SMALLMAN'S

Where Price is Matched With Quality

- MISCELLANEOUS SHOWER - Mrs. Ray Tanton, Summerside entertained at her home on Central Street on Wednesday evening in honor of Miss Edythe Dye with a miscellaneous shower. Patsy Daley and Mary Rae Tanton, as youthful bride and groom ushered the guest of honor to a chair suitably decorated for the occasion. Miss Emily Martin opened the packages, Miss Ethel Delghan read the accompanying verses and Miss Green Hoffman arranged them. Miss Dye thanked all for the many beautiful gifts she received. A short program of readings by Mrs. Chester Palmer and Miss Jean MacFadyen was followed by two contests after which refreshments were served by the hostess assisted by Mrs. Henry Bishop and Miss Florence Yeo, R.N. - S.

- Kinsmen Meeting - Reports on winter sports activities sponsored by the club were brought in at the regular meeting of the Kinsmen Club of Summerside held on Tuesday evening in Coyle's Restaurant with Gordon Maxwell as chairman. Jim Hogan, Kinsmen Sports Supervisor was present and reported on the first season of the Kinsmen Outdoor Rink. The rink was formally opened on December 22 and out of 84 days following the rink was in operation 48 days which indicates the kind of winter weather we had. He reported on difficulties of flooding as the hydrant is too far from the ice surface and sometimes it took two or three hours to get a flood on. Over two hundred boys were given the opportunity of playing hockey he said and the results showed when the Bantams, pee-wee and paperweight playoffs were held recently. He felt that the project had been a success and many lessons were learned that could be put to advantage next year. Elmer Offer and Norman Hogg reported on the financial aspects of the hockey season and the reports showed that over and above what had been taken in at games it had cost the club \$545.27 to sponsor Mid-jet and Juvenile Hockey this year. There was a general discussion on this report and most of the members thought that especially in some departments such as the expenditure on hockey sticks the expenses were too high and would have to be cut down in future years. Harold Gaudet reported that the windows in the dressing room of the Kinsmen Rink had been boarded up for the summer and he spoke in appreciation of the generosity of Mr. George Williams in making the land available on which to build this rink. -S.

- INTO REVERSE - Mr. Bell quoted from the report of the Dairy Superintendent for 1947, to show that this industry is going rapidly into "reverse" in this Province. Premier Jones said this was due to feed scarcity and the high cost of labour. Producers had gone into raising beef cattle and were neglecting dairying because they could not get time to milk their cows. There has been "a tremendous demand" for milk cattle from Newfoundland, the United States and elsewhere at high prices, so the farmers instead of raising cattle are selling their heifers and can assure you that the most profitable thing to do today is to raise cattle and sell them alive instead of producing butter," he said. Mr. Bell: "They have to sell a certain amount to stay in the business, but when the leader of the Government says that that is the best thing to do, to raise them and sell them outside the Province, I don't think he has the interests of agriculture in this Province at heart. He himself has a large herd, comparable to the herd we have at Falconwood, but the majority of our farmers are in a worse position. This is the time that we should be doing everything possible to encourage dairy production, and I submit that when we ask you to increase the salary of your Deputy Minister of

more expenditure (Continued from Page 1)

ment and he should take of other good men as well. If he exceeds his estimates, so far as the Opposition are concerned, we will

him undertaking to tell practical farmers how to run their business. Mr. Bell retorted in kind. He went on to emphasize the advantage of the artificial insemination unit for grade cattle breeders, and urged that it be given more Government assistance. Mr. Phillip Matheson protested against the Premier "throwing slurs" at professional men like Mr. Bell who had gone into raising pure bred cattle in the interests of the industry, and who should be encouraged rather than criticized as novices. Premier Jones recalled that, some years ago, as Minister of Agriculture, he had given a grant to the various purebred cattle associations to be used for improvement of livestock. Last year the whole of that grant, about \$4,500, was taken over by the artificial insemination unit and the Government gave an additional \$1,000. "We other breeders don't get one cent of that grant," he said. He could not see what point the hon. member was trying to make. Hon. Mr. Stewart: "Not only did we give them the whole grant of \$4,500, but at Falconwood Farm we kept charge of the unit, and kept the five bulls there all summer; and the manager at the Farm was the instructor in the use of the unit." Mr. Burge maintained that the grants to the different breed organizations should be increased to

\$15,000 or \$20,000. Mr. Bell said that formerly this policy was to pay \$1,000 to each of the breed organizations. Last year the different breeders agreed to give over this money to establish artificial insemination on a working basis. This was done to help the ordinary grade breeder. The purebred breeders went to much expense and trouble, and received no direct benefit. He cited the report of the Deputy Minister of Agriculture, stressing the value and importance of this undertaking.

No More "Nurse-Feeding" Premier Jones said that in Ontario the Government was not asked to contribute a cent to artificial insemination units. "But what do we find here?" he said. "We are totting our farmers along and they are getting services at half price, less than \$3.00 a cow. Ridiculous! If you are going to nurse-feed everybody here, I don't think the Government should be a party to it. The farmers are not paying their way, they are waiting for this Government to pay. I am going to see that such wild expenditures are not going to go on."

Mr. Burge: "The easiest way to get pure bred herds on the Island is for the Government to give to the separate associations a grant sufficient to enable them to double and treble the number of pure-

bred animals." Mr. Bell insisted that this service was solely to help the grade cattle men. It had been started as a small way to cover a radius of ten miles from Charlottetown. The idea now is to train men who will branch out and make the unit Province-wide. Dr. MacMillan asked whether there was any definite move to get those billions of tons of mud that the Premier was speaking about."

Mr. Stewart: "I don't think the estimate of the Department of Agriculture allows us to develop that very much." He added that at Johnston's River the farmers had been helping themselves. He said the skunk bounty (\$3.00 last year) would be reduced this year, but he did not yet know how much.
