IN MEMORIAM
MRS. RICHARD ROBERTS
In the early hours of Saturday morning, August 20th these passed away at her home in Pleasant Grove, Mrs. Richard Roberts formerly Elizabeth Caroline Finch at the age of 84. She was born in Winsloe, P. E. I., the daughter of the late Ford and Charlotte Finch. In 1883 she married Richard Roberts also of Winsloe and a number of years later came to live in Pleasant Grove. Her husband having predeceased her 12 years ago she resided with her daughter, Mrs. Lester Buell and although in failing health for the past six years she was able to be up and around and among the flowers she loved. When about three weeks before her death she was taken suddenly ill and all that loving hands could do was done but God willed otherwise and so she passed on to that eternal home where there is no suffering. She was frequently visited by Rev. Thomas Wilson of Covehead in the absence of her pastor, Rev. J. H. MacCallum, a woman of true Christian character she will long be remembered for her many acts of kindness. Having a large family of her own she was always ready to give a helping hand of times going out in the early hours of the morning to help a neighbor in time of sickness. She leaves to mourn the loss of a loving mother, three sons and two daughters, eight children having predeceased her, one son James passed away one year ago. The surviving children are, Fred of Winchester, Mass., Hubert and Arthur of Charlottetown, Mrs. Lester Buell, "Corra", Mrs. William MacKinnon, both of Pleasant Grove, one sister Annie, Mrs. William Ford of Charlottetown, also 41 grandchildren and 21 great grand children. The funeral, which was largely attended was held from her late residence Pleasant Grove Monday Aug. 22nd to York Cemetery. The services at the house and grave were conducted by Rev. Thomas Wilson. Hymns sung were, The Lord Is My Shepherd, Safe In The Arms of Jesus, I Hear Thy Welcome Voice. The pallbearers were six grandsons, Brenton Clow, Lloyd Clow, Rueben Roberts, Basil Roberts, Lester Roberts, Clarence Roberts.

Card Of Thanks
Mr. and Mrs. Archie MacDonald and Family of Baltic, wishes to express their sincere thanks to all neighbours, friends and Institute who sent cards and letters of sympathy and to friends who called to express their sympathy in any way during their sad bereavement in the loss of a dear one.

IN MEMORIAM
In loving memory of my husband
JOHN J. DUFFY
who departed this life on
October 9th, 1947.
May he rest in peace
Inserted by His Wife.

IN MEMORIAM
In loving memory of our dear Father,
MICHAEL McCAGHEY
who passed away
October 8th, 1941.
When evening drops its curtain
From the ceiling of the sky
And stars shine out on high
Then it is that memory finds one
Drifting back the long years
For the fall of night reminds us,
Dad
Of those jappy days with you.
Sadly Missed by Sons and Daughters.

IN MEMORIAM
In loving memory of a dear daughter and sister, Mrs. John A. Ford, who passed away October 9th, 1946.
We have only just a picture
Of the face we loved so well,
To part with you it was so hard,
No human tongue can tell;
You bid no one a last farewell,
You waved your hand to none;
Your life had fled, before we knew
That you, from us had gone.
Ever Remembered and Ever Loved
by Father, Mother, Brothers
and Sisters.

IN MEMORIAM
In loving memory of Mrs. John A. Ford, who entered into rest three years ago today.
We cannot think of her as dead
Who walks with us no more
As along the path of life we tread
She has just gone on before.
Husband and Family.

