L. O. C. BOWLING

Wednesday night on the L. O. C. Alleys a double header was rolled. The first game was between the Spuds and Anchors and the second game between the Spuds and Victorias. The first game was won by the Anchors by a margin of 69 pins.

Following are scores: 1st game. Spuds C. Praught 226 108 144 E. Robin 174 225 144

2nd game. Victorias J. Hughes 234 184 191 C. Howatt 179 236 180 C. Kelly 161 203 245 J. Heron 187 145 104 W. Carmody 161 195 225

In the first game C. Praught and E. Robin tied for high single score of 226, while J. McInnis had high game Rev. P. McMahon had high single score of 274 also high total of 631 pins.

LAST NIGHT'S GAME Last night on the L. O. C. Alleys a good game was rolled when the Invincibles met and defeated the Crescents by a margin of 206 pins.

Following are scores: Invincibles W. Coyle 154 177 144 P. Doyle 122 222 218 H. Hennessy 179 163 206 E. Goss 219 190 207

Crescents P. Tierney 207 198 221 L. Duffy 197 200 159 H. Harley 106 138 115 J. Malone 183 125 146

Next game takes place Monday night at 8 o'clock sharp, when the Victorias roll the Anchors, and a real good game is expected.

82.8% INCREASE In Reserves Last year the reserves to cover insurance contracts increased 82.8% over the year before, security to policy holders now being six times the Reserve requirement of the Department of Insurance, Ottawa.

Unsurpassed safety coupled with attractive premium rates and returns to policy holders account for the popularity of the Company's policies.

BIG CURLING BONSPIEL AT MONTAGUE

On Wednesday last two rinks of doughty Charlottetown curlers boarded the Eastern train for the fair town of Montague in response to a pressing invitation from the redoubtable Montague curlers. After being pulled part of the way and pushed the last end of the journey by our C. N. R. the boys arrived at Montague the beautiful being met at the station by His Worship Mayor Mabon, President McLean and other noted members of Montague Curling Club who escorted them to the new and splendid skating rink, at 6:30 all sat down to supper, and such a supper only Montague can put up, two long tables beautifully spread with the best P. E. I. can produce, in the centre of tables stood the much-prized "Garburey Cup" and "Summerside McArthur Mug" (not cup) after a sumptuous repast President McLean proposed the toast to our King and further announced that regular toast list would be looked after later on or after we had curled two matches, it being agreed to that we curl three match games and second supper to be served at 12 o'clock and after that the final game to be played.

On lining up in rinks we could see that Montague was out for blood. The McInnies, McGregors, McDonalds, Campbells, McLeans, Clarksons, Johnsons and Stewarts were all there in full war paint, to punish us for capturing the McArthur Challenge cup a few weeks ago. "Boys," but it was a hard fought two games and at 11:45 at finish of second game the result was a tie 34 points each.

Then the fun commenced, second supper was served in fine shape and Belfast ginger ale and Scotch whisky were all there in full war paint, to His Worship Mayor Mabon presented the Charlottetown boys with the key of Montague and the freedom of the Town. Fun galore for about an hour, the best of fellowship prevailed, soup and speeches without end, and mind you not being content with winning the "French Consul" Garburey Cup one of the Montague Scotch curlers was actually learned to sing "Allouette." At 1:15 "early morning" we lined up for the rubber game, we went out to win—so did Montague—it was a hot game all through, one of our rinks tied score, but our other rink went down to defeat, do what we could we could not make the counts at times, they looked good, but stones drew in well, right to the legs but they simply would not stop there, that "Banker" skip, is a fine fellow but he's the very devil with the broom, he swept so hard that the ice got hot and slid our stones out of rink and so ended the last game, and dear old Montague leading 6 points for the three games. Another sing song and at 3:15 headed for Maynards and had a couple of hours rest before leaving for home.

The Charlottetown boys are loud in their praises of Montague's big Scotch welcome. They certainly are "game sports and good curlers, and will always be welcome to Charlottetown.

Following is the lineup of rinks and scores: 7:45 P. M. Charlottetown Montague a bed.

