A HOLIDAY—All should enjoy a holiday at the League of the Cross picnic at Bedford on Monday, July 19, 1915.

ADVERTISERS—Owing to this being half holiday, advertisers are requested to have all changes of ads. in by 10 a. m. to ensure insertion tomorrow.

SUMMER SCHOOL—The opening meeting of the Summer School for teachers will be held at Prince of Wales College Hall at 8 o'clock this evening. Addresses will be given by prominent educationalists and others. The public are cordially invited.

TRYON CIRCUIT PICNIC—The annual picnic of the Tryon Methodist Church will be held at Crapaud (same grounds as last year) on Wednesday, July 14th. Come early and see the competitive sports. Supper served from five to seven. Tickets thirty cents. For further particulars see posters.

SUMMER SCHOOL FOR TEACHERS—Mr. F. F. Smith, Buzzard Bay, Mass., who was one of the teachers at the Summer School of Science last year, Dr. Minton Asbury Chrysler, of the University of Orono, Maine, and Mr. Wm. D. Fuller, Union School Superintendent of Old Town and Orono, Maine, arrived Saturday evening to take part in the Summer School for teachers, which opens in Prince of Wales College Hall this evening.

INTERRUPTED HONEYMOON—A St. John exchange says: There arrived in the city on the Point du Chene express Tuesday evening a happy young man and woman from Prince Edward Island. It was at once apparent that they were bride and groom. She clung tightly to his arm; she gazed devotedly into his face; and he looked into her eyes with rapturous admiration. But their honeymoon was disappointingly short. The immigration regulations prevented their entrance to the United States because of their being short of the required funds, and the officers were compelled to turn them back. The bride and groom remained here last night, and lingered about the Union Depot this morning. They did not seem to mind the abrupt change in their honeymooning, but determined to make the best of it, and sat "billowing and cooing" in the depot while passers-by shot glances in their direction, and saucy boys whistled the chorus of "Just a Little Love, a Little Kiss," and similar refrains, which from their "spooning," seemed appropriate.

INTERESTING VISIT—The Guardian is indebted to Mr. A. E. MacLean for the following description of the Quebec Bridge, which he was shown over by the chief engineer, on his recent visit to Quebec City. The bridge is the largest of its kind in the world. The main span, which is 1800 feet long is 90 feet longer than anything yet attempted in bridge building. The height of the top from the water level is 330 feet. The weight of iron used in construction is 65,000 tons. The heaviest lift in connection was 190 tons. The height clear above water is 150 feet so that the largest ship afloat can pass under. Two railway tracks and two sidewalks run across. The immensity of the iron castings is shown by one million dollars was spent in a special plant at Lachine near Montreal where the bridge material is assembled, and another million in field equipment at the bridge site. The work will be finished in about 18 months and will bring into the city some ten different Railway lines to the great union station now building. In addition to this there are other works of about the same magnitude going on such as the damming of the St. Charles River to raise the water to a twenty foot level. The deep water terminals which will be three miles in length for the big Ocean Liners, also the tunnel through the mountain near the water front, so that the transcontinental can run direct to their immense new shops. Some 17 larger buildings are to be completed this fall, which will employ about 4,000 people. On the whole the historic city of Quebec is taking on new activity and is going forward in a steady march of progress.

PHOTOGRAPHIC SUPPLIES—We have an agency for the celebrated "Anso" Photographic Supplies and carry a full line of Films, Paper, Plates, Developers, Cameras etc.—Special attention given to developing and printing. Bring your films to us.—E. A. Foster, Central Drugstore.

THE 2 MACS

149 Great Geo. St.

SPECIAL TRAIN—The trains for the League of the Cross picnic next Monday will leave the city at 9.15 a. m. and 2 p. m. Fare, adults 40c., children 20c. 1915.

