You're Paying for Your Competitors' Advertising
if you are not paying any attention to your own.
You are paying for it if you do not use productive publicity—you are paying for it by losing the grip on your trade—you are paying for it by continuing in the "rut".
Even if your ad contains witticisms that don't prove that it is productive of results—the one that you may pride in producing may prove just as offensive to the general public as it seems appropriate to you.
That you are an expert in your own business is just a proof that you should employ the services of advertising specialists.