THE MARKETS

(Canadian Press) OTTAWA, Ont., March 10 (Eggs)—No change is reported from Canadian Egg Markets today.

WINNIPEG—Local egg prices remain steady. Dealers are quoting country shippers for ungraded eggs delivered cases returned extras 35-37; firsts 32-33; seconds 28-27. Prices to retailers are extras 40; firsts 38; seconds 24.

VANCOUVER—There has been no change on the Egg Market here. Dealers are quoting producers extra 25-28; firsts 22-25; pullets extras 20-22 delivered.

HALIFAX—The Market here is showing a firmer tone and there has been a slight advance in jobbers' prices. Local supplies are being augmented by importations from P. E. I. Quality of local stocks is showing a marked improvement over the same period last year. Dealers are paying country shippers delivered Halifax extras 40; firsts 36; seconds 22. Prices to retailers are extras 47; firsts 44; seconds 32.

MONTREAL, Que., March 11.—There was a good enquiry from foreign buyers for Manitoba wheat here Saturday and a fairly active business was done. There was no further change in the condition of the local cash grain market, prices for oats being steady under a quiet demand. The export trade in spring wheat grades of flour was fair and sales of round lots were made to the United Kingdom, the Continent and the British West Indies. The local demand was quiet but prices were unchanged. A moderate amount of business was done in Western wheat grades and values were firm. A very strong feeling prevailed in the market for all lines of milled and the indications were that prices would be again marked up in the near future. This was attributed to the continued urgent demand from United States and the demand for standard grades of rolled oats was limited. A fairly active business was done in fresh eggs but values were easier and dealers in some cases reduced their prices one cent per dozen. The receipts were 705 cases. The strength which characterized the local butter situation all week was more pronounced on Saturday and prices scored a further advance of one cent per pound, making a net rise for the week of 3-1-2 cents per pound. The demand was good and a large volume of business was accomplished. The demand for cheese packages. The demand for cheese was confined to small lots and prices were firm. The receipts were 85 boxes. Potatoes and bean markets not available tonight.

POTATO GROWERS IN SESSION.

At the Friday afternoon session of the Potato Growers Association the following points in regard to fertilizer were explained by Mr. Boulter:

Chemicals vs. Mixed Fertilizer There are three elements of plant food required. 1st. Nitrogen, which is obtained from Nitrate of Soda, or from Sulphate of Ammonia, or from both.

2nd. Phosphoric Acid, obtained from Acid Phosphate. 3rd. Potash, obtained from Muriate of Potash.

Different mixtures are expressed by the units of plant food the mixture contains. For example, a 4-8-7 represents 4 units of Nitrogen, 8 units of Phosphoric Acid and 7 units of Potash.

A unit is one per cent. of a ton, or 20 pounds. Then, you would have 80 lbs. Nitrogen, 160 lbs. Phosphoric Acid and 140 lbs. Potash in a ton of Mixed Fertilizer. This is all the mixed plant food the ton contains.

We get the quantity of chemicals required to provide this amount of plant food by taking each chemical and finding the amount it requires of each to give one unit of plant food, and then multiply by the number of units this particular chemical in your mixture. This rule applies to every mixture.

For example, to find the number of pounds it requires to give you a unit of 20 lbs. of plant food, you divide the percentage of analysis into 2,000 lbs. Then multiply by the number of units. Thus, Nitrate of Soda guaranteed analysis 15 per cent., 2,000 lbs. divided by 15 gives 133 lbs. for one unit, multiplied by 4 equals 532 lbs., or if you use Sulphate of Ammonia for your Nitrogen, the analysis being 20 per cent., we have a unit in every hundred pounds of Ammonia, or 400 lbs. for the 4 units. Acid Phosphate 16 per cent., divided into 2,000 lbs. gives 125 lbs. to the unit, multiplied by 8 gives you 1,000 lbs. Muriate of Potash 50 per cent., divided into 2,000 lbs. gives you 40 lbs. for one unit, or 280 lbs. for 7 units.

