Cleanliness is Next to Godliness

If you want your home thoroughly clean and healthy, have it done scientifically. Ordinary disinfectants give only a false sense of security. Microbes and bacteria lurk beyond the reach of the most particular housewife. I use only the latest approved method which is a perfect germicide and endorsed by all Boards of Health and Health officers.

THE QUESTION OF FLOUR.

Not the least of the many problems which puzzle the young housekeeper is the selection of the flour. Cook books are often indefinite, one recommending a brand you cannot conveniently obtain; another neglecting the point or insisting on some flour you have found unsatisfactory. Have you ever tried blended flour? If not use it next baking day. The leading Ontario millers are now making a blend of Ontario fall wheat with Manitoba spring wheat in such a way that the best qualities of both are combined scientifically to make a perfect flour.

Ontario fall wheat has the flavor and delicacy, but not sufficient strength. Manitoba spring wheat flour, rises well, but absorbs much water and requires much kneading, the bugbear of all bread-makers. Blended flour, as milled by the Ontario millers, combines the strength of Manitoba wheat and the delicate flavor of Ontario wheat, and is a superior flour to either one alone. It gives the food value with the lightness and deliciousness. Housekeepers everywhere are using blended flour for bread, cake and pastry. Blended flour solves the flour trouble of all the cooks who have the discernment to use them.
