THERE IS NO SUBSTITUTE FOR PROTECTION

The protection which you are afforded in "Garden City" Milk and other G. C. products cannot be done up in

BARGAIN BUNDLES
Each individual bottle of Garden City Milk represents a long line of scientific progress and development and is absolutely the purest form of food you can obtain anywhere. Garden City Milk is filtered, clarified, pasteurized and automatically bottled in thoroughly sanitary containers, all for

YOUR PROTECTION

We invite inquiries from all citizens regarding the Island's Purest Product.

THE PURE MILK CO., LTD.

FOR ALL BRANCHES OF REPAIRS and remodelling of your buildings, call Borden T. Myers, St. Avaris, Quick, Satisfactory Service at reasonable cost. Estimates on all jobs large and small given free.

HERE IS NOTHING LIKE A good tonic at this time of the year to build up that extra pep you need for the active days ahead. Call in at H. L. WORTH'S Drugstore on Queen St. and you may purchase a bottle of the famous "Mus-kee-kee" Indian Herb Tonic for only one dollar. It's genuine builder and a good investment.

AUTOMOTIVE ACCESSORIES

See the large stock of all types of Accessories for your car at the **WHITLOCK TIRE SERVICE**, Kent Street. They carry a full line of Tires, Tubes, Batteries, Gauges, Pumps, Patches, Wipers, Sessing Spindlers, Mirrors, Bumper Guards, Etc.

When you have the trouble of any kind Phone 909. They "Fix Flats—Anywhere — Any Time."

Through the co-operation of the sponsors, whose advertisements appear in connection with the contest the **Charlottetown Guardian** is publishing the **Foto Blox Contest** for thirty consecutive weeks. Prizes are being awarded each week as listed above, in the form of service or merchandise orders.

CONTEST RULES

Any readers of the **Charlottetown Guardian** may participate. (Excepting employees of the **Guardian Publishing Co.**, and members of their families.)

It is important that each reply shall be accompanied by a receipt from one of the firms whose advertisement appears in the contest.

It is also important that you state on your entry which of these firms you wish to draw your prize on.

EXPLANATION OF CONTEST

Scattered throughout this contest section you see several pieces of a photograph. When properly placed together these pieces form the picture of the business premises of one of the sponsors of this contest.

Contestants are simply required to state the name of the firm, the name of the manager, the kind of business, and the street address of the business premises shown in the picture.

HOW TO ENTER

Read the ads thoroughly — in one or more of them you may find a clue to the solution. Clip the sections of the picture and assemble them so as to recognize the business premises. **YOU DO NOT HAVE TO SEND THE PICTURE WITH YOUR REPLY.**

Write your entry on ONE SIDE of a sheet of paper, giving the particulars in this manner:

SOLUTION to LAST WEEK'S CONTEST

Sponsor—Toombs Music Store.
Manager—A. E. Toombs.

Business—Musical Instruments and Supplies, Radios, Refrigerators, Kyanize Paints.
Location—167 Queen Street.

Then attach to your reply a receipt from any one of the sponsors of this contest showing that business has been transacted with at least one of them.

Also be sure to state the name of the firm from which you wish to receive your prize.

All correct replies have equal chances of winning. The winning entries are drawn for and the prizes will be awarded in the order in which they are drawn.

All prizes are awarded in the form of orders on the advertisers indicated in the replies and are NOT TRANSFERABLE.

All replies must reach this office not later than noon on Thursday. Send in as many replies as you wish but be sure to attach an entry slip to each reply.

Address all entries to the **EDITOR "FOTO-BLOX" CONTEST** The **Charlottetown Guardian**

PRIZE WINNERS LAST WEEK

- 1.—Miss Dale Proude, Milton.
- 2.—Mr. H. E. Porter, 39 Grafton St.
- 3.—Miss Etta Younker, Mt. Edward Road.
- 4.—Miss Zelma Mutch, Box 294, City.

TOOMBS MUSIC STORE

167 QUEEN STREET
This is one of Charlottetown's most popular business houses, and has been operating in this present stand for over twenty years. Mr. A. E. Toombs, the general manager opened his business over thirty years ago in a building which stood just a few doors away from his present store.

Mr. Toombs has a thoroughly appointed repair department where you may have any kind of musical instrument in the world repaired at very low cost.