IN MEMORIAM
The death of Mrs. Henry Leard occurred at South Kildara on Saturday September 17th, 1949, following an illness of several months duration.
Mrs. Leard (nee Mary Jane Platts) was born at Kildara Capes on January 8th, 1868, eldest daughter of the late Thomas and Harriet Platts. One member of this family of six daughters, Mrs. T. P. Manning (Harrold) of Auburndale, Mass., survives.
Mr. and Mrs. Leard were married in 1889 and lived at Kildara Capes for five years after which they moved to Alberton. Mr. Leard passed away in 1941. The funeral on Monday afternoon, was from the home where she had lived for many years and was conducted by her minister the Rev. P. A. Fitzpatrick of Alberton United Church, assisted by Reverend J. M. Sheen, of Elmeston United Church, who read the Scripture. Reverend Mr. Fitzpatrick brought a message of comfort to the bereaved family and paid worthy tribute to a good mother. Hymns sung were "The Sands of Time Are Sinking", "Safe In The Arms

LESSON TWO
(Senior)
ALCOHOL AND THE BRAIN

From what has been said already, you have probably guessed that what alcohol does to the brain is at the basis of the entire alcohol problem—and you are right. The brain is the "control tower" of the body, guiding all the processes essential to life, and directing the actions of the muscles. Doctor Charles Mayo, the noted surgeon, said that although we cannot get along with wooden heads, because "it is the brain that counts." The brain can be divided into three regions, with each region responsible for a particular kind of body function. The lower part of the brain manages the unconscious processes—the beating of the heart, the expansion and contraction of the lungs, and the movements of the stomach in digesting food. Wouldn't it be terrible if we had to keep concentrating on these things in order to keep alive? We would never get anything else done! Fortunately this lower part of the brain looks after such things for us. It so happens that this is the last part of the brain to be affected by alcohol, but if enough alcohol is consumed so that this part of the brain is seriously impaired, death can result. That is what happened when a boy drank a pint of brandy; he died in fifteen minutes, a brain fatality.

The middle part of the brain, (directly behind the eyes) is the nerve switch-board of the body. Sensations are carried from the nerves to this part of the brain, where they are interpreted in terms of touch, taste, sound, sight, smell. And nerve impulses originating in this middle brain are conveyed to the muscles, making physical motion of all kinds possible. Naturally, when more and more alcohol reaches this part of the brain, the messages from the sense organs will get all mixed up, and the muscles will not respond properly. This explains the thick speech, the slagger, the unsteady gait, and the loss of coordination of the intoxicated man. Herein lies the danger of driving an automobile when "under the influence," as we shall see in Lesson Four.

The upper part of the brain, (behind and above the forehead), is the part which makes man superior to the animals. This "clever forebrain" is the last part to develop, and controls the higher human capacities of art and science, culture, and conscience. Now alcohol starts at the top and works down, beginning its degrading work on the clever forebrain, where it removes the controls which conscience develops over the sense organs and releases the lower side of our nature. We shall hear more of this in our next lesson.

We have seen in the previous lesson how alcohol reaches the brain through the blood stream. Its effect is noted within fifteen minutes after the beverage is consumed, but its anesthetizing influence reaches its peak in a half hour. The function normally when alcohol interferes with its life processes, and the important powers of memory, reason, and judgment become near casualties.

The intoxicated person is forgetful. He tries in vain to remember names, places—even his own address. This loss of memory may involve him in exceedingly embarrassing situations, and he does. A drunk man who enters a house near a large Ontario town. The owner returned, and found eight empty beer bottles. The accused man said that he went to this town for a few beers, and didn't remember going to his employer's home, nor could he remember the names of his friends who shared the fried onions. Of course not, for alcohol is the enemy of memory. Laboratory experiments have repeatedly proven this observation. For example, the memorization of 25 lines of poetry took more than twice as long when taken in glasses of whiskey were taken than when no alcohol was consumed. After four glasses of whiskey, the loss in ability to remember was 44 per cent. In the brain mechanism there are more than twelve thousand million of cells. These cells are connected with one another by fibrils. Each fibril has several branches, making possible altogether several trillions of associations of ideas. Perhaps you have seen car batteries which became

