

For the Dressing Table

We take pleasure in catering to the fair sex and they are quick to observe the superiority of our various lines. The following suggestions may interest you. Note them carefully.

- Superb Perfumes
- Toilet Waters
- Cold Cream
- Vanishing Cream
- Face Powders
- Eye-brow Pencils
- Massage Creams
- Liquid Complexion Powder
- Nail Polish
- Nail Files
- Buffers
- Powder Puffs
- Beauty Brushes
- Hair Tonics
- Shampoos
- Talcums
- Chamois
- French Lotions
- Bath Powders
- Hair Brushes
- Combs, etc.

If you really want a beauty treat, arrange to see our display of Sylvadora Toilet Preparations. Each one will win you with its excellence.

ITALY ENDORSES CH'TOWN BOARD OF TRADE VISITS CARLETON POINT TERMINALS

Peace to Which Whole Wolf Aspires Must Be Realistic Lasting Says Signor Bissolati.

Deadly Germ of War Can Only be Killed by Complete Victory Over Austria and Germany.

NEW YORK, October 17.—A news agency despatch from Rome published here today, says: Austria must be destroyed as a state and Germany deprived of the world before the war can end, Signor Bissolati, civil commissioner for war, socialist leader, soldier, and one of the most powerful figures in the Italian cabinet, said today.

"I am convinced that the War Secretary Lloyd George's statement, and Premier Asquith's words in the house of commons, exactly express the thoughts and expressed the firm resolve of the allies," said the Italian cabinet member.

"The peace to which the whole world aspires, after so many horrors and sacrifices, must be real and lasting, not a mere truce. Civilization must safeguard itself against attempts similar to the one against which she is now reacting with all her strength. This means that we must create in Europe such conditions as to render it impossible for Germany to resume her criminal designs.

"I therefore think that any state or states of the entente who would today harbor the thought of peace would be guilty of an act of treason. Rather than accept a peace contaminated by the germ of other wars it would have been better not to embark on the present war at all.

"The deadly germ of war can only be killed by destroying Austria as a state and depriving Germany of every element of predominance. It is necessary to proclaim this loudly and openly as Premier Asquith and Lloyd George did."

Trapped In A Burning Factory Seven Lose Lives

NEW YORK, Oct. 17.—Seven persons, all officers and office employees of the Oakes Dye Manufacturing Co., were burned to death and two others who are missing are feared to have lost their lives in a fire which destroyed two factories in the manufacturing section of Queensburgh late today, with a material loss estimated at \$250,000. The charred bodies were not found until the flames had been extinguished and firemen were pouring water into the ruins of the buildings.

Greek King's Speech To Men of Fleet

ATHENS, Oct. 18.—King Constantine, in a speech to the officers of his fleet, today, told them he would stand by them, no matter what consequences might follow their loyalty to Greece.

Wilson Fails In Effort To Obtain Help For Poland.

LONG BRANCH, N. J., Oct. 17.—President Wilson announced today that his efforts to bring about an agreement among belligerent nations to allow relief supplies to be sent to Poland had failed.

Canadian Fish For British Soldiers

OTTAWA, Oct. 17.—Contracts which have been made in England for supplies of Canadian fish for the British and allied forces promise a trade of something like a million dollars weekly.

Operations Failed to Cure Kidney Disease

Mr. John E. Pansley, Farmer, Viceroy, Sask., was twice operated on in an English hospital for kidney disease. Urinary troubles grew worse and caused excruciating pain. He now states positively that he has been cured by Dr. Chase's Kidney-Liver Pills and is enjoying excellent health.

Dr. Chase's Kidney-Liver Pills

(Continued from Page One.)

in the landing slip, and by means of screw gear operated by steam it is raised or lowered to bring the rails of the track to the proper elevation of the Car Ferry, the stem of which is partly under this dock. There will be a landing slip on the approach proper, two running over the platform or bridge to connect with the tracks in the steamer, and one on either side.

A large percentage of the dredging of the "turning basin"—the immediate space which the Car Ferry will turn in leaving the harbor to be completed, the dredge "McDougal" being used in the work. "The McDougal" is one of the largest dredges in the Maritime Provinces, her "dipper" having a capacity of six yards.

