(Continued from Page 2) "I hated him," said Prudence quickly. "He's so brusque, and rough-mannered, I dare say you'd call him one of Nature's gentlemen, but I dislike that sort of thing."

2-Storey Railroad Cars

A new type of railroad coach, double-decked in interior design and capable of carrying forty-four more passengers than the ones hitherto in use, has just been put into service.

Jimmy Jingle Says: All our cakes are full of cheer. Make you think your birthday's here.

ture in an effort to determine the practicability of replacing all the cars in service with the new kind. If the tests prove successful the car is expected to be a long stride in the restoration of profits to commutation and short-distance railroading, for it will provide the means of carrying more passengers with fewer trains and a lessened consumption of power, since the new car weighs less than those now used.

"The coaches, which may be replaced, have a capacity of seventy-six passengers, while the new ones will seat 120. "The most notable feature of the design," an official announcement says, "is that the car is constructed with two tiers of seats at different levels."

"The floor-board of the lower tier of seats is fourteen inches below the aisle, so that the seats are almost flush with the aisle floor. Passengers will descend one step to the lower tier seats. The floor-board of the upper tier seats is above the central aisle.

"The sunken seats in the lower tier permit the upper-tier seats to over-hang, with still enough space for head room of passengers. Windows are so placed that each seat, upper and lower, has its window."

Denies He Will Resign

NEW YORK, Aug. 8.—(A.P.)—A spokesman for Orestes Ferrara, Cuban Secretary of State who returned today from the London Economic Conference, said tonight that Ferrara talked by telephone with President Machado and that the President denied reports from Havana he would resign within 24 hours.

(Canadian Press) KENTVILLE, N.S., Aug. 8.—Indications in the Annapolis Valley point to a good fruit crop this year, Dr. H. T. Gussow, Dominion Botanist, said here before returning to Ottawa following an inspection of the Valley district. Increased use of insecticides had resulted in very noticeable improvement, he remarked.

A New Kind Of Windmill

At West Burlington, New Jersey, rises a curious structure which may prove to be as historically important as the first electric station built by Edison fifty years ago in New York.

A metal cylinder, ninety feet high and twenty-two in diameter, is to be one of a series of windmills which will generate electricity and reduce the coal bill of a great power-house.

The power generator of rotorship, recently prominent in the press, has been transferred to the land. Says Waldemar Kaempfert in the New York Times, as quoted in The Manufacturers' Association Bulletin (Trenton, N.J.)

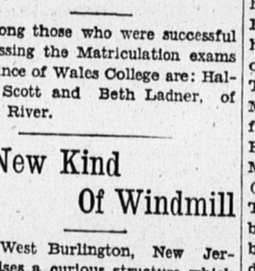

"If the strange cylinder that looms upon the meadows of New Jersey fulfills expectation, it will not stand alone. About twenty more like it will be erected. Mounted on flat-cars, they will be coupled in a train which will be blown around a circular track. On the axles electric generators will be carried.

"Six public-utility companies were so impressed by the potentialities of such a wind-power plant that they are building a full-sized cylinder at a cost of well over \$100,000. "The old fashioned wind-mill does not extract more than 5 per cent of the energy from wind power. Apart from this, the sails have a speed that may become dangerously high. Even reefing may not prevent disruption in a violent gale.

"The possibilities of the wind became apparent as the airplane was developed. Physicists and engineers ransacked technical literature to find out what their predecessors had done. So it happened that the half-forgotten Magnus effect was discovered."

for BITES

Insect, snake, or animal... the best treatment is plenty of MINARD'S at once. It draws out the poison!

MINARD'S "KING OF PAIN" LINIMENT

A great need of the soil for crop growth is that of an air supply. Every one realizes the importance of air for animals, but that it is needed for plants is not such common knowledge.

COMPLETE LINE of Fan Belts carried in stock at Mallett's Battery Service. 2015-7-26-wed-if.

CHURCH OF SCOTLAND—There will be divine service at Birch Hill on Thursday 10th at 7.30 p. m. J. H. Bishop, Student.

CHURCH OF SCOTLAND—Rev. Ewen MacDougall will preach Thursday 10th at Stanchel at 7.30 p. m.

POLICE COURT—At the Police Court yesterday morning, a man, charged with vagrancy, was sentenced to three months in jail.

CHURCH OF SCOTLAND.—The Sacrament of The Lord's Supper will be dispensed in the Kirk Coleman on Sabbath 13th. Services at 10.30, and 7. Preparatory service on Saturday 12th at 7.30 p.m. Service on Monday 14th at 10 a. m. The Sacrament will be dispensed at Kinross on Sabbath 20th.

RANKS SECOND—Miss Doris Warren, the student ranking second in the list of successful matriculants comes from North Rustico instead of Anglo Rustico as reported. The teacher of this school is Mr. Arthur Woolner and this is the third scholarship from this school in two years. Congratulations are due to both teacher and pupil.

