STOCK QUOTATIONS

MARKET GOSSIP

(By Johnston and Ward's Special Wire)

MORNING MARKET LETTER

NEW YORK, N. Y., July 11—The market was firm in the early dealings yesterday, sagged a bit. Then rallied during the last hour on fair activity. The strength was selective with General Motors active in new high ground. This is probably in expectation of a favorable second quarter earnings statement resulting from the unexpectedly high level of sales during the period.

U. S. Steel softened on the tonnage report at noon, but rallied again to close up on the day. For the past two days the market has fluctuated within narrow limits just under the highs and so far gives few definite signs of a weakened position.

Laidlaw and Company.

SUMMARY

NEW YORK, N. Y., July 11—Gold bars quoted at 140s 8d against 140s 11d Wednesday. Bank of England rate unchanged at 2 per cent.

Union Oil of Calif in quarter ended June 30, estimated net profit equal to 36 cents a share against 31 cents in previous quarter and net loss $200,000 in June 1934 quarter. Declared regular quarterly dividend of 25 cents.

First Boston Corp declares dividend of 50 cents. In letter to stockholders the company stated that this dividend was not to be considered as establishing any regular dividend rate. In first six months 1935 net income amounted to $1,803,000.

Winnipeg Grain Exchange Council authorizes trading in coarse grain futures for December, beginning today, trade interprets this to mean government will not take hand in marketing oats, barley, flax or rye, although grain legislation gives the power to do so. Nothing done about wheat and unlikely any change will be made until the wheat board is established.

BARING LETTER
Tuesday Evening

NEW YORK, N. Y., July 10—A few stcks made new highs, but the industrial averages did not go quite as high as yesterday. I said last night to utilize all strong spots today and tomorrow for profit taking puposes and there is no change in that advice. While a few individual issues may run up a little further, the market as a whole is close to a good sized setback.

Westinghouse at 58⅝. We have been pesistently bullish on it since it was near 3 and it has done quite enough.

Columbia Pictures closed 2 points lower. Do not buy it back till we tell you to. Will probably go below 65.

American Tel and Tel which I advised selling Saturday if it went near 131, went to 130¾, then declined nearly 3 points. Still a sale near 129.

Celanese which you should have held out above 28 will prbably react 5 or 6 points from present prices.

Phillip Morris. You should be long so very much lower down that you can afford to stay long as it is still very far from this year's top, which will be at least 70 or 75.

Case ought to run up to 63 or 64, but better sell out half above 59. You should be long at 50, 52 and 54.

Rubber pfd is up 10 points, better take profits.

Radio B pfd, of which your remaining half should cost you $16 less than nothing, can be held, though it could also react 8 to 10 points before going to 65 or 68.

General Motors closed at the top 34⅞. You should be long below 27 and I would take profits. Also on DuPont. Chrysler made a new high 52⅞ you should be long around 42 and it ought to go to 54 but why wait for the last point.

Amn. For Power 7 per cent pfd sold near 29. Take your profits. The transactions might run up 5 or 6 points in the next 10 days, but otherwise use all bulges—also in Col. Carbon and Johns Manville to lighten up.

Baring.

MINING

(Canadian Press)

TORONTO, July 11—The Toronto mining market made a better showing today, registering a small net advance but on a reduced turnover. Gold stocks firmed slightly following many successive declines and the base metal and silver shares were ondary gold issues yielded considersteady to strong. A few of the secable business and Bear in the silvers was active while the senior golds again traded in small volume.

Beginning today mining share prices of $15 and over appeared on the tape in dollars and fractions thereof instead of in dollars and cents. One-eighth will be the minimum fraction in use.

Lake Shore gained ¼ to 50½, Noranda ¼ to 37 and Teck Hughes gained 6 cents to 4.13. Hollinger sold at a new low mark for the year at 13 95. For a time Pickle Crow displayed weakness at 2.15 but it recovered before the close.

There were no changes of consequence in the base metals. Mining Corporation advanced 5 cents to 1.45 and Base Metals Corporation gained a cent. The oils were also dormant.

Markets At A Glance

(Canadian Press)

Toronto and Montreal—Industrial stocks slightly lower.

Toronto Mines—Narrowly higher.

New York—Stocks lower.

Winnipeg—Wheat down ⅛ to ⅜.

New York—Cotton, rubber and coffee lower; sugar unchanged.

PRODUCE

MONTREAL, July 11—Butter prices moved to a new record summer high on Montreal dairy and produce markets today while eggs and cheese were about steady. Potatoes slid downward a little.

