Home And School Meeting At Stella Maris

The Annual Meeting of the Home and School Association was held at Stella Maris hall on Sunday evening, Sept. 25th. The president, Mrs. M. J. Doyle in an inspiring address told the members that all must co-operate to give the children whatever is necessary for their spiritual and temporal welfare. Mrs. Doyle then asked the secretary to read the minutes of the last meeting and asked the treasurer for her report. The secretary read the conclusions of the Association, after which the election of officers took place. The following is the slate of officers: President, Mrs. M. J. Doyle; vice-president, Mr. Thomas Johnston; secretary, Reverend Sister St. Mary Eugenia; treasurer, Mrs. Joseph L. Gallant. Mr. George LeClair expressed his satisfaction at the result of the election and said that we are looking forward to a continuation of the good work of the past. Reverend Father Robin congratulated the members on their fine attendance and spoke about the importance of the work of such an association in this school district. He suggested that the regular monthly meetings be made more interesting by inviting guest speakers and by the use of the question box. Mrs. Emile Gauthier moved that the association help the secretary of the school district to defray the expenses of desk copies of text books for the various classes. The members decided to hold their monthly meetings on the third Sunday of the month. The meeting closed by the singing of "Ave Maria Stella", after which the parents discussed with the various teachers the progress or the lack of progress of their children.

YORK PREPARES FOR SHOW — A committee comprising Leth Brown, Harold Watts and Raymond Vessey met at the home of Arthur Vessey on Tuesday evening last to finalize plans for their annual concert to be presented several nights in early November. It was announced that the program would run slightly more than two hours, would be of a variety nature, and that the names of the three guest artists taking part would appear in the press shortly. As several of the musical numbers

require elaborate staging, it was felt it would be impossible to move this show in its entirety to Charlottetown or other centres, therefore it was decided to arrange with the L.M.T. to run a bus service from the city each night so that those without other means of transportation might have an opportunity to attend. After some further discussion on routine matters in connection with the staging of the show, the meeting adjourned.

Kingston & Vicinity

The school of this Vicinity has now opened with Miss Nelda Richards engaged for the coming year.

Many of the people of this vicinity recently attended the ploughing match held at Dundas.

Some of the ladies of the Kingston W.I. recently attended the district convention which was held in North River Hall.

Mrs. Ernest Holm of De-Seble was a recent visitor, to Kingston being the guest of Mr. and Mrs. Cecil Cass.

Miss Joyce MacSwain of Charlottetown recently spent the weekend in Kingston, being the guest of Miss Joyce Willis.

Mr. Heber Campbell and Mr. Myron Holmes are busily engaged in building the new rink at North River.

FOREGO 5-DAY WEEK

LICHFIELD, Staffordshire, England, Sept. 28. — (CP) — To help produce more equipment for Britain's automotive industry, employees of a paint spray factory near here voted today to forego their five-day week. The 250 employees, some of whom travel 20 miles from Birmingham daily, volunteered to work four hours Saturday morning on an overtime basis.

22 1/2 Minutes of your favourite music played without interruption! Ask your Sparton Dealer for a free demonstration

You Save Money with the DODGE L-Head Engine... A PART OF DODGE DEPENDABILITY

YOU SAVE MONEY every mile you drive with the Dodge simple-design L-Head engine. There are fewer moving parts to wear. Oil filter, floating oil intake, and air cleaners keep carbon and dirt from moving parts to reduce wear. Such "extra" features as four rings per piston, full length water jackets, lightweight alloy pistons and alloy exhaust valve seat inserts, result in savings on gas, oil, and repairs.

Other leading features of the economical Dodge engine are explained on the right. But in many other ways Dodge gives you more for your money.

You could pay much more, and still not get all of Dodge roominess, beauty and ruggedness. Test for yourself the generous head, leg, and elbow room. Compare the "outlook" through the high, wide windshield. Note how easy it is to get in and out. Try out the new Dodge on the road and discover for yourself its flashing performance, driving ease, safety, and riding smoothness.

No matter which way you look at it, your dollars will go further with Dodge . . . and so will you.

CHECK THESE "EXTRA" FEATURES WHICH ARE STANDARD EQUIPMENT ON THE NEW DODGE.
Automatic electric shocks; Automatic ignition by starting; Aluminum alloy pistons; Four rings per piston; Low pressure tires; Chain crankshaft drive; Oil bath air cleaner; Oil filter; Floating oil intake; Harddisk drive; Safety-Rim wheels; Floating Power engine mounting; Chair-height seats; Full-width defroster vents.

- L-HEAD OPERATION** is quieter, as all moving parts are inside the block. Fewer parts to wear or work loose assure longer life. Simple construction allows easy maintenance.
- FLOATING POWER** is the name given to the scientific Dodge method of mounting the engine on the chassis so that engine vibration is not transmitted to the body. Results in smooth, quiet operation and long car life.
- OIL BATH AIR CLEANER** filters the air before it enters the carburetor. By keeping dust out of the engine, it cuts down repairs and lengthens engine life.
- OIL FILTER** of micron type, filters even the smallest particles of carbon or dirt out of the oil and so reduces wear on bearings and cylinder walls for long, trouble-free engine life.
- WEATHERPROOF IGNITION SYSTEM** gives maximum protection against water and dirt for dependable all-weather operation. Distributor has a new splash-proof cap. Centre distributor brush has a 10,000 ohm carbon suppressor which allows a wider spark gap setting for better idling, and low-speed performance.
- AUTOMATIC CHOKE.** The choke enriches the mixture by automatically reducing the proportion of air drawn through the carburetor during warm-up, to provide easy starting under all weather conditions. Saves fuel by preventing too rich an operating mixture.
- FLUID DRIVE** on Custom Dodge models lets you drive, relaxed, in high gear most of the time. It is particularly effective on wet pavement, ice or mud, allowing smooth transfer of power without stalling. The Custom Dodge is still the lowest-priced car in Canada with Fluid Drive as standard equipment.