FUNERAL YESTERDAY—The funeral of the late Wallace MacIntyre took place yesterday morning from his late residence, French Village, and was largely attended. The C. M. E. A. attended in a body. The services at the church and grave were conducted by Rev. A. P. MacLellan. The pall bearers were John Pigott, John MacIntyre, Joseph Douglas, John McKinlay, Arthur Coffin and Arthur McCormack.

GOLDEN WEDDING—Mr. and Mrs. Charles Pridham, old residents of Montrose, celebrated the fiftieth anniversary of their wedding on Wednesday, July 12. Congratulations were extended the couple on the occasion of their golden anniversary. To add to the happiness of the occasion all their children were in attendance to help celebrate the occasion, namely: Mr. and Mrs. Alvin McMurdo (Esther C. Pridham) and family, of Montrose, Mr. and Mrs. Perley Pridham and family of Alberton, Mr. F. T. Pridham, Miss Doreen Pridham of Fredericton, N. B., Mr. Le Bert T. Pridham, of Fredericton, N. B., Mr. and Mrs. Hudson Pridham and family of Montrose, Mr. and Mrs. Harry Pridham and family of Montrose, Mr. and Mrs. Austin Rix (Lillian M. Pridham) of Alberton. There was a delicious supper served by the daughters and other members of the family. After an address was given by their son Le B. T. Pridham the couple were presented with suitable gifts for the occasion. Needless to say the twenty-one grandchildren as well as older members of the family had a very pleasant afternoon.

WISNER-BEATON—One of the prettiest and most interesting weddings of the season was solemnized at St. Joseph's Church, Vernon River on Monday July 10th when Miss Mary Irene, eldest daughter of Mr. and Mrs. Augustine Wisner became the bride of John Leo Beaton of Charlottetown. At nine o'clock to the strains of the wedding march played by Miss Mary Collins, R. N., who was assisted in the choir by Mr. J. A. O'Keefe, the bride on the arm of her father placed beside the groom. The ceremony was performed by the Reverend P. D. McGuigan, pastor of Vernon River. The bride wore pale blue silk sheen, with accessories to match and carried a bouquet of ophelia roses and maiden hair fern. Mr. Edward Ryan of Charlottetown was best man. Following the ceremony a breakfast was held at the home of the bride's parents, Watervale. Later the bride and bridegroom left to spend a honeymoon in the Maritimes, after which they make their home at Charlottetown. For travelling the bride wore a grey crepe dress, grey coat, trimmed with fox fur and a grey felt hat, with black shoes, gloves and purse. Previous to her marriage a miscellaneous shower was held for the bride at the home of Mr. and Mrs. Joseph Redmond, Lake Verde.

New South Wales on the Up Grade

"There is definitely a general feeling among employers that the corner has been turned," said the chairman of the association of colliery owners on the northern coal district of New South Wales who gauged the progress by the coal business, which he stated was improving steadily, many more miners being at work than a year or two ago; but, as further indication reports of the Employers' Federation members show that there is a definite upward change. In a speech during the month the Premier (Mr. B. S. Stevens) said that from his observations of the situation the position had improved substantially. The gap between prices and costs, he affirmed, was being narrowed and there was rapid progress towards a balance in finances.

Toward that end the State Government has put in force many economies and has stimulated business by advances and grants for reproductive works. The currency circulation has been stirred and the factories have taken on more hands. Unemployment in both the cities and the country has shown a gratifying decrease. Reductions in railway charges have been made, and the Government has announced that further lowering of transport costs of wool and live stock will come into force in July, at which date harbor charges on all primary and secondary exports will also be reduced.

Favorable Weather Conditions April was marked by excellent rains throughout the wheat belt and in the greater part of the grazing areas in the west of the State of New South Wales. The falls came at a time most favorable for the farmers and pastoralists, and the rural outlook has been affected substantially. March, according to the official records, was unusually dry and the farmers were a little anxious they were cheered by news of heavy rains in Queensland, the State to the north, indicating meteorological disturbances fairly certain to spread to New South Wales, which came in due course. Plentiful winter feed for the flocks and herds is now assured, while the wheat lands have been soaked. The dairying districts, which are mainly on the north and south coastal districts from Sydney, were also well supplied.

The Sydney wool market closed for the Easter recess under very brisk competition, the demand being much keener than in the earlier part of the season. The improvement trend was most pronounced in the finer Merinos and well-grown, deep, spinners' wools, Yorkshire's inquiry for the last named being very brisk. France was a vigorous operator, and Japan a free buyer. Australian manufacturers have been decidedly keen in securing a number of the best class lines, the local trade influence being a strong factor. The pastures having been revived by rains over the bulk of the inner districts of the State, many growers will now shear a better weight of wool per sheep than looked probable previously. By way of stimulant in local use of wool Sydney has been holding a Wool Week. In a speech the president of the association of the graziers expressed the opinion that wool will be the first of the Australian industries, and probably the first of the world's great industries, to recover prosperity, because as soon as times improve there will be a great burst of buying of clothes.