No 1 grade butter in carlots or less was quoted at 20⅞ to 21 cents per pound while lots to retailers were 21½ cents for solids and 22½ cents for prints. Receipts totalled seven boxes.

The cheese market was steady with demand quiet. No 1 current Ontarios were 10⅜ to 10⅞ cents with no 1 Quebecs selling at 9⅞ to 10⅛ cents. Arrvals totalled 1,784 boxes.

Graded shipments in carlots or less of eggs were 21 to 22 cents a dozen for A-large, 20 to 21 cents for A medium, 19½ to 19¾ cents for B, and 17½ to 18 cents for C. Receipts totalled 441 cases.

On the potato market new potatoes were 50 to 60 cents per 80 pound bag of Quebec while old Maritime stock brought 30 to 40 cents per 80 pound bag.

GRAIN

(Canadian Press)

WINNIPEG, July 11—A United States Government estimate this year's wheat crop would be 61,000,000 bushels more than was estimated a month ago meant lower lower prices for Canada's wheat today.

Values closed ⅛-⅜ cent under the previous close, after touching their "pegged" minimums at one period. July closed in its 80-cent peg, but Aguust was at 80¾ cents.

Chicago's ½-cent decline and Liverpool's 1 ⅞d setback encouraged moderate selling here that at one time sent futures down to 80 cents a bushel, under which they can not go under exchange regulations.

Trading, generally, was inactive, retarded by the continued absence of foreign demand for Canadian wheat.

Cash grains were slow. Coarse grains declined sharply in response to wheat's weakness.

200 DANISH HORS D'OEUVRES FOR 1,600 ANGLO-DANES

Sixteen hundred Danish people sat down to a supper of 200 Danish hors d'oeuvres given by a Danish millionaire recently. Einar Dessau was host at the supper of the Anglo-Danish Society at Grosvenor House, London.

Danish food was brought from Denmark by airplane, guarded by two famous chefs from the most famous restaurant in Copenhagen. In Denmark the list of hors d'oeuvres in any first-class restaurant is nearly two yards long. So the colors of the rainbow appeared before the guests. Grey fish with tails in their mouths, white fish laid flat, red strips of salted meat sprinkled with pepper; green ovals of stuffed olives piles of green salad, with a blue mist of Danish dressing all appeared.

The flavor bittersweet is a secret which the Danes alone hold. Each course was served with Danish bread spread thickly with butter, and accompanied by Danish beer.

This Woman Rider Has World Record

SYDNEY, July 10—A world's record high jump was made at the Showgrounds when Madge Keane on Domino cleared 7 ft. 4 in.

The record high jump at the Sydney Showgrounds for men riders is 7 ft. 6 in., while the New South Wales record is 7 ft. 10 1-2 in. The previous best for a woman was 7 ft.

Head-Hunter's Son Translates Bible

SYDNEY, July 9—There is one language into which the Bible has not yet been translated. It is that spoken by the inhabitants of the Marovo Lagoon, a large group of islands of the Western Solomons, not far from the east coast of Australia.

As no written language has ever existed there, translation is a difficult task, but Kata Rangoso, the son of a former head-hunter and cannibal, is essaying it. He has arrived in Sydney to improve his English which he understands perfectnly but cannot speak well, and to overcome the difficulty of the written word in his own language.

Kata is a chief among his people and one of three sons of a former chief who embraced Christianity many years ago. Their missionary work has resulted in a state of comparative peace contrasted with the bitter and constant tribal warfare which formerly prevailed among their people.

PRIZE REFLECTS TEXTILE GROWTH

(By The Canadian Press)

LEEDS, England, June 9—W. T. Astbury, lecturer in textile physics at Leeds University, has been awarded the Actonian Prize approximately $500 by the Royal Institution for the best essay illustrative of "the wisdom and beneficence of the Almighty in some department of science."

It was founded in 1838 and has been awarded every seven years to some of the most distinguished scientists in this and other countries. It was awarded to Sir William Huggins in 1900 and Mme Curie in 1907, and has also been won by Sir Charles Sherrington and Dr. A. V. Will. The Astbury paper reported X-ray textile studies.

Japanese Plan Surtax on Canada

(Canadian Press)

OTTAWA, July 11—Neither the Department of External Affairs nor the Japanese legation in Ottawa had received any confirmation when the offices closed for the day of reports cabled from Tokyo that a 50 per cent surtax would be imposed by Japan on certain imports from Canada.

The cable stated the surtax would apply to lumber and wheat as well as certain other commodities and would come into effect on July 13 for one year.