In addition to the other lines mentioned they also carry an exceptionally fine variety of lamps for different purposes such as: Parlor Lamps, Table Lamps, Bridge Lamps, etc. They are also agents for the well known G. E. Edison Mazda Bulbs.

The Famous Kyanize Paints, Varnishes, and Enamels are sold in this province by A. E. Toombs. This is a real high grade line and is "self-smoothing", a patent feature which renders it free of brush marks.

Flashlights and batteries, radio tubes, and aerial equipment are also among the large variety of commodities you may obtain at Toombs Music Store.

The store is at 167 Queen Street and their phone number is 185-L. All purchases at A. E. Toombs' entitle you to an entry in the Foto Blox contest and they will be pleased to honour your prize order.

At Toombs' you may also purchase a Leonard Electric Refrigerator, one of the markets leading makes.

Gramophones are also sold here, and they stock a full assortment of records.

Complete Orchestra equipment, special choir music, all popular sheet music, and a complete stock of all musical accessories may be obtained at Toombs Music Store.

Dalhousie University Centenary

HOW A NOVA SCOTIAN COLLEGE WAS BROUGHT INTO BEING BY A SCOTTISH EARL
Taken from "The Scotsman" Edinburgh, Tuesday, August 16, 1938 (From a special correspondent)

OTTAWA, August 6. —If there is one seat of learning in Canada which more than any other has a Scottish background and flavour, it is Dalhousie University, situated at Halifax, the capital of Nova Scotia, and on August 17 it will by a special concordant at which various distinguished personages will receive honorary degrees — and other ceremonies celebrate the hundredth anniversary of its acquisition of the status of a University.

Dalhousie University owes its foundation and name to one of the most notable Scotsmen of his generation, George Ramsay, ninth Earl of Dalhousie, who achieved distinction as a soldier, as an administrator, and as a promoter of educational and agricultural progress. Born on October 17, 1770, at the ancient castle of Dalhousie, in Midlothian, he was the eldest son of the eighth Earl of Dalhousie and Elizabeth Glen of Longcross. His mother took charge of his early education and later he attended first the Royal High School and then the University of Edinburgh. During his youthful days in Edinburgh he became a friend of Walter Scott, who once said of him, "Lord Dalhousie has more of the Caledonian praisefides than any other man now alive."

His father's death brought him the Earldom and the family estates in 1787, at the early age of 17, and in the same year he entered the Army as a cornet in the Third Dragoon Guards. His rank probably helped his rapid promotion, for he was a Major in the Queen's Bachelors' Regiment in 1792, and in an interval of two years — 1796-98 — during which he served as a Representative Peer for Scotland, he was almost constantly on active service. He helped to suppress the Irish Rebellion of 1798, and served in the West Indies, where he was severely wounded at Martinique. This was his last military service, and he was included in the Peninsular War, where he commanded the 7th Division, winning the high commendation of Wellington in his dispatches. At the Battle of Waterloo he distinguished himself so greatly that Parliament awarded him a special medal and clasp.

Appointed Governor of Nova Scotia

By this time the Earl had his fill of soldiering, and he retired to settle down on his estates and devote his energies to the improvement of agriculture of which he had become a scientific student. He had married in 1805, Christian Broun, only daughter of Charles Broun, and East Lothian laird and she made an admirable and devoted partner in his "Journal" work. She was an "amiable, intelligent, and lovely woman," and Dean Ramsay praised her "acute observation, kind heart, and brilliant wit." She had a large family, and his life among their tenantry, but fate ruled otherwise. The British Government wanted a soldier of liberal views to take charge of the Government of Nova Scotia, which was trying to recover from the war of 1812-14 waged with the United States, and when their choice fell upon Dalhousie he felt it his duty to accept the post.

Arriving in Nova Scotia in 1816, he set himself to reform abuses which had hampered trade and agriculture, and to develop the land and his wife soon made themselves popular with all classes. At that time education in Nova Scotia was in a very primitive state, and he set on foot a plan for higher education was King's College, an Anglican institution which admitted members of no other religious faith. Dalhousie saw an opportunity of remedying this state of affairs when the British Government gave him the discretion to spend for any useful purpose a fund which had a curious origin.