A Great Agricultural Show The big Australian event at Society's show, which, open for nine days, is visited by hundreds of thousands of people. Although every kind of motor driven machine is now in use in the rural districts there was nevertheless at the show in April keen competition with horses of unsurpassed beauty and quality, both light and heavy, and the great attraction for the crowds was the hurdle jumping in the trials in a large arena in the centre of the grounds, where also trotting, pacing and parades of the exhibits took place by day, and at night under brilliant flood lighting.

SALT PRODUCTION IN MAY Commercial salt production during May advanced to 17,342 tons from the preceding month's total of 13,654 tons. In May, last year, 15,406 tons were produced. A production of 62,773 tons during the first five months of 1933 as against 63,880 tons in the corresponding period of 1932 is reported.

Remarkable claims which promise long life and perpetual youth for all up to the age of 65 are made by a famous British scientist.

He is Helan Zaworski, the eminent Paris physician, who has been investigating the question of rejuvenation in France for the past ten years. Now he claims that his results have reached such a stage that he can definitely defy old age and give health and vigor of a man of 40 to persons of 65 or over. In connection with his researches a remarkable scene was witnessed in Paris the other day when men and women looking the picture of health attended a lecture to testify to the efficacy of the treatment. "I do not pretend to prolong life abnormally, or to make a woman of 70 into a Venus of 20," Dr. Zaworski says. "Those are things which appeal to the imagination but are now, at any rate, not possible. What I do maintain is that I can restore strength to elderly and debilitated people so that they may enjoy life fully much longer than would be so in the ordinary way. "Old age—or senility as I prefer to call it—should be regarded as a terrible enemy by the present generation. Its attendant disabilities should be banished. My method is a simple one. Briefly it consists of the injection of small quantities of blood taken from young men and women who are perfectly healthy and strong, into the veins of an aged person. "Only a few drops are injected at a time, for it is not a question of quantity but of quality. A normal treatment consists of twelve injections made at the rate of about three a week. I have known persons who required up to 24, but that is exceptional. "The young blood is taken very shortly before the injection and subjected to strict sterilization as a matter of precaution against the transmission of infectious diseases. This last matter was one objection brought up by my fellow physicians but I have now been able to eliminate this danger completely. "As the treatment goes on the blood is not always taken from the same youthful subject. It depends on the patient's rate of progress. "The effects of the injections continue for about a month after the end of the cure and last for several years. Painlessly and without stopping to think about it, an elderly person can now resume youthful health and interest in life. "I do not claim to have discovered anything supernatural. There are many known cases of men and women of seventy or more who are full of life and vigor. By my treatment I merely claim to give this benefit to those who normally would not have enjoyed it. "I am shortly to examine a remarkable man who some 60 years ago decided to live to 90 and planned a method of living which did not interfere with his normal activities. Details of this method he placed in a sealed envelope which he handed to the Academy of Science. This envelope was only to be opened when he was 90. "In a few months, therefore, we shall learn his secret. Despite the fact that he is now 89, he is as strong and well as a young man."

Production of GALVANIZED SHEETS In Canada during the second quarter of 1933 totalled 8,851 short tons as compared with 1,807 tons made during the previous three months and 9,061 tons in the corresponding period a year ago.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Eye Comfort for eye workers is a matter of vital importance. From early morn to late at night we "crowd" our eyes relentlessly, from one job to another. How long will they stand it? Are you now enjoying that efficiency and comfort which ought to be yours? Consult us if you are not: You have much to gain, and nothing to lose. In any case the knowledge gained from an examination, makes it well worth while.

Forest Fire Threatens Indian Reservation

(Canadian Press) TRURO, N.S., Aug. 8.—Starting a short distance from the village of Hilden, a forest fire was spreading toward a nearby Indian reservation tonight, but the flames appeared somewhat subdued as darkness fell. Village residents were alarmed at one time as they saw the fire sweeping towards them. A later shift of wind, however, brought the reservation into the danger path. A large crew of men were fighting the blaze.

Places Cornerstone

ROME, Aug. 8.—(A.P.)—Premier Mussolini Saturday placed the cornerstone for the new city of Sabaudia which will arise in the reclaimed Pontine marshes. The city will be inaugurated April 21, of next year with a capacity of 50,000 inhabitants. After today's ceremony Signor Mussolini visited Litoria, the new Pontine city inaugurated last year, where the first crop will soon be harvested.

Lost In Woods For Two Weeks

CORNERBROOK, Nfld., Aug. 8.—Too weak to describe his terrible experience, Neil Gregory of Curling lay in hospital here tonight suffering from hunger and exhaustion as the result of two weeks on aimless wandering in the woods. Gregory disappeared on July 24 and was found today at George's Pond, about 20 miles from his home.
