Tea Going Up

The unrest in India has caused more or less serious labor troubles on the tea plantations and has resulted in the price of tea rising consistently for the past year. Between October 1920 and today costs have advanced between 12 and 15 cents a pound. As the crop is much less than estimated consumption this year, it is probable that the price will go still higher.

**Leader of the Opposition  
Makes Splendid Speech  
On The Budget**

(Continued from Page three)

ment. I have said, and I say again that he is borrowing money, and has borrowed this very money, on the strength of the public credit of this province, and the statute which he has placed on the statute books proves it. By that statute this expenditure is made a charge upon the general revenue of the province, and now he is trying to shift this policy over to me, repudiate it, absolutely!

They have no mandate at all for that expenditure—none even the mandate of "necessity." It is argued that they have not increased the indebtedness of the province and that the people will not have to pay a cent more. We are told that we have found some money somewhere from which we can create a sinking fund by which a loan can be paid off—a most childish statement! The source from which they get this sinking fund, as I have always said, is a tax, just as much as the famous poll tax. It was part of the revenue which I ever expected to see a wonderful idea my hon. friend admitted last night—indeed, perhaps, that by taking these taxes out of the general revenue he is robbing it of an amount which had otherwise to be made up. Now this is exactly my position. The money is coming out in attempting to show no matter from what source it is contributed, whether by the auto men or not. As my hon. friend from New Perth (Mr. J. A. Dewar) has said, all revenue comes out of the soil of this province, and if you take \$35,000 out of that you must make it up from some other source. This is the whole thing in a nutshell, and my hon. friend cannot get away from it. If this amount were not taken and placed in the sinking fund it would be available for some other purpose. The money which I moved in the House, stating the Opposition's attitude that we would consent only to the borrowing of money for permanent improvements, is criticized by the hon. leader of the government who went to great pains to show that 100 per cent. of these highways were permanent. But he smashes his own argument by saying that they are permanent because they would be repaired every year! You can make any old

cal-track permanent by keeping it in repair. That is a new definition of permanency. But at any rate, when he made that statement about the roads, my hon. friend certainly told the truth. If he would drive out as far as the Cemetery he would find that out by the jolting he would get, as I did the other day. He would find his wagon jumping up to the axles within a few hundred yards of the city on those permanent roads of his! While my hon. friend finds so much fault with our criticism of the highways scheme, the remarkable thing is that at its inception—when the highways resolution was introduced in this House, it was exactly our policy that was proposed—they were going to borrow money to build up the low-lying roads and culverts. This resolution is in black and white on the journals of the House, and when this government spends money on anything else than the permanent works referred to in that resolution they are doing something which they have no mandate from the people of this province for doing.

I am not going to refer to the permanency of the road machine work, because every child knows that there is no permanency about it. The Premier has given us this answer himself. The culverts, if they are properly built, will be permanent.