Thus, in a 4-8-7 you have if using Soda 532 lbs. Nitrate of Soda 1,000 lbs. Acid Phosphate, and 280 lbs. Muriate of Potash. This makes a ton of mixed fertilizer. If you use Ammonia it would require 400 lbs. Ammonia instead of 532 lbs. of Soda.

With this information you can determine the quantity of chemicals required for any formula of a mixed fertilizer that is given you. It is an easy matter to determine the value of the chemicals, equivalent in value to the plant food in a ton of mixed fertilizer.

When a mixed fertilizer 4-8-7 formula costs thirty-one dollars a ton. The equivalent of plant food in chemicals using sulphate of ammonia, costs \$25.30, a difference of \$5.70 a ton, in favor of chemicals, at today's prices.

When half soda and half ammonia are used the difference in favor of chemicals is \$4.00 a ton.

The same method applies to every formula. Figure it out for yourself. If you save the money in cost of production, you are protected to that extent at time of planting against low markets.

Saturday Morning Session On Saturday morning last, a most interesting and instructive session of the Potato Association was held in the Board of Trade rooms, the

AGED PEOPLE NEED LAXATIVE MEDICINE

With old age nature's forces slow down. Old folks need the assistance of Dr. Hamilton's Pills. They flush out the system, keep it free from poisonous wastes, make the bowels active and aid the stomach. To men, women and past middle life Dr. Hamilton's Pills are of wonderful benefit. To keep regular, full of pep, in good spirits these vegetable pills will prove a boon. 25c at all dealers.

At Wood Island, the same quantity of fertilizer mentioned above, was used. This was a 5-5-5 mixed fertilizer per acre. With-out manure this increased the yield of marketable Coblbers 365 bushels over the check plot, the total yield being 406 bushels.

CAPITOL--TO-DAY

THE MYSTERY CLUB

with MATT MOORE EDITH ROBERTS

From the novel by Arthur Somers Roche

"MUM'S THE WORD" Comedy

A Marvelous Mystery Tale!

Grim menace—slinking shadows—prowlers in the night—all the horrors and fascinating wonders of the world of crime are unfolded and revealed before your eyes in this great mystery picture. It will give you new sensations—new thrills, and keep you thinking and speculating on its weird plot and lightning action for many months!

POTATO GROWERS IN SESSION.

President Mr. J. J. Trainor being in the chair. The meeting was an informal one being designed to promote discussion among the growers as to the various problems connected with the business, such as fertilizers, diseases of potatoes, spray, etc. Messrs J. A. Clarke and S. G. Peppin were present, and gave in reply to questions, much valuable information in their respective departments.

In the course of the meeting, Mr. Boulter alluded to the way in which we were hampered by the shortage of cars. "If we could guarantee to get our potatoes away every month of the year, we need not worry about the acreage grown," he stated. The trouble is with the car ferry. She cannot get the cars across. We badly need an additional car ferry.

The meeting was closed by an excellent address by the President, in which he earnestly requested all to make service and co-operation their ideals. Then, indeed, this association will have before it a brighter future than could be dreamed of. Before the meeting broke up, a hearty vote of thanks to the President for his devotion to the association and the splendid way in which he had conducted the meetings was passed by the assembled growers.

MR. J. A. CLARK. During the season of 1927 an endeavor was made to determine the qualities of fertilizers that were being used per acre in the growing of potatoes in P. E. Island, the quantities of the different chemical fertilizers used when home-mixed, and the yields per acre obtained. We are indebted to the seed potato inspectors who gathered the data or which the following averages are based:

From the data submitted from 80 growers, the average quantity of chemical used was 1414 pounds per acre. The average estimated yield was 373 bushels per acre. Seventy-four growers gave the quantities of the different chemical fertilizers used. The average amount applied per acre by these was 1240 pounds. An average formula procured from the totals of all the different fertilizers used was about 2-3-6-8, so the equivalent of about 810 pounds of a 2-3-6-8 mixed fertilizer per acre. These figures were, however, greatly influenced by a group of twenty-seven growers from two localities, who used very heavy applications of muriate of potash. These twenty-seven used a formula that averaged 1080 pounds of a mixed fertilizer to about 1888 pounds of a mixed fertilizer of this formula. Forty-seven others throughout the province used an average of 1337 pounds. This would be equal to about 1610 pounds of a mixed fertilizer of this formula.