As regards the railway work, the tracks have been laid on the approach to the landing slip, and all the tracks in the yard have been laid with the exception of a few hundred feet. The engine house, turn table foundation and stock pen have all been completed except as regards a small portion of the building work in connection with the buildings to be erected by Mr. D. R. Morrison of Summerside.

The length of the branch road connecting the P. E. I. Railway with the Terminal is three miles, and the grading on that stretch has been completed while the laying of the tracks is well under way.

The construction of the Terminals, it may be mentioned is in the hands of the Roger Miller Company, Toronto, which is represented by Mr. Saunders.

In regard to the work at Tormentine the landing slip is completed here except the final section of the approach for bridge which is now being put up. These transfer bridges for both Carleton Point and Tormentine are made by the Dominion Bridge Company. The work at Tormentine is practically completed with the exception of the approach of 2,000 feet to be built on this side to connect with the landing slip, at Cape Tormentine the Marine Pier had been incorporated in the pier and forms the approach.

The "turning basin" at Carleton Point is about a thousand square feet in area.

Some persons have an idea that the board is might, when wind and tide favoured it, overran the pier, and in regard to this question the writer asked the engineer's opinion. Mr. Dowling said quite clearly that such a condition is not only extremely unlikely but impossible, as the pier is protected by a natural reef of rock, which parallels it a distance varying from four hundred to a thousand feet, on which the running ice grounds and is about 30 feet high, the pier being thus protected from the sea during rising water throes the tide out from the turning basin and prevents any strong current entering therein, so that floating ice will not run in and block the basin.

THE INQUIRY.

At the meeting Mr. Alfred Pickard, President of the Board of Trade, presided, and Mr. G. E. Full, Chairman of the Committee, conducted the enquiry.

Mr. Pickard, in a few remarks, explained that the meeting was for the purpose of enquiring into the freight transfer facilities at Carleton Point, which facilities, he said, Carleton Board had learned, were not adequate. The Board had also requested the Government to send an engineer with whom they could confer, and in response to that request Mr. F. B. Tapscott declared the meeting open.

Mr. Alexander McDonald, of the P. E. I. R. in reply to Mr. Full, gave a statement showing the number of cars taken from Summerside each morning and also the number of cars taken from Carleton Point. On October 11th 11 cars were taken from Summerside and 32 left behind; 15 from Carleton Point and 33 left behind.

On Oct. 12, 15 cars were taken from Carleton Point and 32 left behind, and 15 taken from Summerside and 33 left behind.

On Oct. 13, 20 cars went from Carleton Point and 29 remained, and 34 left Summerside and 26 were left.

On Oct. 14, 7 left Carleton Point and 28 remained behind, while 22 were taken from Summerside and 29 left behind.

On Oct. 15, 11 cars were taken from Carleton Point and 50 left behind, while 37 went from Summerside and 25 were left behind.

On Oct. 17th, 5 cars left Carleton Point, while the figures were not available in regard to those which remained in Carleton Point, and those which left Summerside and those which remained.

Canada In Prosperous Condition

OTTAWA, Oct. 18.—There has been a remarkable change in trade conditions in Canada during the past year. During that time the balance of trade has grown tremendously in favor of the country. During the first eight months of 1915 the excess of exports over imports was but \$19,550,844. During the first eight months of the present year the excess was \$190,083,604. The total exports were \$677,162,923.

According to an official statement issued today, the imports of Canada during that period has also grown quickly. During the first eight months of 1915, as compared with \$284,307,363 during the same period last year.

Paper Makers Stand by Their Minimum Price

OTTAWA, Oct. 17.—In a conference of newspaper publishers and news print paper manufacturers held here today the manufacturers adhered to the price of three cents a pound that was quoted as a minimum in the conference last week before the Minister of Finance.

The publishers conceded that some increase might be necessary but took the position that the proposed minimum price of three cents a pound was prohibitive.

As the publishers and the paper manufacturers were unable to reach an agreement, the request of the former for an investigation by the government stands, and it is likely an inquiry will be made by the department of finance.

FALLING OFF IN P. E. I. FISHERIES.

OTTAWA, Oct. 18.—Canadian fisheries in the last fiscal year were exceptionally prosperous, according to the annual report of the fisheries branch of the naval service, issued today. The total marketed value of fish, fish products and marine animals amounted to \$25,360,798, an increase of \$4,596,077 over the previous year.