The Castine Fund

During the war of 1812-14 a British force under General Gosselein had occupied without any serious opposition from the inhabitants — who, like most New Englanders of the day, were unsympathetic to the war — a debatable tract of land known as the Castine Peninsula, lying between the Castine and Penobscot Rivers, and now forming part of the State of Maine. During their occupation the British set up a Customs House, and Castine became for a time a free port, and a centre of profitable trade between the New England States on the one hand, and the British West Indian colonies and Nova Scotia on the other. When hostilities ceased and the Castine peninsula was recognised as part of the United States, General Gosselein took back with him the accumulated revenue of the Customs House, and it was this Castine fund which Dalhousie now had at his disposal.

As he had almost automatic powers, he encouraged no opposition when he intimated to the House of Assembly in April 1820 his intention of devoting part of it to the assistance of a military library and the balance to the foundation of a non-sectarian college. In his speech he made the following prediction:—

"I earnestly recommend to your protection the College now rising in this town. The state of the Province requires more extended means of education, and the College, open to all classes and denominations of Christians, will afford these means in the situation best suited to make them generally available. I am myself fully convinced that the advantage will be great in our time, but that it will grow with the prosperity of the Province, no human foresight can imagine to what extent it may spread its blessings when your children compare the state of Nova Scotia then to what it is now."

Dalhousie could do no more for the College than give it his blessing, for two months later he left for Quebec to assume the duties of Governor-General of Canada. He held this high office for seven years, and did a lot to reconcile the British and French whose relations had been very strained. Then in 1829, he was sent to India as Commander-in-Chief, and spent three years there, until his health began to fail and forced his retirement. At long last he was free to return to his beloved ancestral home, but unhappily his closing years were racked with ill-health, and he died on March 29, 1838.

New Glasgow and Vicinity

Mr. and Mrs. J. P. McKie, Charlottetown, were visitors to New Glasgow, last week.

Miss Rena Neill, Milton, is the guest of Mr. and Mrs. Adder Dickleson.

Mrs. W. H. McKie, and son Angus, accompanied by Mrs. James Morrison, Summerside, were visitors here Sunday.

Mr. and Mrs. Frank Houston, Mayfield, have as their guest Miss Laura G. Ross, Charlottetown.

Mr. Leslie Weeks, Fredericton, has purchased a Saw Mill from Mr. Marchbanks, at Mill Valley and expects to have it in operation in the course of a few days.

Mrs. Harry Ramsay, and son James arrived in Kensington, on Saturday evening, having returned from Revere Mass. They will spend a few weeks visiting relatives and friends here.

The Women's Missionary Society of the United Church held a special service in the church on Sunday evening. Rev. W. J. McLeod presided and delivered the message. The Charlottetown Male Chorus, eight were present, and the Music was of high order. Those Singers were greatly appreciated by the audience and by another visit from these artists in the near future. The collection was a generous one which goes for Missionary purpose.

Fall Care of Pullets

(Experimental Farms News)
The date at which birds will come into production in the fall will depend largely on the extent of maturity for that particular strain of birds and on the system of feeding practised during brooding and rearing. In order to have the birds come into production at a definite time in the fall, these factors must be given consideration. It has been the experience with Barred Plymouth Rocks, at the Dominion Experimental Station, Kentville, N. S., states R. P. Cheney, Head Poultryman, that birds coming into laying between six and seven months of age give the best satisfaction from the standpoint of production, egg size and body weight. Birds coming into laying less than six months are inclined to be small birds, lay small eggs while birds requiring more than seven months are not as heavy producers though they show an increase in egg size. It is generally not good practice to rush birds into production at four and one-half to five months of age by putting them onto laying mash at this age, but rather to continue feeding a growing mash along with plenty of scratch grain until the birds are fully developed.

Growing Pullets On The Range

(Experimental Farm News)

The most satisfactory place to rear pullets is on range land, preferably at some distance from the main poultry plant. Grass or clover, or some excellent range for chickens, but if these are not available, an effort should be made to provide green feed by sowing annual crops such as oats. Chickens reared under good range conditions are usually more vigorous and more profitable layers than those reared under crowded conditions where the yards are bare most of the summer.