For some weeks negotiations have been proceeding between this Dominion and Japan. Officials here believed they were still in progress. The situation is a difficult one from a Canadian standpoint, officials state. Japan has low production costs and vigorous trade policies. In addition, and more important than either of the foregoing, is the depreciated state of the yen.

BRUDENELL WOMEN'S INSTITUTE

The July meeting of the Brudenell Women's Institute was held at the home of Miss Myrtle Nicholson on Tuesday, July 2nd, with eleven members and one visitor present. Meeting opened by singing Institute Ode. This was followed by roll call and reading of minutes of previous meeting.

The correspondence was then read, which included a letter of thanks for fruit sent to sick member, also letters from Senator J. J. Hughes, R. T. Holman, Ltd., and the Children's Aid Society. The sick committee reported that they had visited all the sick members; school committee reported they had visited the school and that the pupils had been treated with ice cream and cake at the school closing.

It was decided that we work the tufted bedspread the latter part of this month.

The hostess served a delicious lunch which was very much enjoyed by all. Meeting to be held next month at the home of Mrs. Edison MacIntyre. Meeting closed with National Anthem.

The Summer Care Of Dahlias

(Experimental Farms Note)

It is essential that dahlia plants be kept growing. A check in growth will usually result in a hardening of the stalks and eventually cause stunted plants. To ensure continuous growth, thorough cultivation must be given. This can be accomplished best by frequent hoeing. The plants require plenty of moisture and in dry seasons, or dry locations, must be watered liberally.

If the soil has been properly enriched at planting time, it is seldom necessary to provide additional plant food during the summer months. However, finely grounded bone meal may be applied fairly liberally at any time during the growing season with good results. Tardy growth can be speeded up with light applications of nitrate of soda but this must be used with extreme care, otherwise over-stimulation may result.

Staking is usually done before planting but if this has been neglected it should be done before the plants have made much growth.

When the object of the grower is quality, not quantity, it is advisable to limit the number of flowers produced. This is accomplished by pinching out undesired buds and shoots. If this is done often, and while the buds and shoots are developing there will be little check to the plants. As a rule the lower down the lateral shoots are induced to develop, the longer will be the flower stems.

Mosaic has recently become a serious disease of dahlias, some varieties being apparently more susceptible than others. To avoid spreading this disease the plants should be gone over frequently and all plants suspected of having mosaic rogued out and burned.

One of the most troublesome pests at the Dominion Experimental Station at Charlottetown, P.E.I., in recent years, has been the red spider. This insect works chiefly on the undersides of the leaves and sucks the juice from the plants. The effect is a yellowing of the foliage not unlike mosaic for which it is often mistaken. A thorough syringing of the underside of the plants at frequent intervals will do much to keep this insect under control.

Aphids, while common, are usually not hard to control. The easiest method is to spray with a solution of black leaf 40 (nicotine sulphate) one or two teaspoonfuls in each gallon of water.

CANADA FAVORED TO START TOURS

NEW YORK, July 11—Canada's reputation as a music-loving nation is enhanced by her selection as a starting off place for the tours of two outstanding musical organizations of the continent.

Fortune Gallo, impresario of the San Carlo Opera Company, who last season chose Toronto as the inaugural city in the most successful tour in the history of the organization, will begin the 26th annual tour at Montreal Sept. 9.

From the Quebec metropolis, the company will visit several Ontario cities before re-entering the United States. Later during the tour, the San Carlo will swing back into Canada, bringing grand opera to many western cities for the first time in 15 years.

On three of the five occasions the Don Cossacks Russian male chorus has visited North America, its tours have started in Canada. On Oct. 5 next, following their Mexican engagements, Serge Jeroff, diminutive leader of the "singing horsemen" will start a Canadian tour in Quebec, before appearing in the United States. Their Canadian itinerary will take them from coast to coast.

The Don Cossacks will celebrate their 3,000th anniversary concert in Carnegie Hall, New York, Nov. 29, said to be a record never before achieved by any singing ensemble.

Floods Drive Settlers To Higher Lands

(Canadian Press)

EDMONTON, July 11—Another rush of settlers to higher ground to escape the rising waters of Lesser Slave Lake, 150 miles north of here, took place today.

Two weeks ago a previous flood sent them fleeing from their homes. The Lake is now 12 feet above normal after subsiding somewhat from previous high levels.

In the Grand Prairie and Spirit River area all communication was again halted with temporary bridges displaced and ferries forced out of commission.