The greater part of this large increase is attributable to British Columbia, which alone increased by \$3,023,234. Nova Scotia's output grew by \$1,466,600, while New Brunswick and Prince Edward Island decreased respectively by \$202,958 and \$300,000. Ontario, whose fisheries are under this province increased by a million, while in Quebec augmentation was \$152,421.

BERTLIN, (via wireless to Saville), Oct. 18.—"The tragedy on the Scmne seas near a climax," said a semi-official statement, reporting frightful French and English losses in recent unsuccessful attempts to break the German lines north of the rendezvous.

When the British rushed forward for an attack near Guedecourt, the sixth German infantry division left their destroyed positions and standing in the face of the approaching enemy, turned machine gun and machine gun fire into dense masses of advancing enemy troops. These crowded columns were in some places literally mowed down.

EFFECT OF SPRAYING POTATOES

The advantage derived from spraying the growing potato crop is so well established that it does not require further demonstration. There are, however, some points in connection with the operation upon which precise information is useful. For instance, it is better to spray more than once, and if not, should the single spraying be early or late?

The following experiment, which was conducted by the expert of an agricultural college, throws light on these points:

24 lb. of sulphate of copper
30 lb. of pure washing soda
20 gallons of water
Each of the above were arranged to each of the different centres.

Plot 2 Unsprayed.
Plot 3 Sprayed once, early.
Plot 4 Sprayed twice.
Plot 5 Sprayed once, late.

The result proved that the spraying was attended with success in all cases; both the single sprayings produced a large increase in the yield, but twice spraying was decidedly the best, as shown by the following table:

In round figures, the average weight of potatoes per acre was—
Mar. Dis. Tons Tons.
Unsprayed 5 1 1/2
Sprayed once, early 10 1/2 1 1/2
Sprayed twice, late 99 1 1/2

Duke of Connaught Is Man Best Fitted To Take Charge Of Irish Recruiting

(Canadian Press Despatch) LONDON, Oct. 18.—Lord Dunsay in a letter to the press today says that recruiting in Ireland is at a standstill and that the shortage of drafts of Irish divisions is so serious that unless something is done speedily these divisions will permanently lose their distinctive character. He says that the Duke of Connaught, under the control of someone who makes the same appeal to the Irish imagination as Lord Derby's typically British figure did in Great Britain.

IS THE IDEAL RECRUITER.

"The Duke of Connaught is coming back from Canada. His Irish title, his popularity, his long connection with the army and his fresh contact with the Dominion which has set a stirring example of voluntary recruiting for the cause of Empire and liberty, bined, make him an ideal man for the post.

St. Stephen Has \$100,000 Blaze In Lumber Mill

ST. STEPHEN, N. B., Oct. 17.—Halley & Sons' lumber and planing mill was totally destroyed by fire this evening, together with thousands of dollars worth of lumber.

Halley & Sons' plant was valued at about \$100,000, and is practically a total loss, with \$85,500 insurance.

WASHINGTON, Oct. 16.—There were two important developments today in the situation created by the attacks of the U.S. on vessels off American shores.

It was stated upon the highest authority that the United States must regard the general question of submarine operations on the American side of the Atlantic from the viewpoint of its effect upon vital American interests, and hence a question of policy, not a mere question of the letter of international law.

A report was received, as yet unconfirmed, that the captain of the steamship Stephano had made an affidavit to the British Consulate General in New York stating that a solid sheet was fired at and by the merchantman before the submarine had given her any warning.

The assertion that the United States will view the matter of submarine warfare in American waters from the standpoint of its effect upon American interests is of the greatest importance, if not with regard to what has passed, then with regard to that which must ordinarily be expected, namely, a repetition and continuation of the submarine raids. It is declared that the definite establishment of international law cannot be depended on entirely to meet the new developments vitally affecting the nation's internal interests.

Previous despatches to the Herald have emphasized the policy that when such raids establish a vital blockade of American ports as the raid of the U.S.S. did of the Port of New York, the different action becomes, in fact, directed at the trade of a neutral and not at enemy trade.

How New Raid Offered.

