MAKING BENEVOLENCE MORE PRACTICAL

Making Balaclava caps, socks and shirts for Canadian soldiers is all very well in its way. Many kind-hearted women in this country have gone into the movement as a matter of patriotism or benevolence. But there are a number of women in Canada who have let the sentimental view of the case crowd out the more practical side of it. Of course no one pretends that making these articles is but a practical business. It is a thousand times ahead of passing resolutions and endorsing memorials to governments and municipalities.

But once you begin to make benevolence practical you naturally want to make it as practical as possible. The fact is that there are in Canada hundreds and thousands of expert soldiers. There are factories in Canada who turn these things out as a matter of business. They make them by the most economical methods at the time spent by Canadian women in making these things by hand at a high cost could perhaps be devoted to better effect in using their higher talents in raising money for the cause, or in raising money for the cause, or in raising money for the cause. The cost of these articles could be as easily paid to Canadian labor which would reduce the present big problem of unemployment and to keep Canadian homes comfortable. Instead of Society workers making these articles, the soldiers' wives and sweethearts can be employed to make them unemployed who at the time like this need work.

Let the women of Canada who are concerned about these useful benevolent deeds make them ten times more practically benevolent by seeing what they can do to increase the amount of employment to Canadian women who are out of work and whose employment means the prosperity of Canada.

CENTRAL FARMERS INSTITUTE MEETING

(CONTINUED FROM PAGE ONE)

In a moment of weakness when I consented to accept the position. For when I think of the learned gentleman who held the floor before me, his commanding presence, his marked executive ability, his fame as a public orator and as a leader among men, I sink into insignificance, yet, gentlemen, I assure you, I am deeply interested in all that pertains to the best interests of my fellow farmers. I know how to sympathize with you in all the various ways the farmer meets with reverses.

I am sure we have all great reason to be thankful to Divine Providence for the wonderful way he has blessed our labor during the year and for the bountiful harvest we have garnered. From one end of the Province to the other comes the word of barns full, abundance of everything. I don't intend to take up much of your time with any extended remarks, only to call your attention to a few things as they confront the farmer today. Naturally, gentlemen, our attention and interest are centered on the Motherland and the war zone, for we believe the most gigantic struggle the world has ever seen or ever will see, is going on at the present time. Our hearts are saddened at the fact of so many of the very best of our Empire's men being cut down in this terrible carnage. Just a word of tribute to those noble Belgians, who, so nobly and courageously fought for home and country and freedom, who, when they were in the hands of the enemy, were treated with the blood of the innocent. Eternity alone may reveal the debt of gratitude due her by the nations. We rejoice in the fact of so many of our brave young men, responding to the call to duty and to arms. Our prayers and our sympathies with them and we earnestly pray this bloody war may soon be over.

FRUITS OF THE WAR.

Already the fruits of the war are in evidence, for have not the people of Russia and France reason to rejoice that prohibition of the liquor traffic or intoxicants has come in force in these countries—and the best thinkers in Britain are beginning to realize it would be in her best interests to have the traffic in intoxicants curtailed.

LAW ENFORCEMENT.

The Prohibition Law enforcement, in our own province has been calling our attention to late. It is understood law enforcement is the duty of any Government to see that every law on the Statutes is properly and rigidly enforced. We must view the matter of law enforcement in a broader sense than it has and is being viewed by many. This is this Government doing as well as the Government did, or vice versa. This is only the party spirit view, and if anything is to be gained along these lines, we must rise above party and stand as one man for what we believe to be right and just.

DEPRESSION IN TRADE.

The depression being felt at present the world over, is not so apparent here owing to it being altogether an agricultural province. The fox industry is perhaps hit harder than any other industry on the island. The quietness prevails at present. We believe when the war is over the industry will come back to a great dividend paying business. The abnormal profits produced by the business created a speculative or get rich quick spirit among the traders away from the attention of many from the farm. The depression at present we believe will correct this, and bring about normal conditions again.