HORSE RACE OFFICIALS—The officials of the Horse Races today will be, Starters Mr. P. S. Brown, Judges Messrs J. P. Crabbe, Hammond Kelly, F. W. Hughes, Timers P. H. McMahon and C. P. Farquarson. Between heats the sports will be run off.

TAKEN POSITION—Miss Bessie Rattée of Malpeque has secured a position as teacher in the Pointe-aux-Trembles Schools near Montreal, and will leave for that city with other members of the family in about two weeks. These schools are under the charge of the Presbyterian Church and are attended by about 275 pupils.

EXAMINATION—The semi-annual examination of Knutsford graded school was held on Friday June 25th. The large attendance of ratepayers and others evidenced the interest taken in the examination and the popularity of the teachers. The examination was conducted by Mr. George Yeo, Miss Sadie Moreshead and the teachers, and showed by the ready answers very careful training and most gratifying success. The Primary Department in charge of Miss Alice Johnson was first examined, and the great progress made was most pleasing to all present. The teacher of the numerous little "tots" deserves much praise for her successful work. The ratepayers of Knutsford feel loathe to part with Miss Johnson but what is their loss will be another's gain. In the Advanced Department in charge of Miss Annie McKenzie correctness was a most notable feature. The advanced class showed that the "groundwork" was solid. The other classes in like manner showed that they were not advanced until they were qualified and thoroughness in everything was marked in all the classes of this department. Thoroughness is everything in school work as in everything else and in this both teachers excelled to a great degree. Under the present teacher, Miss McKenzie we look for great things from this school. Throughout the exercises the following program was carried out.—Words of Welcome by Blanche Dymont, Chorus, Tipperary, by the school, Recitation, Curfew must not Ring Tonight by Jennie Yeo, Chorus, Maple Leaf for Ever by the school, Recitation, The first Year at School, by "tots" of Miss Johnson's class, Chorus, Tramp Tramp, Tramp by school, Recitation, A Young American in Pinatofre by Velda Dymont. At the conclusion of the program words of commendation were expressed and some wholesome advice given by Mr. George Yeo, Secretary of the Trustees. He showed that the boys and girls of today will be the men and women of a few years hence and that all should be impressed with the great importance of all the attributes that go to make up good citizenship, that of Empire. Mr. Alfred Moreshead who takes a great interest in school work and in the building up of a thorough Canadian sentiment, impressed the pupils with the importance of attending school regularly. At the conclusion of these very instructive speeches, Miss McKenzie, teacher of the advanced department, replied on behalf of Miss Johnson and herself, thanking all present for their large attendance and their past courtesies to them and asking them to unite in co-operation with the teachers throughout the coming year and help to make their lives in Knutsford as useful and happy as it had been in the past. The pupils kindly remembered the teachers with numerous gifts and after partaking of the dainties provided by the teachers and listening to the closing address given by Miss Moreshead, one of the pupils of this most instructive and enjoyable examination was brought to a close by singing the National Anthem, when all departed feeling that they had spent a most pleasant afternoon.

HARD COAL—We expect two cargoes of best quality Hard Coal in Egg, Stove and Chestnut sizes. Customers would do well to leave their orders now as coal will be higher later in the season. C. Lyons & Co. 1925-7-9M101

The Deering New Ideal Mower has a reputation the world over for superior quality in its construction, and for its work in the field. Deering mowers are famous for their light running, as they are well fitted with ball and roller bearings at all points of wear thus reducing any chance of friction.

The tongue of a Deering mower can be removed without interfering in the least with the lifting lever parts, by simply removing three bolts, which enables a farmer to store his Deering mower in a very small space.

The seat and gears are correctly placed so that the machine has good balance, and operates without side draft, or putting neck weight on the horses.

The Deering New Ideal Mowers are made in sizes of 3 1/2, 4, 4 1/2, 5, 6, 7 ft., and sold with a positive guarantee to give perfect satisfaction. For further information or catalogues apply to your nearest Deering local agent, and also on the following machines etc.
