The first game of football for the Collegiate Championship of the Island took place at the A. A. A. grounds yesterday afternoon between a team from Prince of Wales College and the intermediate team of St. Dunstan's College.

The line-up of the Prince of Wales team was given in yesterday morning's Guardian; while the wearers of the red and white lined up as follows: Full Back, C. Cahill; Halves, G. Morrissey, J. McIntyre, P. McQuaid, R. St. John; Quarters, S. DesRoches, A. Sinnott, C. Conway; Forwards, L. Murphy, R. McCarthy, J. Praught, R. Smith, P. A. McElihan, E. Doyle and E. Gallant; substitute, D. McDonald.

What is needed is a means of gently urging the assimilative functions of the stomach and intestines to absorb the oils and fats and hand them over to the blood, where they may reach the starved, shrunken, run-down tissues and build them up. The thin person's body is like a dry sponge—eager and hungry for the fatty materials of which it is being deprived by the failure of the alimentary canal to take them from the food.

The best way to overcome this sinful waste of flesh building elements and to stop the leakage of fats is to use Sargol, the recently discovered regenerative force that is recommended so highly by physicians here and abroad. Take a little Sargol tablet with every meal and notice how quickly your cheeks fill out and rolls of firm, healthy flesh are deposited over your body, covering each bony angle and projecting point. Your druggist has Sargol, or can get it from his wholesaler, and will refund your money if you are not satisfied with the gain in weight it produces as stated on the guarantee in each package. It is inexpensive, easy to take and highly efficient.

Caution:—While Sargol has produced remarkable results in overcoming nervous dyspepsia and general stomach troubles, it should not be taken unless you are willing to gain ten pounds or more, for it is a wonderful flesh-builder.