GIFT OF OATS.

We congratulate ourselves on the gift of oats to the Army Field Service Fund by the farmers of P. E. Island. I may say neither your secretary nor myself can give you any facts or figures concerning the gift of oats, as the only organization of the farmers, was not consulted in any way on the matter.

HORSES.

I might just mention that horses are an indispensable quantity in carrying on war.

And who of us can not spare a horse? And so many of the very best right here; And yet none being asked for. Who will rise to the opportunity.

SIDE SHOWS.

Gentlemen, as good citizens we have some things to complain of. One is the side shows and fakirs at the Exhibition.

Household Economy

How to Have the Best Cough Remedy and Save \$2 by Making It at Home

Cough medicines, as a rule, contain a large quantity of plain syrup. Two cups of granulated sugar with one cup of warm water, stirred for 2 minutes gives you as good syrup as money can buy.

Then get from your druggist 2 1/2 ounces Pinex (50 cents worth), pour into a 16-ounce bottle and fill the bottle with sugar syrup. This gives you, at a cost of only 64 cents, 16 ounces of really better cough syrup than you could buy ready made for \$2.50—a clear saving of nearly \$2. Full directions with Pinex. It keeps perfectly and tastes good.

It takes hold of the usual cough or chest cold at once and conquers it in 24 hours. Splendid for whooping cough, bronchitis and winter cough.

It's truly astonishing how quickly it loosens the dry, hoarse or tight cough and heals and soothes the inflamed membranes in the case of a painful cough. It also stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent loose cough.

Pinex is a highly concentrated compound of genuine Norway pine extract, combined with guaiacol, and has been used for generations to heal inflamed membranes of the throat and chest.

To avoid disappointment, ask your druggist for "2 1/2 ounces of Pinex," and don't accept anything else. A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Toronto, Ont.

hibition and Market Square. As this is a question of affecting the morals of our young men, I trust you will deal with it in a manner commendable to the dignity of this assembly, but don't forget that all the fakirs do not come from abroad, for what is any person but a fakir who will deliberately take 50 cents for a 25 cent article on Exhibition days, and thus drive away trade and visitors from town.

AUTO.

The auto will come in for some share in your deliberations today, and it is your duty and privilege to speak in no uncertain sound, for your rights, as farmers.

PESTS AND DISEASE.

The Department of Agriculture has done a great deal for the farmers in many ways, but more can be done. What about the destruction of weeds on our highways? What about the prevention and stamping out of pests and disease. I hope the Powdery Scab has not affected the vision of the Department in such a manner as to blind them to all other pests. Already from over the island comes the call for the veterinary, to test for that dread disease in our herds, tuberculosis.

SHEEP PROTECTION.

We are pleased to know provision has been made for protection of the sheep against the ravages of dogs. We trust this will greatly stimulate this important branch of farm industry.

SHORT COURSE.

Again our boys are going to have the privilege of a short course in agriculture. It is scarcely to be conceived how as much practical education in so short a time, and at so little cost, could be given to so many farmers and farmers' boys. Let us all try to impress on the boys, especially, their great opportunity. The day is with us where practical agricultural education is indispensable to good farming. No longer have we the virgin soil, with its abundance of plant food, only requiring the plow and harrow, with sun and shower to ensure us abundant crops.

CO-OPERATION.

The local Department of Agriculture, through the different institutes, have been the medium of imparting much valuable information on the different branches of the farm work, by sending practical men among us. It is regretted more do not come into our institutes and take advantage of these lectures and the benefits arising from co-operation. What can be accomplished without co-operation? All classes and societies unite as one when any great reform is required. Why will farmers not unite as one and stand up for their rights? United we stand, divided we fall, should be our maxim.

FREIGHT RATES.

Still another matter of injustice to the farmer, is the increased freight and passenger rates on the P. E. I. R. R. I will abstain from remarks on this matter only to say, that I believe we will be as one man in demanding a reduction of rates.

