A modern dwelling house fitted with complete electric light, water system and furnace, also a second dwelling house for farmer. A fully equipped fox ranch of 74 pens including new sheds, running water in ranch. This property is three miles from Borden and one from Carleton Sliding. W. DOUGLAS BELL.

LETTER OF SYMPATHY

To Mrs. Wallace Pursey from the United Church W. M. S. of North Rustico. Dear Friend:—We are indeed grieved to learn that you have recently been called upon to mourn the loss of a dearly beloved sister. While we realize how futile mere words are to heal the aching heart, yet we would assure you of our love and sympathy in this time of trial. Although we do not always understand the sad circumstances of this life, yet we must bow in submission to the Divine will for we do know that our Heavenly Father over rules all things for His own glory and our ultimate good.

PROLONGING HOPELESS LIFE

(By British United Press) LONDON, Aug. 7.—Should the doctor endeavor to prolong life in a hopeless case of disease? The question was raised by Sir Thomas Harder, the famous physician, in a paper at the International Cancer Conference in London. He gave no definite answer to the question, but he defined the doctor's attitude when faced with these distressing cases as follows: To prolong life by all the means in his power consistent with not adding to the patient's discomforts. It has been said that prolonging life in hopeless diseases is often prolonging the act of dying, continued Sir Thomas. "When this is so, humanity rightly dictates that the doctor's zeal is wholly misplaced. But as to this no universal rule can be laid down."

"The patient's life is his own and no one else's, the prerogative least of all of his most sensitive friends, who off-times plead for the advent of death as a relief from their own participation in the struggle as much as for his."

The effect of different occupations on the causation of cancer formed the subject of numerous papers. Here is a summary of the principal points: It is only surface cancers that can be attributed definitely to the occupation of the person on whom the growth arises. The occupations incriminated are those of the tar worker, the mule spinner, the chimney sweep and the worker in heavy mineral oils. Those who work in patent fuel factories and who make briquettes, and those who work in cobalt and aniline dyes are also subject to cancerous growth on the skin.

Of all occupations, that which is least visited by cancer is the Church. Why clergymen should be thus comparatively exempt is not plain for they are a long-lived body of men, and it is in the later years of life that cancer usually arises.

Probably the freedom of the clergy from this affliction is to be attributed to the general moderation and healthiness of the life of the average parson.

Five cancer patients—all women—were operated on for the insertion of radium needles in St. Bartholomew's Hospital in the presence of a large number of delegates attending the conference. One patient had twenty-three needles inserted against the cancer cells.

This was amplified later by a cinematograph display. The "wandering cells," which become extremely mobile in the early stages of the disease, were shown in an aggressive attack on the degenerate cells surrounding the affected area. This was followed by the magic effect of the radium needles. Twenty minutes after their insertion every cell—mobile and degenerate—was motionless.

A new method of preventing infection with measles, of which the serious danger of life is commonly ignored, was outlined at the Royal Sanitary Institute Congress in Plymouth by Dr. W. A. Lethem, of the Ministry of Health. Encouraging results have been obtained from the method, which consists of injecting the child who has been exposed to infection. In many instances immunity has been produced.

Many Doctors, said Dr. Lethem, had been confronted with the difficulty of dealing with a child, already struggling for life, who had been exposed to the infection of measles. In convalescent serum, however, there was a weapon of defence which had proved effective. Whatever disadvantages there might be in the use of this serum were far outweighed by its advantages.

You will indeed miss your dear sister but your loss is her great gain. She has gone before that blessed home where there is neither pain nor sorrow and where "we shall see Him face to face."

May we lay hold on God's promise and trust in the Saviour who wept at the grave of Lazarus and "is our refuge and strength, a very present help in trouble."

"All unseen the Master waketh by The tolling servants side; Comfortful words he speaketh While His hands uphold and guide; Grief nor pain nor any sorrow Rendeth Thy heart, to Him unknown; He today and He tomorrow Grace Sufficient gives His own."

