Johnston and Inman were counsel for the plaintiff and McLeod and Bentley and McQuaid for the defendant.—Pat.

Farmers will be interested in the announcement of Auld Bros., Charlottetown, which appears in another column of this issue. This firm is carrying on an educational campaign to show the farmers of this Province just why, where and how good United Fertilizers are the best plant foods that can be secured anywhere at any price. As the Marquis of Salisbury said: "If farmers only mixed fertilizers with brains as the painter his paints there wouldn't be so much heard about agricultural depression." It is the man who doesn't use fertilizers who is complaining about poor crops because the man who uses fertilizers knows that he can supply the ground with every element it is lacking in and can nourish any crop with just the right kind of food and supply it in just the right quantity. Dean Swift has said: "The man who makes two blades of grass to grow where only one grew before is a benefactor to his country." This is what good fertilizers will do, for it makes every farm 100 per cent efficient and productive. There are many good pointers in Auld Bros' ad that will be of value to every farmer in this Province and should be read carefully by every man who wants to make a success of his farm work.

A True Friend

would not give you a drug in your food.

But many persons, of their own accord, drink coffee or tea day after day—ignoring the fact that there is a drug, caffeine, in every cup.

True, you may be able to "stand it" for a time, but the drug is there, and sooner or later is pretty sure to show in some annoying ailment.

There can be no relief until the cause is removed.

Simply leaving off coffee and tea will work wonders, but it is much easier if you shift to well-made.

CANADIAN HAY IN HEAVY DEMAND

MONTREAL, Feb. 20—The failure of United States hay crop last season increased hay shipments from Canada as well as from Montreal itself more than three-fold. Shipments have been made direct to Eastern United States and also to the South as far as Florida and Georgia. But for the car shortage the amount would be still larger where orders for fifteen cars have been sent only ten could be given as the "homo-cars" were wanted in Canada and cars from Southern roads have not been available to any great extent. Prices are increasing with the shipments and while at first only \$3 per ton advance was made, at present the premium is \$5 per ton above last year's market price.

Farmers throughout Quebec are gathering every ton of hay they can spare, and much of it is said before the cars arrive.

Mayor Kelly and members of the town council assembled in the cabin of the new Bruce yesterday afternoon and greeted Capt. Spracklin and his men to North Sydney. A number of short speeches were made and refreshments were served to the guests.