SAW TALL TOWER ON ISOLATED ISLE IN CARIBBEAN.

BOSTON, Dec. 1.—A tall tower, which they believed to be a part of a wireless plant set up by one of the belligerent nations, was sighted on Torocay, an isolated spot in the Caribbean Sea, by officers of the steamer San Jose, they reported upon the arrival of their vessel today. Captain McKinnon, of the steamer, said the structure, which appeared to be of steel frames, was a new one.

PRESENTATIONS

Last week Mr. Archibald McEachern, boiler maker, and Monday, Mr. Arthur Bruce, machinist, both of the Prince Edward Island Railway, were each presented by their fellow employees with a well filled purse and an address, prior to their departure for the front.

Following is the address to Mr. McEachern: Mr. Archibald McEachern, Charlottetown, P. E. I.

Dear Sir,—On the eve of your de-

parture from home and friends to go to the defence of the Empire, we your fellow employees, beg to express and convey to you our appreciation of the noble and heroic stand you have taken in leaving the joys and comforts of home to go forth to do battle for our flag and country.

It is no easy task to arise and leave home and loved ones and go forth to face and endure hardships, danger and possibly death itself, and while we fully realize the noble sacrifice you are making we cannot find words to express our admiration of your courage and patriotism in sacrificing all the comforts of home life on the altar of your country.

Rest assured that our best wishes are with you, our brightest hopes will follow you and we sincerely pray that the Great Ruler of the Universe, the God of Battles will watch over and guard you and eventually, when our country's enemies are defeated and humbled, bring you back in safety to home and loved ones.

Please accept this small token of our esteem.

The following is the address presented to Mr. Bruce: A. J. Bruce, Esq., Dear Sir,—We, your fellow employees of the P. E. I. Railway, learn that you are about to take your departure for the battlefields of Europe, to fight for your King, your country and home. The years that you have been our associate we may say have always been of the most friendly and cordial nature, as we have always found you courteous and obliging, ever ready to help your fellow-workmen, whether in distress or otherwise and for which you will be remembered in the time to come. The stand you have taken is a noble one; one in which we will

look forward knowing that you will not only be a credit to the Canadian Continent, but also a credit to the land of your birth, the Isle of Prince Edward.

In bidding you good bye we would ask you to accept the accompanying gift, as a small token of esteem in which you are held, and we trust and pray that the all-wise Creator of the universe will watch over you, and protect you in whatever perils you may have to encounter, and when the war is over and peace proclaimed we hope to have the pleasure of welcoming you home.

Sgd. on behalf of the P. E. I. Ry. Employees. Mr. John Walker, of the plumbing department of Bruce Stewart and Company, is among the boys who have enlisted for the front. On Monday Mr. Walker was presented by his fellow-workmen with a silver-plated cigarette case, gold-lined and suitably engraved, and also with the following address. The recipient made a suitable reply. Mr. Walker is a son of Captain Daniel Walker, of the C. G. S. Brant.

Charlottetown, Nov. 30, 1914.

To Mr. John Walker. Sir,—On this, the eve of your departure to take your place at the front in defence of the Empire, we, your fellow-workmen, beg you to accept our warmest desire for your welfare and may you safely return when the cause for which you go is vindicated. Accept this small token as a memento of our sincere regard and appreciation of your many sterling qualities. (Signed) F. W. Martin, A. McInnis, M. C. Pound, M. McLeod, W. Mullins, Jas. McKenna, Peter McLean, J. Vickerson, Henry Musick, Horace Stewart, Harry B. Eldridge.

Tea, Coffee and the Cop

A booklet, "How to Keep Well," prepared under the eye of the Police Surgeon and the Health Commissioner, and distributed to the New York Policemen—among other suggestions, says:

"Strong Tea and Coffee are Always Harmful"

Tea and coffee both contain the drugs, caffeine and tannin, which often cause headache, biliousness, heart flutter, sleeplessness, and other ills.