New Annan And Vicinity

Miss Mamie Mill and Mr. Harold Mill, Clermont, were recent visitors to Summerside.

Mr. B. F. Pillman, Traveller's Rest, was to the City Thursday, on business. Mr. Pillman is doing quite an extensive line of sale work in the interests of the Frost & Wood Co.

Mr. John Pillman, Freetown, was a visitor to Indian River Wednesday evening, 1st inst.

Aviation Is Here To Stay

LONDON, August 6.—"I am firmly convinced that aviation has come to stay, so far as our women are concerned, as in Russia, China, Japan, Roumania, Sweden, Holland and all those other countries which boast of successful women pilots," says Lady Heath, noted British pilot, in an interview in the Sporting Life.

"It is little realized the part women have played in the history of many conquests of the air. They are many and glorious. She has stood by man, not only in the actual flying, but in the general development and construction of aircraft, and when she has not done this she has helped in less direct but not less substantial ways by her encouragement and support."

"Catherine Wright, who was a school teacher never married, so that she might earn money to enable her brothers to continue their experiments, which have made aviation possible to us all. And she whose name, alas is so often forgotten when we speak of that famous family, is still taking a keen interest in the progress of the world's aviation from her home in America."

"As early as 1911 a number of women took their certificates as pilots. Mrs. De Beauvoir Stocks, and Mrs. Maurice Hewlett, who afterwards ran her own aircraft factory, and who taught her own son to become one of the most brilliant pilots of the war, were two of our own countrywomen to do so."

"In America, Miss Harriet Quimby and Miss Mobsant also did so, and Miss Quimby, who spent some time giving exhibitions in flying, holds the distinction of being the first woman to fly across the English Channel which she did in 1912. There are many others."

"Then Catherine Stinson runs a school of aviation with her brothers and another sister at St. Antonio, and is herself a brilliant pilot. "The question of expense has possibly deterred many others from taking to the sport, but anyone can learn to fly for under \$150 and they can do so in some twenty lessons of thirty minutes each. As members of a club they are provided with a plane, but they can purchase their own machine for \$3,000 and this only costs about \$75 a month for upkeep, depreciation, insurance, garaging, and fuel expenses. And this will allow of flight of between 2,000 and 3,000 miles a month."

"There are three women in England holding commercial licenses—Miss Helen Brien, and Miss Spooner—and there is a real possibility of others in this country entering this new profession, as they have done so successfully in America for many years past."

which was a very large one, was held on Friday morning. She leaves by a grief-stricken husband, one son and daughter to mourn the loss of a dutiful, beloved wife and mother, besides a large group of sorrowing friends and relatives.

Mr. Alden Moose was in Wilmet Valley Friday on business. Mr. Emmett McMillan who has been engaged for some weeks in Long River, has returned to his home in New Annan for a few days.

Mr. Patrick Cairns, Newton, was a recent visitor to New Annan. Mr. and Mrs. Harry Waugh, of Wilmet Valley were guests of Mr. and Mrs. J. Scott McMurdo, North Bedeque, 1st inst.

Many of the farmers in this community have completed their haying, while others are well on the way. They report a lighter crop than last year.

Mrs. Percy Marchbank, New Annan, spent Friday in Alberton, a guest of her sister, Mrs. (Br.) Campbell, of that place.

Mr. Emmett McMillan made a business trip to Bouquet Cove Monday.

Revs. Turpel and Stanford O'Leary were recent guests of Mr. and Mrs. Henry Moose. Misses Viola and Anna Hoggarty, of this place, are visiting friends in Newton.

The people of this vicinity are pleased to see Mr. Neil McKinnon O. K. after his recent illness. X

WOMEN COMBINE TO PROMOTE EQUALITY

Joint Committee Of Women's Organizations Works For Privileges For Women Medical Students In Britain.

