Government majority of 47 on the final vote.  
 Hon. Arthur Meighen, the youthful Solicitor-General who, with the Premier bore the bulk of the firing in the C. N. R. question, warmed up the debate for the Government with one of his incisive, vigorous and logical speeches. He was given another great ovation by the Conservatives but his remarkable handling of the whole C. N. R. question, has raised the general respect and regard for the young Westerner. Mr. Meighen was practically effective in showing up the vagaries of the Liberals in the C. N. R. He analysed their position and emphasized that the Liberals had during the course of the debate taken up a half dozen various stands in the question.

In buying chocolates you should insist on purity, for impure chocolates are almost as bad as poison. Here you will find always a good selection of the purest, cleanest, freshest, and most finely flavored chocolates, prepared by the leading confectioners in Canada and the United States—here are Neilsons, Willards, Moirs and Taggarts, ranging in prices from 35c to \$2.00 a box. **C.N.R. BILL PASSED IN COMMONS**  
 (Continued from page 1.)  
 The first amendment was defeated by a vote of 85 to 42 a Government majority of 43.  
 The second amendment was defeated by a vote of 85 to 38.  
 The third reading was then passed by the same division.  
 Mr. W. P. Nickle voted in every case with the Opposition.  
 Mr. W. A. Charlton, of Norfolk, Ont., in the second amendment and third reading voted with the Government.  
 Mr. R. B. Bennett, the leader of the Bull-Moosers, was absent from the city, having left for Calgary last night. The apathy of the Opposition is shown by the unusually large number in progress at those mines.

The capital stock now issued is \$85,000 divided into 1700 shares at \$50.00 each. The authorized capital is \$170,000 so that the company can enlarge if necessary.

All expenses incurred in organizing and promoting the company, selling stock, etc., will be borne directly and solely by the promoters, every cent you invest goes to pay for five pairs of foxes at \$17,000 per pair.

Our five pairs of guaranteed, pure bred silver black foxes are from the best original ranch stock on Prince Edward Island, are from strains of high records for large litters and fur production, and are guaranteed free from any physical defect whatsoever.

One pair is from the ranch of Thomas Moyses of Bedeque, and is from stock closely related to two pairs that were sold by him in 1912. These two pairs produced eleven pups the next year and 13 pups in 1914.

We have arranged with Mr. Thomas Moyses of Bedeque, P. E. I., one of the most successful Fox Ranchers known and a man of unquestionable character, to ranch our foxes for one or more years. Mr. Moyses has had wonderful success raising foxes. The ranch in which he has full oversight sold in Sept. 1912 two pairs to a Company in Summerside, P. E. I., these two pairs were ranches with Mr. Moyses and in 1913 produced eleven pups which were sold in Sept. 1913 for \$17,000 per pair, giving the Company a record dividend. We are therefore fortunate in securing such a capable and trustworthy man.

Ranching expenses will be 10 per cent. of the yearly increase for the first three years; after that period a vote of shareholders decides the disposition of this matter.

Mail your order for stock with 10 p. c. of the amount in cash the balance will be required Aug. 15; or write to the Secretary-Treasurer for a Prospectus or any information desired, or call at the office in Morris Block.

We are not promising absurd dividends. Our prospectus shows what others have done and we are confident of success.

If you want to invest in Foxes and get in right. Get in where Ranch Management is the best and where you find good solid business men as Directors. Send your subscription or a request for a Prospectus to any Director, or to

**Reade's Electric Worm Eradicator**

THIS preparation is for the killing of grubs, insects and worms that do their destructive work at the roots of plants, flowers and trees. Great damage is often done to plants and the real reason never known, as the damage is being done at the roots where it is not perceptible.

"Electric" Worm Eradicator is applied by means of an ordinary sprinkling can such as is used in every garden.

For most pests one ounce of the Eradicator to each gallon of water is sufficiently strong to do effective work, for other pests, such as cut worms, two ounces to the gallon is necessary. When the ground is drenched with the solution, the worms immediately squirm to the surface of the ground, where they die in a few seconds.

When used according to our directions there is absolutely no danger to the plant or tree, although it is sure death to the pests of every kind.

**DIRECTIONS FOR USING**  
 This preparation is specially designed as a destroyer of Worms of every kind at the roots of Trees, Shrubs, Plants, Flowers, Vegetables and Grape Vines.

**For Cut Worms,** use two ounces to each gallon of water, and apply with a watering can, drenching the ground thoroughly. These worms do not rise to the surface as other worms do, but die in the ground. Apply early in the morning.

**For Ants,** use two ounces to each gallon of water, mix thoroughly and apply freely with a watering can or spray. These pests may require a third application before you can get rid of them finally.

**For Borers,** it is a case of prevention rather than cure. The borers come out of the ground and work up the tree, where it is practically impossible to reach them. Thus it is necessary to kill them when they are in the ground.

Use two ounces of the Eradicator to each gallon of water and drench the ground around the tree during the months of April, August, or September.

**For Worms at the roots of trees, fruit or vegetables,** carefully measure one ounce of the Worm Eradicator to each gallon of water; put into a wooden pail; agitate the whole well together, then apply in the ordinary way, using a watering can. For this purpose, during the Summer months it is best to apply it early in the morning.

**For Lawns and Golfing Greens,** use one ounce to the gallon of water as above.

**For worms at the roots of House Plants,** use a teaspoonful to a cup of water.

Be particular to avoid foliage as much as possible. If foliage is treated, it must be washed off a few minutes after.
