## Optimistic Note Sounded By President Of P.E.I. Dairymen's Association

### Feed, Breed And Weed Basic Formula Essential To Dairy Business Stresses Mr. W. N. Jenkins In Annual Report.

The following address was delivered by Mr. W. N. Jenkins, president of the P. E. I. Dairymen's Association at the annual meeting of the organization yesterday.

"The year 1935 brings to us a feeling of optimism and an assurance that if properly has not turned the corner, it at least must be within hearing distance.

"This optimism manifests itself in two ways (1) Return to a planned and safer farm management, and (2) a decided betterment in markets and revenues resulting therefrom, so that today we find hope and good cheer coupled with a new feeling of confidence that things are going to be better and that with perseverance and proper planning we can win out.

"In looking over our agricultural conditions of the past year we have many things to be thankful for.

#### Pastures Had Good Start

"Early spring rain gave the pastures an excellent start and reacted favorably on all seed germination.

"The dry period, however that followed cancelled to a large extent the earlier favorable condition as a result, pastures became dry and this seriously affected dairy production. The mild, wet and prolonged autumn however, gave the pastures and after grass a new start, supplied the root crops with ample moisture, an excellent condition to mature at least a good root harvest and permitted all live stock to enter winter quarters in splendid shape. This should give us reason to believe that next year should bring forth abundant yields as far as grasses are concerned.

"May I urge you all to profit by our past mistakes and make an honest and earnest endeavor to start the year with a definite and positive resolve to plan better to make provisions for these difficulties that we have encountered this past year, and that we see to it that as far as our dairy work is concerned we shall grow enough to tide over these periods of poor pasture that invariably occur.

#### Cattle In Poor Condition

"Last spring many of our cattle were turned out to pasture in very poor condition and while the grass feed at first was plentiful, it took most of this to put our milk cattle into working shape and by the time they had regained their strength, the dry season came on and previous to that we had a very poor period from our cows that was not only affected ourselves, but placed the dairy business in many sections in an unenviable position.

#### "Feed, Breed and Weed"

"Let me stress here that if we are to stay in the dairy business there are three things we must do: 'Feed, breed, and weed.' This is an old formula but nevertheless a basic one.

"I have placed feed first, for without feed, results are impossible. If you have not got the feed, better to cut your herd down to that place where you feel you can afford to feed well.

"Why milk two cows and get only one?

#### Fine for Kidney Weakness

**STOP RESTLESS NIGHTS**

Keep your kidneys free from waste matter, poisons and acid, and put healthy activity into kidneys and bladder and you'll live a healthier, happier and longer life. Harmless way to do this is to get from your druggist a 40 cent box of Gold Medal Haaren's Oil. Careful analysis shows that it contains the most powerful kidney cleanser yet discovered. The swift results will surprise you.

Beside disturbed sleep some symptoms of kidney trouble are backache, moist palms, leg cramps and purty eyes. If you want real results be sure to get GOLD MEDAL—the original and genuine—a grand kidney stimulant and diuretic—right from Haaren's Island. Give your kidneys a good cleaning once in a while.

#### EYESIGHT EXAMINATION

Fitting and Supplying Glasses Etc.

Office Connected With Druggist.

#### BRINGING UP FATHER

SO—I TOLD HIM HE GOT BACK BEFORE I DID—I STAYED OUT AN HOUR LATER THAN I EXPECTED AND HE'S NOT AT HOME YET—

I'LL STAY UP UNTIL HE COMES HOME IF I HAVE TO SIT UP ALL NIGHT—

WHAT DO YOU MEAN BY COMING IN AT THIS HOUR? SHUT UP!— WHERE HAVE YOU BEEN? SHUT UP! YOU OUGHT TO BE ASHAMED OF YOURSELF— SHUT UP! WHAT'D DAUGHTER THINK IF SHE SAW YOU COMING IN AT THIS HOUR?

OH—HELLO, DAD AND MOTHER— UP LATE, TOO, I SEE—I HAD A GRAND EVENING—

#### Community Spirit Necessary

"A community spirit of cooperation must be developed with your creamery as the centre.

"May I suggest to your directors,

#### Stand on Own Feet

"Unless we re-create a new interest in dairying operations I am very much afraid that we are heading for the rocks. Too many today, in all walks of life are looking to government to solve their problems. What we need more than anything else is a return to independence of our fathers. That spirit which will draw us together to solve our own problems and when the solution is found go out and put it into operation.

#### Work to be Carried On

"Interruptions have occurred until now we have the assurance of the present government that the work will be carried on. Time is hardly available to quote figures to back up the work but briefly. Looking at Denmark we find, under a cow testing scheme that in a 19 year period production per cow increased from 4,000 lbs. of milk and 144 fat to 7,300 lbs. of milk and 272 lbs. fat.

"In New Zealand, one of our chief competitors, the average production was raised from 152 lbs. of fat to 218 lbs. in 10 years. B. C. which has had control of its own work since 1912 has raised the production per cow from approximately 5,000 lbs. and 183 fat to 6,000 lbs.

## Tribute to King George in Scotland

In Scotland tribute was paid to the memory of King George in the churches of all denominations in every part of the country, when special services were held. The Church of Scotland had special cause to remember His Majesty by reason of his regular attendance at the services of Crathie parish church, during his annual residence at Balmoral; and also because of his interest, year after year, in the deliberations of the General Assembly. The ministers of the Church of Scotland who were his chaplains as well as the other ministers who were commanded to preach before the King in the Crathie Church were always His Majesty's guests over the week-end at the Castle, and they were always impressed by his kindly human sympathy, and his keen interest in the Church of Scotland affairs. King George's chaplains in Scotland were the Revs. Dr. S. J. Ramsay Sibbald, Professor W. F. Paterson, Dr. John White, Professor Archibald Main, Dr. Norman MacLean, Dr. R. J. Drummond, Principal Alexander Martin, and the Very Rev. Sir George Adam Smith. The Rev. Dr. Charles L. Warr, minister of St. Giles Cathedral, Edinburgh, was an extra-chaplain, and the Rev. Dr. John Sturton, minister of Crathie parish church was His Majesty's domestic chaplain. At the memorial service in St. Giles Cathedral the hymn "O Love, that wilt not let me go" was sung, and, in announcing the Rev. Dr. Warr said that it was one of the King's special favorites, and that His Majesty always asked that it should be sung when he worshipped in St. Giles. — (The British Weekly).