For light, sandy loam soils, similar to those found in P. E. Island, Dr. Frank T. Shutt in his recent bulletin, No. 92, suggests 1060 pounds of chemicals equal to 1200 pounds of a 4-8-8 mixed fertilizer.

The Effect of Commercial Fertilizers on Yield of Potatoes A few examples may be given from applications of manure and fertilizers from fertilizers alone for potatoes, on the P. E. Island 11-illustration Stations in 1927. The details of these experiments will be found in the 1927 report of the Division of Illustration Stations for Eastern Canada.

At West Devon, 675 pounds of chemicals, equal to 1200 pounds of a 5-6-9 mixed fertilizer, were used in addition to 16 tons of manure per acre. This increased the yield of marketable potatoes 150 bushels over the check plot. The total yield was 420 bushels per acre.

At Rose Valley, on land that was in good condition, 975 pounds of chemicals were used. This was about equal to 1200 pounds of a 5-6-9 mixed fertilizer per acre. With-out manure this increased the yield of marketable Coblbers 365 bushels over the check plot, the total yield being 406 bushels.

At Wood Island, the same quantity of fertilizer mentioned above, was used. This was a 5-5-5 mixed fertilizer per acre. With-out manure this increased the yield of marketable Coblbers 365 bushels over the check plot, the total yield being 406 bushels.

VICTORIAS AND N. B. TONIGHT

Tonight local hockey fans will have another opportunity of witnessing the Victorias, last year's intermediate Maritime champions, battle in a Maritime elimination hockey contest.

The New Brunswick champions are the invaders tonight, and come all keyed up with determination and confidence. Tonight's game will be the first of a game series, home and home, goals to count.

The Vics have been going a great pace lately, and have every hope of handing the Mainlanders a beating. At any rate fans may expect hard fought and courageous hockey tilt.

LAST SATURDAY'S RACES ON THE SPEEDWAY

Owing to the intense cold and raw wind which prevailed Saturday afternoon quite a number of the horses which were to have competed in the races failed to put in an appearance.

However, the classes raced were quite interesting. There was a fair attendance of spectators.

CLASS A PACE This was won by Bingen Aubrey after Briar Mac captured the second heat and being a close second in the other two. The second heat, Watts Edition and Briar Mac had a lively tilt, Mac beating him by a neck.

CLASS A TROT This was won by Bingen Aubrey after a nice race with Marjorie, who was second each trip; Vita Guy third.

CLASS C TROT Royal Worthy (Kelly) 1 Marjorie (Marjorie) 2 Vita Guy (McKinnon) 3 Time—36 1/4; 39 1/2.

CLASS C PACE Dongola (Bailey) 1 3 Dorothy E. (Murray) 3 1 Colorado P. (McDonald) 2 2 Time—32 1/4; 34 1/4.

Officials: Starter—D. K. McLeod. Judges—W. Brown, T. C. Edget, R. J. Steele. Announcer—E. F. Acorn. Timers—L. Essory, L. Blake, D. McInnyre.

NOTES The committee in charge are certainly to be congratulated on the excellent manner in which they cleaned the snow from the Speedway. Hundreds who visited the track on Saturday and Sunday were struck by the tremendous amount of snow moved.

Any person who has not as yet visited the Speedway would do well to take a walk down. Visitors here from Ontario and other points have praised the local Speedway as one of the finest in America.

en, Marjorie Bryenton, Enid Ramsay, Ruby Mountain, Roy Abbott, Dorothy McKenize, Francis Bear, Mory Stewart, Alice McGougan, Kenford Abbott, Dugald McNutt, Miss Marjorie Penke, teacher.

The "Help Each Other" Mission Band of Malpeque and Baltic, held a social evening in Malpeque Hall on Tuesday evening, Rev. D. M. Grant presiding. The program consisted of readings by Misses Ann Grant, Lulu McDonald and Thelma Ronald; solos by Mr. Burgess, Mrs. Simpson and Mr. Charles Love; duets, by Margaret Riley and Jean Simpson, Mrs. Simpson and Marion Simpson, Jennie Matthews and Carrie Woodside. An excellent supper was provided, and a fair amount was realized in aid of missions.

