WELL EARNED POPULARITY

J. J. Burns Says Dodd's Kidney Pills Saved His Life.

Could Scarcely Sit, Sleep or Walk When He Started to Use Them—His Trouble Gone for Good.

DARNLEY, P. E. I. May, 29.—(Special).—The popularity of Dodd's Kidney Pills in Prince Edward Island has been earned by cures complete and permanent. John J. Burns, Lot 18, Darnley, is one of the cured, and his story is a splendid example of the work Dodd's Kidney Pills are doing. "For over eight years," says Mr. Burns, "I suffered from what the doctors pronounced Chronic Inflammation of the Loin and Kidneys. In the year 1896 it got so bad that I could scarcely walk, sit or sleep. I was about to give up when an advertisement led me to try Dodd's Kidney Pills and they did a wonderful work for me. Dodd's Kidney Pills saved my life and though years have elapsed since my cure I have had no trouble since I used them. "I belong to the I. O. F. and any member can vouch for my condition and that Dodd's Kidney Pills cured me." Dodd's Kidney Pills never fail to cure any form of Kidney Disease once and for all.

LET OTHERS EXPERIMENT

There is always something new in the way of medical treatment, and you are constantly invited to try new fangled, unproven remedies. Let others experiment and so risk health and lose time. Dr. Chase's Kidney Liver Pills have been used in the crucible of time, won the approval of public opinion and demonstrated their right to a place in every home as family medicine.

THIEVES PETTY AND STUPID

Modern Invention Has Driven Out the Crafty Kind. "The people who nowadays give the detectives most trouble are the members of that vast horde of petty thieves, both white and black, that infest every great city," said one of the most efficient detectives of the Washington department. "The days of mammoth burglaries, diamond robberies and brilliant thieving operations have passed, perhaps never to return, and instead of the really shrewd, calculating and bold thief of half a century ago we have today a mob of petty pilferers, who are far from possessing one-tenth part of the brains and wit of the old time thief, but manage nevertheless to give the police a vast deal of trouble. "The progress of invention has put the shrewd thief and burglar out of business. Say, for example, a man steals several thousand dollars. Very well. The moment he does so he realizes that in order to retain his ill gotten gains he must leave the scene of the crime, realizing that he is in nowise prepared to cope with modern detective and police methods. Probably before he leaves the city telegrams and telephone messages have preceded him to the cities of the United States and Canada, and he is nabbed the moment he reaches his destination. But supposing that he escapes all these traps and reaches some foreign country—why, he is simply in as bad a plight there as he was before leaving home. Nowadays there is hardly a government or country with which the United States has not entered into an understanding whereby criminals are caught and returned, and what few and far distant states with which our government has failed to draw up any such arrangement can be very easily managed in case Uncle Sam wants to get any of his missing children back. "The result is that no really bright or shrewd person would think of undertaking a job of burglary or stealing in this age. None but the desperately poor, the degenerate, morphine users, the submerged tenth, so to speak, nowadays practice stealing. They are too stupid to realize the danger of such a course and plunge headlong into a career that must sooner or later land them behind the bars."—Washington Post.

A Singular Advertisement.

A Scotch paper has this singular advertisement: "To be let, a beggar's stand in good, charitable neighborhood, bringing in about 13 shillings per week. Some good will is required."

The Occidental Amethyst.

The occidental amethyst is a species of quartz, bluish purple in color, generally occurring crystallized in hexahedral prisms terminated by corresponding pyramids. Its fracture is conchoidal or splintery. Its color is due to the oxide of manganese or to iron and soda.

Bothersome.

It always bothers a Frenchman who is learning English to read one day that a murder has been committed and the next day that the murderer has been committed.

Iodine.

The presence of that valuable substance, iodine, in various zoophytes caused them to be employed in medicine with great success in the removal of tumors, and formerly burned sponge, also containing iodine, was much used in prescriptions.

When Kettledrums Were New.

Kettledrums as used by cavalry appear to have been a comparative novelty in 1655, when Sir James Turner wrote. "There is another martial instrument," he tells us, "used with cavalry, which they call the kettledrum. There be two of them, which hang before the drummer's saddle, on both of which he beats."

Arctic Divorces.

In the arctic region a man who wants a divorce leaves home in anger and does not return for several days. The wife takes the hint and departs.

A Broken Thumb.

The great Zeno lived a quiet and happy life until the age of ninety-eight, when one day he accidentally stumbled and broke his thumb. He interpreted the accident as a summons from earth and so hanged himself.

Queer Laws About Horses.

In the Isle of Man it was formerly the law that to take away an ox or a horse was not a felony, but a trespass, because of the difficulty in that little country of conveying or carrying them off, but to steal a pig or a fowl, which is easily done, was a capital crime.