#### Breeding

"Breeding—Decide on the breed you think best and stay by it. Use the best stock that money can buy. Never use a scrub. It is the most difficult business I know of to build up a dairy herd and all your hard labor may go for naught through the use of a poor bull.

"It should like to hear a keen discussion on the matter of supplementary feed crops and pasture improvement. Very little attention is given today by the average farmer to this all important subject. One needs to drive through the country during the summer and see herds trying to exist in fields as red almost as the main road.

#### Pastures

"Personally I have found that if pastures are seeded with 2 lbs. per acre of alsike clover early in the spring and then treated with a complete fertilizer, say 5-9-8 or top dressed with a light application of stable manure, excellent results can be expected. I do believe that where the land is poor and manure is scarce sweet clover will give excellent results. This is a crop that is being too much overlooked.

"For supplementary feed, nothing is better than corn or O. P. V. mix. Either one of these have the added advantage of being able to be stored for winter use.

"Too much stress cannot be put on the growing of mangels and turnips. There is no better feed than mangels. On the other hand, turnips may be the excellent alternative. I do believe that we can take care of any surplus and if need be may furnish cash to buy any mill feeds that may be required.

#### Cheese

"The importance of cheese production is being overlooked both by producer and consumer. Owing to the low price of cheese and the high cost of hauling milk, the cheese factory is slowly but surely declining. This may not be in the best interest of the dairy business.

#### Cheese Bonus Commended

"Our late Federal Government's policy of bonusing cheese production

## "FASTERFAT"

### White Fish Meal

PROTEIN — 70% and high in other feeding properties. After all PROTEIN is the most important ingredient. Our "FASTERFAT" WHITE FISH MEAL has the highest of any Fish Meal made.

Buy Only "Fasterfat" Sold by us in 100 lb. Bags, and 25 lb. cartons.

WHOLESALE and RETAIL at our SEED & FEED STORE at special low prices.

**Carter & Co. Ltd.**

## FOLLOW THE LEADER

Choose Hickey & Nicholson's BRIGHT CUT SMOKING TOBACCO and enjoy the extraordinary mildness that makes it a leader among better tobaccos. The bright red package is lined with heavy waxed paper to keep the tobacco moist and fresh and to seal in all the mellow satisfaction of the fine Ontario grown leaf. BRIGHT CUT is the smoothest smoke for a dime.

**HICKEY & NICHOLSON TOBACCO COMPANY, Ltd.**

#### U.S. Athlets For Berlin Olympics

(By Alan Gould)  
(Associated Press Sports Editor)  
NEW YORK, Feb. 18.—The Olympic march on Berlin is still five months away but there's no doubt the United States will have more to cheer about this summer than they did at Garmisch-Partenkirchen.

Developments of the indoor campaign have focused the spotlight on the middle-distance foot-racers. Joe Mangano's sensational improvement, Gene Venzke's superb comeback and the remarkable achievements of Syracuse's Eddie O'Brien have helped boom United States Olympic prospects.

With Glenn Cunningham, the mile record holder, still a potent factor and Bill Bonthron, the former Princeton ace, biding his time until the outdoor season, there is certain to be a hot battle for the three 1,600 meter places available on the team that goes to Berlin in July.

From 100 to 800 metres, the class of American talent averages higher than at any time in track history. Topping the list is Ohio State's Jesse Owens, a record-smasher who may be the first athlete to combine the sprint triumph with broad-jumping victory in the Olympics. Eulace Peacock, the United States 100 meter champion, Ralph Metcalfe and Ben Johnson, Alim Columbia negro, have been challenged this winter by Eddie Siegel's come-back but the dusky fliers seem certain to hold sway when the big tests rolls around.

#### Cow Testing

"From a study of the dairy situation one of our main problems is to raise the production of our herds to a level where profits may be expected. For this reason we have given our support to the herd promotion work.

"Cow testing was first started in Canada in 1904 by the Dominion Dairy Branch and carried on under various plans until 1924, when it was handed over to the Dominion Livestock Branch. Over a year ago on Jan. 1, 1924, we were notified that the Dominion Government would discontinue this work and our local government took over its supervision.

#### Couple's 92 Descendants

SOUTHAMPTON, England — Mr. and Mrs. William Weeks of Waverly Road, Freemantle, who recently celebrated their diamond wedding, have nine children, 55 grandchildren and 28 great grandchildren. Mr. Weeks is 79.

#### Was Royal Auditor

TOTTENHAM, England — Sir William Barclay Pease, noted accountant, died here, at the age of 84. He was the auditor of the personal accounts of King George, Queen Mary, and the present King.

## A Typical English Chimney Sweep Family

Chimney sweeping is a profession handed down from generation to generation in England where chimney sweeps all. Local chimney sweeps often than in Canada. Here is shown a typical family in London, Alfred Pearce (2nd from left) and six of his seven sons, chimney sweepers all. Local chimney sweeps tell us that in England, householders must have their chimneys swept frequently because of the soft coal and big fireplaces. A by-law in London says that chimneys must be swept at last every three months.