A parlor social was held at the home of Mr. and Mrs. William Woodside, Hamilton, in the aid of "Doing Our Bit" Mission Band. A large number manifested their interest by their attendance. Rev. D. M. Grant presided. The program consisted of readings by Mr. Burgess, Mrs. Simpson and Mr. Charles Love; duets, by Margaret Riley and Jean Simpson, Mrs. Simpson and Marion Simpson, Jennie Matthews and Carrie Woodside. An excellent supper was provided, and a fair amount was realized in aid of missions.

In the early morning Monday, March 6th, there passed away Mr. Fulton Thompson, of Barney, Fulton was eighteen years of age and was the second son of Mr. William Thompson. The deceased had not been in good health for several years as he was suffering from diabetes, about two years ago he, in company with his brother George went to Western Canada to reside with his uncle, Mr. Fulton Thompson, but a year later he returned and during the summer following he was engaged in fishing. Not feeling well, he retired early. During the night he grew weaker until at length the end came. Fulton is survived by his father and one brother, George, the latter whom is in Western Canada. His mother, formerly Miss Katherine Hodgson, predeceased him about ten years ago. The funeral service was conducted by Rev. Frederick Williamson, in Keir Memorial Church, on Tuesday afternoon at 2 o'clock. The address was based on the text John 16:33. "In the world ye shall have tribulation, but be of good courage, I have overcome the world." There was a large number present and all realized the sadness that comes with the passing of one so young, brilliant, unaged, full of opportunities and duty. The pall-bearers were as follows: Messrs. Arthur and Leslie McKay, Clarence Hickey, Richard Wall, Bruce Cassey, John McNutt.

The many friends of Mrs. George M. Compton, St. Eleanor's, extend their sympathy in the passing of her husband on Tuesday, February 28, Mrs. Compton was formerly Miss Eliza McGougan, of Malpeque, and was well known here.

Mrs. Frank McFarlane and daughter, and Miss Doris Webster, Augustina Cove, were recent guests of Mr. and Mrs. Ralph Bearstow.

Messrs. J. K. and Vernon McGougan, and Mrs. John Simpson were in attendance at the funeral of Mr. George M. Compton, on Friday, March 2nd.

The following is the report of the Primary Department of Fanning school.

Grade IV. (sr.)—1, Bruce Champion and Grace Brewer (equal); 2, Amy Champion; 3, Harry McGougan. Grade IV. (jr.)—1, Lorne Owen and Marjorie Bryenton (equal); 2, Cora McGougan; 3, Goldie Wall. Grade III. (sr.)—1, Enid Ramsay; 2, Wilton Ramsay; 3, Ruby Mountain, Dorothy McKenize and Roy Abbott. Grade III. (jr.)—1, Alice McGougan. Grade II.—1, Lea McGougan; 2, Kenneth McKay; 3, Mary Stewart; 4, Heath Manderson.

Grade I.A.—1, Dugald McNutt; 2, Eleanor Ramsay. Grade I.C.—1, Francis Bearstow. Grade I.C.—1, Kenford Abbott; 2, Roy Champion; 3, Lloyd McKenize.

Perfect attendance: Bruce Champion, Harry McGougan, Lorne Owen.

Are You Nervous or Sleepless?

St. Catherine's, Ont.—"I was in such a nervous and rundown state of health that I could not do a day's work. I could not sleep and I felt completely worn out. I was advised to take Dr. Pierce's Favorite Prescription and I was soon well and strong and had another year of nervousness since."

Dr. Pierce's Favorite Prescription is a medicine that will cure all cases of nervousness, sleeplessness, and all other ailments of the nervous system. It is a pure vegetable preparation and is perfectly safe for all ages.

Send 10c to Dr. Pierce's Laboratory, 155 N. 4th St., Buffalo, N.Y. You will receive a free copy of the book "The Nervous System" and a bottle of Dr. Pierce's Favorite Prescription.