FRANCE: The question is heard, "What is the difference between simply sinking the ships on this side of the Atlantic or stopping or sinking them on the other side?" There is a vast difference. Trade leaving New York, for instance, goes through the south body of water until it passes the Narrows lightship and then spreads out, fanlike. Now, if the British ship is directed for Germany off the German coast or if the Prussians sink ships bound for England near the English coast, it must be apparent that the effect of such actions does not involve all American trade from the port of New York, as the operations of the U.S.S. did last Sunday.

If submarines kept up for two weeks' period such drastic interference with commerce just out of American ports as the U.S.S. have done, a sample of it seems reasonably certain that American export trade, and in consequence to the whole transportation system to the seaboard within the United States, would be adversely affected and serious losses caused to shippers in Middle Western cities or even beyond that zone. And that is what the Prussians are likely to attempt unless they are made to see that they cannot "get by" with it.

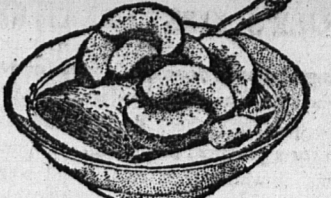

With regard to the testimony of the Stephano's captain, if that is corroborated and the point established clearly, there will be a clear and unmistakable case of violation of Germany's pledges. Hence that point is really of the more immediate importance. At the time of the Sussex attack President Wilson said he would sever relations with Germany forthwith. If she repeated her illegal attacks. Now he says he will make Germany live up to her promises. There seems to be a difference in these two positions that has escaped the attention of the American people. But in the event proof that the U.S.S. fired on the Stephano without warning would force a critical issue.

(Canadian Press Despatch) LONDON, Oct. 17.—Vice Admiral Fournet, commander of the Anglo-French fleet in the Mediterranean, has handed the Greek government a new note of an extremely grave character, says a despatch to the Exchange Telegraph from Athens dated yesterday. Following the presentation of the note King Constantine, it is added, came to the capital in haste from the Royal residence of Tatoi.

The railway stations of Athens and Piraeus, the city hall at the capital and the Castalia barracks have been occupied by French and Italian soldiers.

More Man-Power Behind the Job is wanted in every factory, in every store, in every office: Man-power comes from nourishing food that is rich in muscle-making material. Shredded Wheat Biscuit contains all the body-building material in the whole wheat grain in a digestible form. A man's food for a man's job. Serve with milk or cream or with sliced peaches or other fruits.

ps to number of 1,000 while 150 blue jackets with two machine guns have been stationed in the municipal theatre, according to a Ruter despatch from Athens today. The city is quiet.

Made in Canada

An urgent cabinet council has been summoned. It is officially explained, adds the despatch, that the detachments handed will assist the police in stopping demonstrations which threaten trouble.

SWISS TO STOP EXPORTS OF AMMUNITION TO ALLIES.

GENEVA, via Paris, October 18.—The Swiss Government, in consequence of the recent economic arrangement with Germany, has prohibited Swiss factories to export ammunition to the Entente Allies if they are using German coal or steel.

This order will render idle over 50,000 men, among whom there is much discontent. The proprietors of the factories met today and protested against the order, arguing that Switzerland receives Belgian coal, and that the Entente Allies supply raw material for their ammunition.

THE PASSING OF SUMMER.

Woods russet red—
Full fruited orchards and the golden haze,
That round the edges of the shortening days;
And fresher grows the sultry air at night
And sharper gleam the starry spears of light
In the blue vault overhead—
The year has passed its noon and summer's sped.

Green glades are crossed
With fairy gossamers, dew drenched and fine,
And in the hedgerows berried jewels shine—
Deep purpling sloes, and scarlet of the birch,
While the great beeches, flame to sudden fire
At the first touch of frost—
An added glow for every glory lost.

No songsters fill
The air with music; in kay companies
Feather'd explorers hurry towards the seas;
The falling leaves in elm dances by,
And fragrant pine cones dance drop in hollows dry.
But yet on aces and hill
The heather wears its royal vesture still.

Autumn is here—
A sun brown'd reaper—strong of arm and feet,
The ripen'd corn in sheaves about his feet;
The last flower summer left is on his breast:
"Be still, O, patient Earth," he cries,
"and rest—
Sleep through dark days and dream
Till spring shall whisper in thy dreaming ear!"