LONDON, Aug. 6.—The deep concern felt by women's organizations at the great reduction in the opportunities for women medical students to receive training in London medical schools or clinical experience in the hospitals has resulted in the formation of a very representative committee seeking to improve this state of affairs. This joint committee of women's organizations to promote equal facilities for women with men in the medical and hospital service held a meeting at the Hon. Mrs. Franklin's house in Portchester Terrace, Mrs. Corbett Ashby, president of the International Women's Suffrage Alliance, presiding.

"We think the position very serious indeed," said Mrs. Ashby. "Three of the London hospitals—St. George's, the London, and St. Mary's—which for some years admitted women have now closed their doors to them, and three others—Charing Cross, Westminster, and King's College—while allowing those at present training to finish their courses will admit no more. At present one medical school—the London (Royal Free Hospital) School of Medicine for women—admits exclusively for women, and the University College Hospital admits not more than 12 women students a year."

It has been suggested, said Mrs. Corbett Ashby, that the Royal Free Hospital could take more students, but already it offered fewer beds per student than any of the other medical schools. "The committee," she said, "feels that medical students should have the choice of attending either a co-educational or a woman's medical school. We should press that both type of school should be open."

"The Dominions have their own medical schools, but Britain is still largely responsible for training women doctors for the Eastern and other more remote parts of the Empire." Mrs. Ashby added that the committee of management of King's College Hospital had consented to receive a deputation from this committee to hear its views. The offer to send a similar deputation to a committee of the London University Senate had not been refused but the Senate took the line that it was better for the University to deal with the matter itself.

A member of the committee representing the Head Mistresses' Association spoke of the appreciation shown by parents when they could submit a woman doctor on the school staff. She said parents often asked for the address of a woman doctor in their own district, and that it was often difficult to find such a doctor. Another teacher endorsed this.

BROAD PROGRAMME FOR SCIENTISTS

British Association Meeting At Glasgow Will Discuss Many Matters.

LONDON, Aug. 6.—Nearly 3,000 members of the British Association for the Advancement of Science are expected at the annual convention, which will be held in Glasgow from Sept. 5 to 12. It is nearly 30 years since Glasgow last had the distinction of entertaining the British Association.

The President this year is Sir William Bragg, and in his inaugural address he will deal with the broad issue of the relations between science and industry. The address will be broadcast.

Of the 300 or so papers for discussion in the 15 sections, 26 will be read by women. Fourteen of these 26 will be read in the botanical section, two each in the psychological section, three in the zoological section, two each in the anthropological and educational sections, and one in the geological sections. Dame Helen Gwynne-Vaughan will be the President of the special section dealing with forestry.

CONDITION OF WESTERN CROPS ENTIRELY SATISFACTORY

No Serious Damage From Rust Reported in Any Locality. Hail Injuries in a Few Sections.

(Special to the Guardian) MONCTON, N. B., Aug. 7.—Cutting of rye and barley in Manitoba and some sections of southern Saskatchewan has already commenced and will be general over the whole of the west within ten days according to the thirteenth weekly crop report of the Canadian National Railways. No wheat cutting has been reported as yet except from one point in Central Manitoba where some Garnet wheat has been cut, but wheat cutting will be general in Manitoba by the end of this week in Saskatchewan and Northern Alberta by August 18.

Virtually not one place in the prairies reports any serious damage from rust. In fact there is almost complete freedom from this plague and as the crop has now reached the point where rust can do little harm danger from this source can almost be dismissed as a possibility. There has been no damage from frost at any point but several places have suffered severely from hail. These are located mostly in Saskatchewan and Alberta.

Between Dunblane and Eaton in Saskatchewan there was considerable hail damage especially from Eaton East to Dankin and Glenden where a strip about three miles wide, was severely hailed. The area affected is about 6,000 acres with a possible forty per cent loss. An estimated loss of 75,000 bushels was suffered around Snipe Lake in the same area. Between Argo and Hemaruka, Sask., there was also some loss from hail but the extent of the damage is not estimated. Around Vawn, Sask., about 3,000 acres suffered hail damage and there was also some lighter damage from the same cause between North Seattleford and Stawburg, but it is not expected to exceed five per cent. Between Hanna and Kindersley on the Alberta-Saskatchewan line there was some slight hail damage and between Alliance and Camrose, Alberta, particularly in the vicinity of Galahad and Alliance there were losses from hail from five to forty per cent.