PENGUINS CAVORT FOR WALT DISNEY

LONDON, July 11—Walt Disney, whimsical screen cartoonist thinks the zoo at Regent's Park is "swell" and Mrs. Disney says if it were only possible to have a week-end cottage in England with real thatch on it, life would be "absolutely complete."

The creator of Mickey Mouse made two new friends at the zoo. Practically all his time was taken up with Percy and George, the King Penguins, and he spent nearly four hours there.

As the penguins cavorted and dived and waddled, Mr. Disney took 200 feet of pictures of them with his color camera.

Meanwhile a squad of press photographers took pictures of Disney. At last he sought refuge for an hour in the aquarium. "The quietest place I've found in London," he called it.

He couldn't be persuaded to visit the mouse house. He sees no connection between small rodents and Mickey, but so delighted was he with the Regent's Park zoo that he intends to go to Whipsnade as well.

Meantime Mrs. Disney had done some shopping and visited a hairdresser's.

"I used to help my husband with his work, but now I keep away from it as much as I can," she said, and the News Chronicle reporter declares "she is a delightfully pretty and petite young woman with mischievous blue eyes."

Mrs. Disney loves the coziness and homeliness of England. The chimney-pots are "the most exciting things" she has ever seen.

Radium For Treatment Of Cancer

One of the most useful methods of treating cancer is by means of radium. Its scarcity, however, has made its use almost prohibitive. There are a number of radium-bearing minerals known but from only a few may radium be extracted commercially. Pitchblende is richer in radium than any other mineral. It receives its name from its black colour and pitch-like appearance and not because it bears any relation to pitch. The name pitchblende was given to this mineral by the miners in Saxony, and Bohemia, who regarded it as being somewhat of a nuisance and discarded it as worthless. Many valuable minerals have been so discarded before their usefulness was discovered.

Until about fifteen or twenty years ago, pitchblende was found chiefly in the old silver mining districts of Erzgebirge on the Saxony-Czechoslovakia border. It was most prevalent in the Joachimstal district in Czechoslovakia. It has also been found in considerable amounts in Cornish copper mines in England where it was also discarded as being of little value. It was likewise found in Colorado, but the richest deposits are those of the Katanga district of the Belgian Congo. The radium content of this district proved to be so rich that the production of radium from ores in other parts of the world has practically ceased.

Pitchblende consists of oxide of uranium from which radium is extracted. One of the other uses of uranium is to color glass. The cost of mining and treating pitchblende in the process of extracting radium is expensive and the finished product varies in price between $50,000 and $70,000 a gram. The cost in Europe is usually $50,000 a gram, and in America, $70,000 a gram; Americans having more money are charged more. This is one of the disadvantages of the monopoly.

In Canada of recent years, pitchblende has been found at Great Bear Lake, and is very similar to that in the Belgian Congo. It shows an equivalent of one gram of radium to about seven tons of ore. On the basis of $50,000 a gram, the value of one ton of ore would be approximately $7,000. Being located at the water's edge of Great Bear Lake, it will be possible to bring out the ore by water almost all the way to rail at Waterways, so that the cost of transportation should not be excessive. It appears at the present time that this deposit will prove to be a very valuable source of radium for Canada. Radium has become a necessity in the treatment of cancer and in some forms of the disease is superior to even the most advanced surgery.

Open Kettle Canned Strawberries

Wash and hull fresh sound berries. To each pound of berries add half a pound of granulated sugar, place in a kettle, heat slowly, shaking or stirring gently to keep from burning. Boil slowly for 15 minutes. While boiling hot, fill into hot, sterilized jars and seal.

A three-year study by the Division of Economic Fibre Production of the Experimental Farms Branch has shown that Canadian homegrown flaxseed has given a higher yield of fibre but a lower yield of seed per acre than imported seed.

Mrs. Figg—Does your husband ever pay you compliments?

Mrs. Fagg—Well, sometimes he says, "You're a nice one."

They say her husband's words are sharp and to the point."

"Maybe that's the only way for him to get a word in edgeways now and then."

LIVING EASIER IN OTHER DAYS

MIMICO, Ont., July 11—A little old lady in the village of Sheridan who always wore a white grandmother's cap when she came to listen to sermons, seated in the front pew, is one of the memories of Rev. G. Wilson of Wesley United church, Mimico, 50 years in the ministry.

At one time he was probationer in the Cooksville circuit of the Methodist Church. "I believe people lived an easier, more contented life then than now," Mr. Wilson says. "They didn't rush and run so much and I think it was better for them. They all went to church, too."

Advertising Rates—Payable in Advance