of Jesus", and "Peace Perfect Peace". She was borne to her resting place in Woodlawn Cemetery, by five grandsons and a grand-nephew, Messrs. Lorne Leard, Boyd MacCallum, John Locke, Hilbert Bell, Henry Wallace, and John Webb. Flower bearers were: Messrs. Ollivier Locke, Raymond Hardy, Alvin White and Alfred McRae. Mrs. Leard is survived by one son and five daughters: Lloyd of Victoria West, Mrs. Arthur Wright (Ada) of Alberton, Mrs. Carroll McWilliams (Nellie) of Carleton, Lot 6, Mrs. Raeford Locke (Harriet) of Hallburton, Mrs. Alvin Bell (Elizabeth) of Alberton, and Mrs. Elmer Wallace (Lela) of Cassempack. Two daughters, Mrs. J.N. Milliken (Gertie) and Mrs. Boyd Conboy (Hilda) both of Charlottetown, P.E.I., predeceased their parents. Mrs. Leard is also survived by five great-grandchildren.—D

drunk at the time, and Grandmother, too, thought the white missionary must be crazy. "Teach our boys to read and to talk Spanish like the padron!" she shouted. "Migra as well try to teach a llama. Anyway, why bother? Who needs to read or write to herd pigs and pick potatoes?" The white lady wasn't angry at such rudeness. She came back again and again. On one visit she said: "I'm starting my school tomorrow evening. There will be ten boys there. Your boys are just as smart as they are. Won't you please let them come?" Grandfather was too drunk to care what the boys did. He mumbled: "Well, try to teach them if you still want to."

So the boys went to school in the evenings, after they had worked all day in the fields. One of the boys, Petro, learned easily and quickly. The more he read, the more he wanted to read. Not only was Petro hurrying to school every evening, but he was going with his hands, face and clothes clean. When a boy does not learn to read until he is fourteen, he has a lot of time to make up. When Petro was eighteen he was called up, as are all boys in Bolivia, to serve for two years in the Bolivian army. Several other boys from Guatajata went with him. When they arrived in La Paz, the capital of the country, they were very conspicuous. All about them on the parade ground were hundreds of Indian boys of their own age, dirty, drunken, chewing coca leaves. The officer in charge of the new recruits had never before seen a completely sober Indian. In great surprise, he asked: "Where do you boys come from?"

"From the Hacienda Guatajata, sir," Petro replied. "Are you always sober, or is this just a happy accident?" "No, sir," answered Petro. "We do not drink... or chew coca." Scarcely believing his ears, the officer questioned the boys further. "Where did you learn these habits?" "In the school and church of the Evangelistas on Guatajata," replied Petro. "School!" exclaimed the officer. "Do you mean to tell me that you boys can read and write?" "Yes, sir," answered Petro. "We all read and write Aymara. I also speak Spanish."

"Well!" Then after a moment. "Recruits from Guatajata, one step forward!" Surprised, but smartly, the boys stepped forward. "As of now, you," said the officer pointing to Petro, "will have the rank of sergeant. All the others, the rank of corporal." Every day the officer was more surprised and delighted with Petro and his friends from Guatajata. They did not spend their evenings drinking, fighting and getting into trouble. They did not chew coca, so they were always alert. They proved themselves to be truthful and trustworthy. Every morning they arrived on parade clean, alert and sober. Whenever there were special duties, special favours or special privileges they went to the boys from Guatajata, because they were always ready when they were needed. The officer never had to wonder if Petro and his friends would be lying drunk in some alley, just when he needed them most.

Carlos is Petro's little son. He lives in a clean whitewashed house, right beside the new school where Petro is now the teacher. No liquor or coca leaves have ever entered that pretty white house. Instead have come love and laughter and healthy living. Thanks to the Evangelistas, Carlos has a father he can boast about. Little wonder he tells everyone, "I'm going to be just like my daddy."

QUESTIONS
1. Why did Carlos, Petro's little son, want to be like his father?
2. What rewards does total abstinence bring?
9 yrs. and under answer question 1.
10 and 11 yrs. answer both.