Except for lack of moisture in a few sections in Saskatchewan and Alberta conditions everywhere in the west remain highly satisfactory and the outlook for a splendid crop remains bright. All grains have filled out nicely and are maturing quickly. Estimate of the yield are difficult to secure accurately but those which have been made are as high as forty bushels an acre for wheat and seventy-five bushels an acre for oats. The lowest estimate on wheat up to the present has been twenty-five bushels an acre.

Bedeque And Vicinity

Messrs. Henry Affleck and Roy Campbell, Chelton, were visitors to Summerside on Tuesday.

Messrs. Russel and Walter Hamill, of North Carleton, were visitors to Borden on Monday.

Mrs. William McFarlane and Mrs. Arthur McFarlane and little daughter Norma, Lower Bedeque, were visitors to Chelton on Tuesday. Miss Doris McFarlane, nurse in training at P. C. Hospital, Summerside, was visiting at her home in Lower Bedeque on Tuesday.

Announcing the NEW UTILITY TRUCK -another Sensational Chevrolet Value 4 Speeds Forward • 4 Wheel Brakes

NOW Chevrolet presents the New Utility Truck—a low-priced haulage unit embodying every feature of advanced engineering developed through years of experience in commercial car-building and proved by exhaustive testing on the General Motors proving ground. Typical of the progressive design embodied in this sensational new truck are a four-speed forward transmission, powerful non-locking four-wheel brakes, full ball-bearing steering mechanism, front shock absorber springs, air-bound seat cushions and channel front bumper. In addition, it offers all those basic features which have been so largely instrumental in Chevrolet's tremendous success as the world's largest builder of trucks—rugged rear axle with one-piece banjo-type housing, semi-elliptic springs set parallel to the load, completely enclosed valve-in-head motor with air cleaner, oil filter and positive action vane type oil pump, thermostatic control of water circulation, low loading height and countless other features of comparable importance. Visit your Chevrolet dealer and get a trial-load demonstration of this remarkable new truck! It has been developed to meet the modern conditions of business transportation and body types are available for every type of business.

wherever you may go. Signed in behalf of your Sister Members in Chelton Institute. Mr. and Mrs. Affleck in a few chosen words thanked the kind neighbors for their thoughtfulness toward them. A dainty lunch of ice-cream and cake was served by the ladies. After an old fashioned sing-song was over each one departed to their homes, but not before wishing Mr. and Mrs. Affleck the best of luck. With a freshness and sweetness, The air is made new; The birds are all singing, The skies are all blue; The flowers have uplifted Their petals again, And the meadows grow green, At the touch of the rain.

News From Boston Mr. Joseph M. Kieckham, Superintendent of the Intercolonial Club of Boston, has returned to Boston after a very pleasant vacation in Prince Edward Island. Mr. Kieckham was deeply interested in the operation of the prohibition laws in Canada, particularly on the Island, but from his personal observation the dry laws are not very effective. He reports bountiful crops and prosperous conditions. John N. Chaisson, President of the Intercolonial Club of Boston, Capt. Archibald P. Campbell, John J. Powers and son Arthur, of Cambridge, Mass., have arrived home in Boston after a visit to Summerside.

"COME" After Me and I Will Make You to Become Fishers of Men! Mark I. 17. Is the Divine Master calling you to become a Franciscan Missionary? No matter how poor you may be, or unworthy you may deem yourself, God has something for you to do. Let the Franciscan Friars of the Atonement help you to realize your wonderful and sublime vocation, whether it be to the Priesthood, Brotherhood, or Sisterhood, in that glorious and illustrious Franciscan Family. Those interested can either see Rev. A. Francis, S. A., at the Bishop's Palace, Tuesday, Aug. 14th or write to the Very Rev. Paul J. Francis, S. A., Graymoor, Garrison, N. Y.