At the Dominion Experimental Station, Fredericton, N. B., chicks are placed in portable brooder houses direct from the incubator. The chicks are given a yard as soon as weather permits in the spring, after the houses have been moved to ground which is seeded with clover the previous year. When the chicks are about ten weeks of age, the pullets are given a large grass or clover range and there until they show signs of coming into production, when they are placed in laying houses. Range shelters provide ideal accommodations for pullets or cockerels during the summer. A shelter measuring 8 x 10 feet with an eighteen inch post, constructed of 2 x 3 inch material and fitted with several roofs will hold about 100 pullets. The sides and ends of the shelter should be covered with one inch mesh chicken wire to give protection from animals at night. Range shelters, fed hoppers, drinking troughs, etc., should be moved several times during the summer to prevent excessive contamination around them. It is also a wise precaution against the spread of disease to set the food hoppers and drinking troughs on wire screen raised a few inches off the ground.

A convenient and very satisfactory method of feeding on range, states Leonard Griesbach, Dominion Experimental Station, Fredericton, N. B., is to use both mash and grain in hoppers. The hoppers can be constructed so that either the mash or grain may be shut off at any time desired. The grain mixture may be composed of almost any mixture of grains, but it is a good plan to include grains that will be fed in the laying house as well as the range on range may be much the same in composition as the mash used in the brooding period if the pullets have free access to both grain and mash. If skim-milk or buttermilk are available, however, a mash made up largely of ground home-grown grains may be fed with good results.

THE NEW FASHIONS CHEZ MAINBOCHER

High points in the new Mainbocher Collection are his engaging series of hostess gowns, his use of buttons for decoration, and a variety of tulle superior to any seen so far.

Buttons are important in all the recent shows, both as fasteners and ornaments, but Mainbocher makes particularly adroit use of them in a wide range of materials and motifs. They constitute the sole adornment of many of the Mainbocher clothes and are cut from precious stones, plastic materials, ivory, Mother-of-Pearl and enamel.

Some buttons are flower-shaped, some are animals' heads, some are reproductions of old medals, and others are in such modern technical forms as the parts of a machine.

Mainbocher places embroidery—silk, metallic and paillettes—in vertical lines along his gowns to accentuate the elongated silhouette. His new tulle, known as "Angel's Breath," shimmers with metallic lights and spirals. It is misty and sheer enough to be used over other fabrics and is ornamented with brilliant embroidery as to need some kind of subtle dimming.

Hostess gowns in this show are designed on entirely new lines.

And Vicinity

Mr. and Mrs. J. P. McKie, Charlottetown, were visitors to New Glasgow, last week.

Miss Rena Neill, Milton, is the guest of Mr. and Mrs. Adder Dickleson.

Mrs. W. H. McKie, and son Angus, accompanied by Mrs. James Morrison, Summerside, were visitors here Sunday.

Mr. and Mrs. Frank Houston, Mayfield, have as their guest Miss Laura G. Ross, Charlottetown.

Mr. Leslie Weeks, Fredericton, has purchased a Saw Mill from Mr. Marchbanks, at Mill Valley and expects to have it in operation in the course of a few days.

Mrs. Harry Ramsay, and son James arrived in Kensington, on Saturday evening, having returned from Revere Mass. They will spend a few weeks visiting relatives and friends here.

The Women's Missionary Society of the United Church held a special service in the church on Sunday evening. Rev. W. J. McLeod presided and delivered the message. The Charlottetown Male Chorus, eight were present, and the Music was of high order. Those Singers were greatly appreciated by the audience and by another visit from these artists in the near future. WITH THE CUTTING OF THE HAY

Time is moving on through August. With the cutting of the hay; Bring to mind the time I saw them. Cutting hay the first of May; All those California farmers. Down by where the Santa Fe Leaves the State of Arizona. Land o' small an scrubby tree.

Man, I mind me, 'twis in April When we left that busy spot; Wear the trail winds through the valley. Through Death Valley dry an hot. Eighty miles between the stations. Sifting water, on an empty bed. Drifting sand across the highway, Miles without a blade of grass.

Then we came to California, Land of palms and orange groves; By the smilin' blue sea water; Land o' headlands, bays, and coves. Seemed like good old times to hear them. Seemed so good to smell them too. Smell the timothy an' clover, Just the way we used to do.

Using just the style of mowers That we used on P. E. I. Pair o' horses, leather traces, Kind o' almost made me sigh. When I heard the singing scissars Of the mowers cutting the grass. Way down there in California, Down by Pasadena way. — James M. Maclean.

Vancouver, B. C.

Their long, flowing skirts skim the ground and are arranged to give
