of yore. Drink at the well and swing on the gate again. Drive the cows down the lane to pasture and climb the gumtree as you have often done before."

The Correct Adjustment
of glasses is a matter of considerable importance. The beneficial effect of our glasses may be largely nullified by ill-fitting mounts. We pay particular attention to the correct fitting of mounts, so that the full benefit of the lenses will be obtained. We supply the lenses of such shape and size as will be most becoming in each individual case. This is possible because we grind our own lenses and make them any desired shape. Our methods of examination give best results. Try us.
