BRICK ROADS

LATEST FEATURE

MONTREAL, May 20.—The adaptability of brick to rural highway construction will be subject of an elaborate exhibit to be held in Montreal, in connection with the First Canadian and International Good Roads Congress now in progress in this city. Many Dominion cities are large users of brick for urban pavement, but the country road of brick is a comparative novelty in Canada. However, its rapid rise to favor in certain of the United States has attracted attention and visits from many Canadian highway engineers. The vicinity of Buffalo and Ouyahoga County, Ohio, which contains road localities of the world. The success of the brick road has been largely due to its permanence under the new conditions of power traffic which have played havoc with older types of road improvements. The hardness of brick enables it to withstand the friction and wear of the rapidly running automobile. This quality so appealed to Governor Glynn of New York State that he recently devoted an entire message to the Legislature on the advocacy of brick for all main highways in the State of New York. Guyahoga County, Ohio, has nearly four hundred miles of this type of rural road, built at an approximate cost of \$1,000 per mile for each foot in width. One effect of these roads has been such a rapid rise in rural land values in the County that their increased tax valuation has more than covered the cost of construction. The bricks are laid upon a thoroughly compacted two inch sand cushion, resting on an unyielding base. A grout filler is applied in such a manner as to make the pavement a perfect monolith. Such roads have won their way to the appreciation of auto owners and farmers alike, being equally passable in any season of the year and drained that every rain washes them clean. Where other types of road require constant vigilance and constant expense for maintenance, a properly constructed brick pavement according to Government authorities in the States, has never yet been known to wear out.

DAILY SELECTIONS FOR GUARDIAN READERS

MY CREED

I believe that the country, which God made, is more beautiful than the city, which man made; that life out of doors and in touch with the earth is the natural life of man. I believe that work is work where ever we find it, but that work with nature is more inspiring than work with the most intricate machinery. I believe that the dignity of labor depends not on what you do, but how you do it; that opportunity comes to a boy on the farm as often as to a boy in the city; that life is larger and freer and happier on the farm than in the town; that my success depends not upon my location, but upon myself—not upon my dreams, but upon what I actually do—not upon luck, but upon pluck. I believe in working when you work, and in playing when you play, and in giving and demanding a square deal in every act of life. Edwin Osgood Grover.

Are you one of those to whom every meal is another source of suffering?
Na-Dru-Co Dyspepsia Tablets will help your disordered stomach to digest any reasonable meals, and will soon restore it to such perfect condition that you'll never feel that you have a stomach. Take one after each meal. 50c. a Box at your Druggist's. Made by the National Drug and Chemical Co. of Canada, Limited. 150

The irreducible minimum for which a good Suit can be sold nowadays is \$15. Below that price you meet with every "cheat" in the cheapening and quality-subtraction known to the wily maker of shoddy and ready-mades.

Semi-ready Tailoring has all the glowing style and flowing grace of kingly art. Starting at \$15, you may select finer woollen weaves and patterns at \$20, \$25 and \$30.

If you prefer a Special Order, and a made-to-measure garment, we have "Semi-ready" Custom Tailor samples—800 of them—at \$18 and up.

S. A McDonald

"If you go fishing the 24th, you better lay in your supply of fishing tackle now, so you will have everything ready. This is head-quarters for fishing gear—our tackle was selected by an expert angler and is ideally suited to local conditions. Come here for rods, lines, reels, flies, baskets, floaters, sinkers, etc. Two Macs, 149 Great George St. Metf.

You can get Bigger Yields of Better Quality

From your farm if you will let us help you when purchasing your fertilizers for spring crops. Agricultural Authorities and Experimental Stations in this great Dominion of ours prove that all crops remove from the soil more POTASH than Phosphoric Acid; therefore, you must use a fertilizer containing more POTASH than Phosphoric Acid. Having Acid Phosphate, Nitrate of Soda and POTASH in stock, can quote you these materials at reasonable figures, and will show you **How to Mix Your Goods at Home** and save money by buying raw material and doing your own mixing. You then know what you are feeding your crops and can be assured to get bigger yields of better quality. When next you talk it over.
