### Georgetown and Vicinity

Arnold Murphy, Jerome Condon, Cullen DeLory and Stephen DeLory, students at St. Dunstan's College, arrived at their homes to spend the summer holidays, following the completion of the college year.

John DeLory, son of Mr. and Mrs. P.J. DeLory, who has been the guest of his parents for the past few weeks following the completion of his term of engineering studies at McGill University, left on Friday for Clinton, Ontario. John will continue his summer training for reserve officer in the R.C.A.F., this being his second summer with the Air Force summer training.

Mr. David Lavers has purchased the farm formerly owned by the late John Knight and familiarly known as the Dr. Kay property. Situated at the edge of the town, adjacent to the well known "Highlands", presently owned by Rev. Dr. Bonnell, considerable land is included in the estate and Dave will carry on his favourite vocation of farming.

Politicians from the different parties contesting the June 27th Federal election can be seen daily in our midst, as they carry on their canvass among the electors. We venture to say that in many instances the situation takes on something of the air of the "What's Your Beef" radio programme. This of course is a privilege we enjoy under our democratic system and one which we should be thankful we can freely exercise.

Mink ranchers in Georgetown and the immediate vicinity have practically completed counting this spring's crop of young kits. Exceptionally fine averages have been reported and litter averages of between four and five are general throughout the ranches. This is a great start for those engaged in

the industry, as production is the main point towards a successful year's operation.  
Large quantities of pit props are being assembled in the Bergmann Construction Company's storage yard. Visitors often marvel at the quantities assembled and not being familiar with the carrying capacity of ocean freighters, they find it hard to visualize what a large portion of the pit props can be stored in the space of one of those ships.

This famous **ARMSTRONG** floor costs less than before the war!  
"and it's so easy to buy...so easy to put down!"

Armstrong's Asphalt Tile, unlike most other home improvements, is easier to obtain—and easier to pay for—than it was 10 years ago. It actually costs less today than it did in 1939!

A new floor of Armstrong's Asphalt Tile can be installed right over the concrete subfloor in a basement room or in a home without a basement. It is one type of resilient flooring that is not harmed by moisture or alkalis seeping up through concrete that is in direct contact with the ground.

It can be installed quickly, with little or no inconvenience. And, because it is laid tile by tile, you can enjoy the thrill of designing your own colourful new floor.

Flooring contractors everywhere in Canada are installing attractive, durable floors of Armstrong's Asphalt Tile. Ask any Armstrong contractor or dealer in your locality to show you colours and sample floor designs, or to give you an accurate, free estimate.
